### Summary

Ameren Corp.'s growth has been led by its systematic and consistent investment in growth projects and infrastructure upgrade. In the 2020-2024 period, it expects to spend up to \$16 billion to support overall system reliability and infrastructural upgrades. Such investment strategy will boost its future growth prospects. Its shares outperformed the industry in the year to date period. Further, it projects regulated infrastructure investments of more than \$20 billion in the 2025-2029 period. However, aging infrastructure might force Ameren to incur unplanned capital expenditures, escalating operating costs, in turn. It expects significant economic disruptions from COVID-19 potentially for the remainder of 2020, which may negatively impact its sales. Further, it has to bear high air emissions regulatory expenditures.

## Overview

St. Louis, MO-based Ameren Corporation, incorporated in December 1997, is a utility company, which generates and distributes electricity and natural gas to residential, commercial, industrial and wholesale

end markets in Missouri and Illinois. The company serves nearly 2.4 million electric and more than 900,000 gas customers. The company has four business segments - Ameren Missouri, Ameren Illinois Electric Distribution, Ameren Illinois Natural Gas and Ameren Transmission.

**Ameren Missouri** - This segment includes all the operations of Ameren Missouri. Ameren Missouri generates electricity through its coal-fired, nuclear, hydroelectric, natural gas or oil-fired and renewable facilities. Operating revenues in 2019 amounted to \$3,109 million.

**Ameren Illinois** - Ameren Illinois Electric Distribution consists of the electric distribution business of Ameren Illinois. Operating revenues in 2019 amounted to \$1,504 million.

**Ameren Illinois Natural Gas** - This segment consists of the natural gas business of Ameren Illinois. Operating revenues in 2019 amounted to \$797 million.

**Ameren Transmission** - This segment is primarily composed of the aggregated electric transmission businesses of Ameren Illinois and Ameren Transmission Company of Illinois (ATXI), and associated Ameren (parent) interest charges. ATXI deals with the construction and operation of Midcontinent Independent System Operator, Inc. (MISO)-approved electricity transmission projects. Operating revenues in 2019 amounted to \$464 million.

---

## Reasons To Buy:

- ▲ Ameren's growth has been led by its systematic and consistent investment in growth projects and infrastructure upgrade. To this end, it is imperative to mention that the company had invested \$2.4 billion in 2019. During the 2020-2024 period, the company expects to spend up to \$16 billion, comprising up to \$8.2 billion, \$4.6 billion and \$3.2 billion for Ameren Missouri, Ameren Illinois and Ameren Transmission, respectively. This reflects an improvement from the company's earlier five-year investment plan worth \$13.9 billion for the 2019-2023 period. Further, the company projects a solid pipeline of regulated infrastructure investments of more than \$20 billion in the 2025-2029 period. These investments are aimed at supporting overall system reliability, environmental compliance, and electric and natural gas utility infrastructure improvements. Such notable investment strategy will boost Ameren's future growth prospects. Further, the company projects a solid pipeline of regulated infrastructure investments of more than \$20 billion in the 2025-2029 period. Such notable investment strategy will boost Ameren's future growth prospects.

Ameren's systematic investments in growth projects, infrastructure upgrades, electric transmission and delivery infrastructure will help to improve service reliability and generate higher profits.

- ▲ In renewables, Ameren plans to offer electricity through cleaner and more diverse sources of energy generation, including solar, wind, natural gas, hydro and nuclear power. Notably, the company aims at expanding renewable sources by adding at least 700 megawatts (MW) of wind generation by 2020 in Missouri and 100 MW of solar generation by 2027. To fulfill this target, Ameren Missouri reached agreements with two developers to acquire two plants with wind generation capacity of 557 megawatts, after construction. Once completed, these facilities will represent about 80% of Ameren's compliance needs with the state of Missouri's requirement of achieving 15% of native load sales from renewable energy sources by 2021, subject to customer rate increase limitations. The company also plans to retire its coal-fired Meramec Energy Center by 2022.

These initiatives will enable Ameren to reach its goal of reducing CO2 emissions by 35% by 2030, 50% by 2040 and eventually 80% by 2050, from the 2005 base level. Also, the company expects a potential investment of \$1.2 billion in Ameren Missouri's wind-generation projects. In fact, this particular investment in wind generation is expected to generate production tax credits for the company, beginning 2020.

- ▲ During the first quarter of 2020, the company paid out dividends worth of \$122 million compared with \$116-million dividends paid out during the first quarter of 2019. Ameren expects its dividend payout ratio between 55% and 70% of annual earnings over the next few years. At the end of the first quarter, the company's payout ratio of 61.4% increased substantially from the prior-quarter figure of 57.3% and was also the highest among the consecutive four-quarter figures. Ameren's expected multi-year earnings growth is likely to be driven by strong projected rate base growth of approximately 9% compounded annually from 2019 through 2024. This, in turn, will result in an attractive total return opportunity for shareholders compared with its regulated utility peers. Such solid capital deployment strategy will surely boost investors' interest in this stock. Notably, Ameren's share price has declined 8.1% in the year to date period, outperforming the industry's decline of 13.2%.
-

---

## Reasons To Sell:

- ▼ During the first quarter of 2020, the COVID-19 pandemic had an impact on the electric margins for Ameren Missouri and Ameren Illinois electric distribution, but the impact was not a significant one. However, following limited business activity during the entire second quarter, the company expects to experience significant impact in its commercial and industrial sales. The company expects significant economic disruptions from COVID-19 in the second quarter of 2020 and potentially for the remainder of the year. Looking ahead, as the duration and severity of the pandemic remains uncertain, such economic crisis may have a significant adverse impact on the company's overall results.

Stringent environmental regulations and operational risks might be potential growth deterrents.

In line with such uncertainties, Ameren Corp. expects lower sales in Missouri and the impact caused by the pandemic to reduce earnings by approximately 10 cents per share in 2020 compared to 2019's weather-normalized sales. For the remainder of the year, it expects overall weather-normalized sales to be down approximately 2.5% and commercial sales to decline approximately by 7%. Moreover, industrial sales are also anticipated to decline approximately by 4%.

- ▼ The company has to bear high expenditure to comply with air emission regulations, including burning ultra-low-sulfur coal and installing new or optimizing existing pollution control equipment. Ameren and Ameren Missouri expect to make capital expenditures of \$300-\$400 million from 2019 through 2023 in order to comply with existing environmental regulations. Additional environmental controls beyond 2023 may be required, which, if implemented, will increase the company's overall capital expenses.
- ▼ Ameren Corp. has a long-term debt of \$9,378 million as of Mar 31, 2020, higher than \$8,915 million as of Dec 31, 2019. Its current debt is \$972 million as of Mar 31, 2020. Its cash equivalents worth \$42 million as of Mar 31, 2020, remained much lower compared to both its current and long-term debt levels. This makes us skeptic about the company's ability to duly meet its obligations.

Moreover, the company's current ratio as of Mar 31, 2020, is 0.62, which being less than 1, indicates that this utility might not have sufficient capital in hand to meet its short-term obligations. Further, the company's debt-to-capital ratio is 0.54 as of Mar 31, 2020, slightly higher from the quarter-ago ratio of 0.52. Together, such unfavorable financial ratios indicate that the company might face difficulties and struggle to meet its debt obligations in the near future.

---

## Last Earnings Report

### Ameren Q1 Earnings Miss Estimates, Revenues Down Y/Y

Ameren Corporation's first-quarter 2020 earnings of 59 cents per share from continuing operations lagged the Zacks Consensus Estimate of 71 cents by 16.9%. The bottom line also declined 24.4% from the year-ago quarter's 78 cents.

#### Total Revenues

Total revenues came in at \$1,440 million in the reported quarter, which declined 7.5% year over year due to lower electric sales and natural gas volumes. The top line also lagged the Zacks Consensus Estimate of \$1,585 million by 9.1%.

#### Highlights of the Release

Ameren's total electricity sales volume declined 2.8% to 18,671 million kilowatt hours (kWh) compared with 19,217 million kWh in the year-ago quarter. Moreover, gas volumes declined 12.2% to 72 million dekatherms.

Total operating expenses summed \$1,199 million, down 5.4% year over year. Interest expenses were \$93 million compared with \$97 million a year ago.

The company's operating income fell 16.3% to \$241 million from \$288 million in the year-ago quarter.

#### Segment Results

*Ameren Missouri* segment reported an operating loss of \$10 million in the first quarter against a \$39-million income in the year-ago quarter. The decline was primarily due to milder winter temperatures compared to colder-than-normal temperatures in the year-ago period as well as the absence of energy efficiency performance incentives compared to the year-ago period.

*Ameren Illinois Electric Distribution* segment reported operating income of \$37 million in the first quarter compared with \$36 million in the year-ago quarter, led by increased year-over-year earnings on infrastructure investments.

*Ameren Illinois Natural Gas* segment reported operating income of \$55 million compared with \$57 million in the year-ago quarter. The decline was primarily due to higher other operations and maintenance expenses incurred.

*Ameren Transmission* segment reported operating income of \$47 million in the first quarter compared with \$44 million in the year-ago quarter, led by increased earnings from infrastructure investments.

#### Financial Condition

The company reported cash and cash equivalents of \$42 million as of Mar 31, 2020, compared with \$16 million at 2019-end.

As of Mar 31, 2020, long-term debt totaled \$9,378 million compared with \$8,915 million as of Dec 31, 2019.

In the first quarter of 2020, cash from operating activities amounted to \$290 million compared with \$387 million in the first quarter of 2019.

#### Guidance

Ameren reaffirms its 2020 guidance. The company expects earnings of \$3.40-\$3.60 per share, which is projected to grow at a 6-8% compound annual rate from 2020 through 2024. Currently, the Zacks Consensus Estimate for the company's 2020 earnings is pegged at \$3.41 per share, lower than the midpoint of its guided range.

Quarter Ending **03/2020**

Report Date	May 11, 2020
Sales Surprise	-9.13%
EPS Surprise	-16.90%
Quarterly EPS	0.59
Annual EPS (TTM)	3.16

## Recent News

On **May 21, 2020**, Ameren Corporation collaborated with the Electric Power Research Institute's (EPRI) Incubatenergy Labs startup challenge to demonstrate and explore today's and tomorrow's technologies, products and services that have the potential to benefit Ameren's customers.

## Valuation

Ameren Corp.'s shares are down 8.1% in the year-to-date period and 8.2% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Utilities sector are down 13.2% and 14.9% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry is down 8.2%, while the sector declined 22.1%.

The S&P 500 index is down 3.8% in the year-to-date period and 5.2% in the past year.

The stock is currently trading at 19.7X of forward 12-month earnings, which compares to 13X for the Zacks sub-industry, 12.2X for the Zacks sector and 22.4X for the S&P 500 index.

Over the past five years, the stock has traded as high as 24.8X and as low as 14.3X, with a 5-year median of 19.5X. Our Neutral recommendation indicates that the stock will perform in line with the market. Our \$75 price target reflects 20.9X forward 12-month earnings.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	C
Momentum Score	A
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
