Summary

American Airlines, which already took a massive hit from the declining cargo revenues (down 14.8% in 2019) and flight cancellations due to the grounding of Boeing 737 Max jets, is now grappling with the dreaded coronavirus outbreak. Due to coronavirus-induced tepid air-travel demand, the carrier suspended flights connecting Dallas with China, Hong Kong and Seoul. It also decided to cancel all U.S. flights to Milan, Italy. Primarily due to the virus outbreak, shares of American Airlines have plunged in excess of 30% in the past month. However, we are impressed by the uptick in passenger revenues (up 3.3% in 2019). We are also appreciative of the airline's efforts to reward its shareholders through dividends and buybacks. Measures to expand its operations are encouraging as well. Reduction in fuel costs is an added positive.

Overview

American Airlines Group Inc. was formed following the December 2013 merger between AMR (American Airlines' parent group, which was founded in 1934) and U.S. Airways.

The merger, which occurred after a bankruptcy filing by American Airlines, resulted in the formation of the largest airline internationally. Interestingly, the carrier has been making substantial profits ever since the merger took place. American Airlines Group is headquartered in Fort Worth, TX.

This Delaware corporation's wholly-owned subsidiaries are American Airlines, Envoy Aviation Group, PSA Airlines and Piedmont Airlines. The company's primary business is to provide passenger and cargo services.

The carrier operates more than 6,700 daily flights to over 330 destinations in more than 50 nations across the globe from its hubs and gateways in Charlotte, Chicago, Dallas/Fort Worth, London Heathrow, Los Angeles, Miami, New York, Philadelphia, Phoenix and Washington, D.C.

Apart from a vast network of domestic services, the airline company provides international services to Canada, Central and South America, Asia, Europe, Australia and New Zealand.

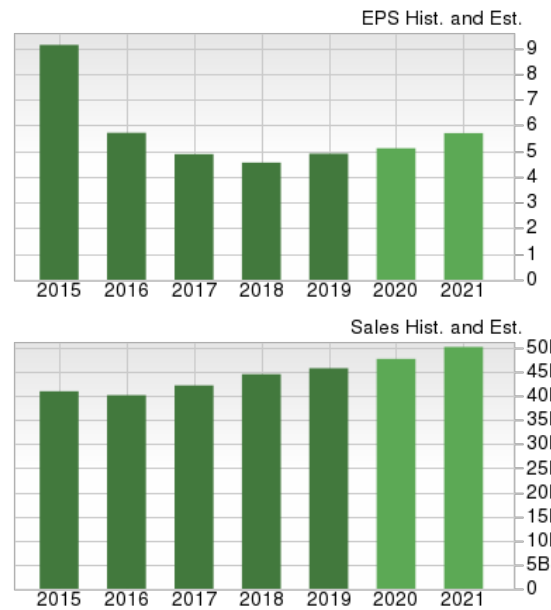

On domestic routes, the company competes with the likes of Alaska Airlines, Allegiant Air, Delta Air Lines, Frontier Airlines, Hawaiian Airlines, JetBlue Airways, Southwest Airlines, Spirit Airlines and United Airlines, while on the international routes some of its competitors are Emirates, Etihad Airways and Qatar Airways.

American Airlines Group maintains a fleet comprising of multiple mainline jets in addition to many regional aircraft which were operated by its regional airline subsidiaries and third-party regional carriers. The company is leaving no stone unturned to upgrade its facilities. As of Dec 31, 2019, the company operated 942 mainline and 605 regional aircraft.

The company primarily operates in two segments: Mainline and Regional affiliates. Furthermore, through its large cargo unit, the company offers a broad range of freight and mail services across the globe.

In 2019, the company reported operating revenues of \$45.77 billion, up 2.8%. Passenger and cargo revenues accounted for 91.8% and 1.9% respectively of the top line. The remainder was accounted for by other sources.

American Airlines' fiscal year coincides with the calendar year.

Reasons To Buy:

▲ American Airlines' performance with respect to unit revenues is encouraging. The carrier expects total unit revenues to be either flat or increase up to 2% on a year-over-year basis in the first quarter of 2020.. Pre-tax margin, excluding special items, is projected in the range of 2-4%. Reduction in fuel costs is an added positive. The deal with Qatar Airways is also a positive.

We are impressed by the efforts to reward its shareholders through share buybacks and dividend payments.

▲ The company's efforts to expand operations are added positives. In this regard, its decision to expand European footprint is noteworthy. Furthermore, American Airlines' decision to enter the African market in 2020 is in line with its expansion plans. In July, the company's efforts to strengthen its foothold in the Oceania region received a boost when the U.S. Department of Transportation approved its joint venture with Australia's leading carrier — Qantas Airways. The joint venture, which has become effective following the approval, strengthens the carriers' 30-plus years of partnership by fostering air travel between the United States and Australia as well as New Zealand. Additionally, in May the carrier started operating 15 new gates at DFW, its most profitable hub. As a result, the carrier is operating flights to 23 new destinations across the globe like Dublin, Munich, Santo Domingo and Monterey, California. Moreover, the carrier's codeshare deal with GOL Linhas will strengthen the former's footprint in Latin America, upon materialization. Additionally, efforts to modernize its fleet also please us.

▲ We are also impressed by the company's efforts to reward shareholders through share buybacks and dividend payments. The carrier, which pays a quarterly dividend of 10 cents per share, has returned more than \$11 billion to stockholders through share repurchases and dividends since mid-2014. Moreover, in April 2018, the company's board cleared a new buyback program worth \$2 billion. It will be completed by Dec 31, 2020. During 2019, the carrier returned \$1.3 billion to shareholders through dividends and share repurchases.

Reasons To Sell:

- ▼ American Airlines suspended flights connecting Dallas with China, Hong Kong and Seoul due to lackluster demand following the coronavirus outbreak. The carrier also decided to call off all U.S. flights to Milan, Italy, again on account of this soft air-travel demand induced by the coronavirus. Additionally, the carrier, which currently has 24 Boeing 737 MAX jets in its fleet, expects the jets to remain grounded until Aug 18, 2020. Notably, the carrier canceled roughly 10,000 flights in the final quarter of 2019.
- ▼ Declining cargo revenues are concerning as well. As an evidence, cargo revenues declined 14.8% to \$863 million in 2019. The decrease is due to sluggish cargo ton miles with international freight volumes continuing to be weak. Even though positive on its fleet modernization efforts, we note that this is increasing capital expenditures which in turn is limiting bottom-line growth. For example, its 2020 capex is expected to be \$3.3 billion. Out of \$3.3 billion, \$1.6 billion will be spent toward aircraft
- ▼ American Airlines is a highly leveraged company. In fact, its long-term debt-to-capitalization (expressed as a percentage) is currently 99.3, much higher than the industry's average of 46.8. The reading for the S&P 500 Index, of which American Airlines is a key member, is 43.6.

Rapid spread of coronavirus is causing American Airlines to cancel multiple flights.

Last Earnings Report

In-line Earnings at American Airlines in Q4

American Airlines' earnings (excluding 20 cents from non-recurring items) of \$1.15 per share matched the Zacks Consensus Estimate. However, the bottom line improved 10.6% on a year-over-year basis, backed by low fuel costs. Operating revenues of \$11,313 million increased 3.4% year over year and also marginally beat the Zacks Consensus Estimate of \$11,308.3 million. Higher passenger revenues drove the top line.

Passenger revenues, which accounted for bulk of the top line (91.5%), increased 3.9% owing to strong demand for air travel. But cargo revenues declined 18.3% to \$216 million, mainly due to a 15.6% reduction in cargo ton miles. Other revenues increased 5.4%.

Total revenue per available seat miles (TRASM: a key measure of unit revenues) inched up 0.5% to 16.1 cents in the reported quarter. Passenger revenue per available seat miles (PRASM) increased 0.9% to 14.72 cents in the fourth quarter. However, consolidated yield dipped 2%.

While traffic (measured by revenue passenger miles) was up 6%, capacity (measured by average seat miles) expanded 2.9%. Consolidated load factor (percentage of seats filled by passengers) increased 240 basis points to 83.8% as traffic growth outpaced capacity expansion.

Total operating costs (on a reported basis) were up 2.1% year over year to \$10,584 million with expenses pertaining to salaries, wages and benefits rising 3%. Consolidated operating costs per available seat miles (CASM: excluding fuel and special items) increased 2% to 11.59 cents. However, CASM (including fuel and special items) declined 0.8%. Average fuel cost per gallon (on a consolidated basis: including taxes) declined 8.7% to \$2.05.

American Airlines currently has 24 Boeing 737 MAX jets in its fleet, which are grounded since March 2019. Notably, American Airlines canceled roughly 10,000 flights in the final quarter of 2019. The carrier currently expects its Boeing 737 MAX jets to be grounded through Jun 3, 2020.

American Airlines rewarded its shareholders to the tune of \$329 million in the reported quarter through buybacks (\$285 million) and dividends (\$44 million). Furthermore, the carrier declared a dividend of 10 cents per share. The amount will be paid out on Feb 19, 2020 to the shareholders of record on Feb 5. Notably, the carrier \$1.3 billion to its shareholders through dividends and share repurchases in 2019.

Outlook

For the first quarter of 2020, TRASM is expected to be either flat or increase up to 2% on a year-over-year basis. Pre-tax margin excluding special items is projected in the range of 2-4%. Additionally, fuel costs are estimated between \$2.00 and \$2.05 per gallon in the ongoing quarter. The company predicts first-quarter costs per available seat miles (excluding fuel and special items) to increase in the 2-4% band. Capacity is expected to grow approximately 2.5% in the March-end quarter.

For 2020, capacity is expected to expand in the range of 4-5%. American Airlines expects 2020 earnings per share between \$4 and \$6. Moreover, the carrier anticipates to generate approximately \$6 billion of free cash flow between 2020 and 2021.

Quarter Ending **12/2019**

Report Date	Jan 23, 2020
Sales Surprise	0.04%
EPS Surprise	0.00%
Quarterly EPS	1.15
Annual EPS (TTM)	4.91

Recent News

American Airlines Cancels Seoul Flights – Mar 3, 2020

American Airlines has suspended service between Dallas and Seoul-Incheon through Apr 24, 2020 due to a drop in demand. Earlier, the carrier suspended all U.S. flights to Milan.

Amid decreasing air travel demand, American Airlines suspended change and cancellation fees to encourage customers to travel without hesitation, while simultaneously trying to get back its share of the fallen demand. The facility is available on all new ticket purchases through Mar 16. Customers can avail of this benefit up to 14 days prior to travel for scheduled journey through late January 2021.

Deal With Qatar Airways – Feb 25, 2020

American Airlines ended its dispute with Qatar Airways when it announced the decision to renew its codeshare partnership with the Gulf carrier. The deal will, however, have to be approved by the authorities in Qatar as well as the United States before it becomes effective. On materialization, the pact between the carriers will boost connectivity between United States and Qatar. Further, in a bid to widen travel options to its customers, American Airlines will place its code on select Qatar Airways' nonstop and connecting flights to/from the United States and the latter's hub in Doha.

Similarly, Qatar Airways will place its code on select flights of American Airlines. Notably, a codeshare deal allows sharing of flights, which implies that a passenger has the free will to avail of any flight operated by either of the companies under the agreement, irrespective of the flight number. American Airlines also stated that it will also start exploring the option of flight operations between the United States and Doha once the codeshare deal takes effect.

Valuation

American Airlines shares are down 43.4% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Transportation sector are down 23.6% and 8.3%, respectively, over the past year. The S&P 500 index is up 11.6% over the past year.

The stock is currently trading at 3.56X forward 12-month price to earnings, which compares to 6.64X for the Zacks sub-industry, 11.45X for the Zacks sector and 17.89X for the S&P 500 index.

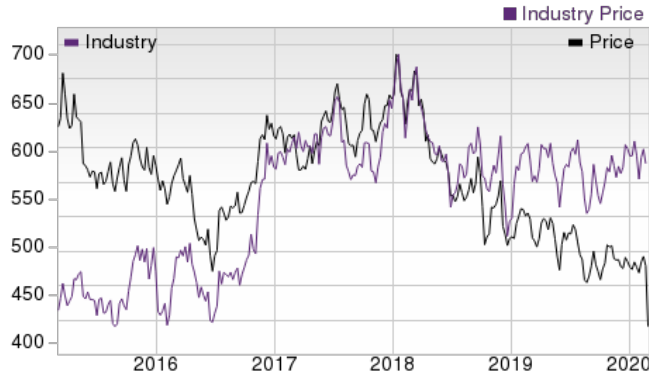

Over the past five years, the stock has traded as high as 11.42X and as low as 3.43X, with a 5-year median of 6.38X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$20 price target reflects 3.84X forward 12-month earnings.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	C
Momentum Score	A
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
