(Since: 08/03/20)

Prior Recommendation: Underperform

Short Term: 1-3 Months

**Zacks Rank:** (1-5)

**2-Buy**

Zacks Style Scores:

VGM:A

Value: A

Growth: B

Momentum: A

### Summary

Aerojet Rocketdyne ended the second quarter of 2020 on a solid note, with both earnings and revenues exceeding the Zacks Consensus Estimate. The company, in 2019, initiated recurring production activity at its new Advanced Manufacturing Facility in Huntsville, AL, wherein it is now producing high-value non-energetic subassemblies for Standard Missile and THAAD. This, in turn, might have boosted investors' confidence in this stock. In the past year, shares of the company have outperformed the industry. However, Of late, Aerojet has been facing stiff competition from SpaceX and Blue Origin. These new entrepreneurs are trying to compete primarily on price front, thus weighing on the existing cost paradigms and Aerojet's manufacturing methodologies. Such intensifying competition in turn might hurt its top-line performance.

## Overview

Incorporated in 1915 and then reincorporated in 2014, this California-based Aerojet Rocketdyne Holdings, Inc. is a technology-based engineering and manufacturing company. The company develops and produces specialized propulsion systems as well as armament systems. Currently, it manufactures all four types of propulsion systems (liquid, solid, air-breathing, and electric) for space, defense, civil and commercial applications. Aerojet Rocketdyne is also a major supplier of propulsion products to top original equipment manufacturers (OEMs) such as Boeing, Lockheed Martin, Raytheon and United Launch Alliance (a joint venture between Lockheed Martin and Boeing). In fact, its products also bought by the U.S. Department of Defense (DoD), NASA and other U.S. government agencies.

Apart from its expertise in aerospace and defense space, Aerojet Rocketdyne provides innovative solutions to its customers in the real estate markets. It currently owns 11,394 acres of land adjacent to U.S. Highway 50 between Rancho Cordova and Folsom, California east of Sacramento. The company leased office space in Sacramento to various third parties that generated \$7.5 million in revenue in 2019.

Aerojet Rocketdyne operates through two business segments, namely, Aerospace & Defense and Real Estate.

The **Aerospace & Defense** segment deals with the company's Aerojet Rocketdyne subsidiary. Notably, this segment is engaged in technology-based designing, developing and manufacturing aerospace, and defense products and systems. In 2019, it generated sales of \$1,974 million, representing 99.6% of total business sales.

The **Real Estate** segment includes the activities of the company's Easton subsidiary, which focuses on the re-zoning, entitlement, sale, and leasing of its excess real estate assets. This division generated sales of \$7.5 million in 2019, representing 0.4% of total business sales.

As of Dec 31, 2019, Aerojet Rocketdyne's contract backlog (funded and unfunded) was \$5.4 billion. Its funded backlog, which includes only amounts for which funding has been authorized by a customer and a purchase order has been received, totaled \$2.1 billion.

---

## Reasons To Buy:

▲ With an experience of supplying some of the world's most technologically advanced propulsion systems for over 70 years, Aerojet serves a broad range of customers. The company's long-standing relationship with the U.S. defense giants should serve as a primary growth driver, given growing demand in the rocket and missile propulsion markets. Courtesy of this increasing demand, the company continues to expand its strong legacy propulsion franchises on the Standard Missile, Patriot Advanced Capability-3 (PAC-3), Terminal High Altitude Area Defense (THAAD) and Guided Multiple Launch Rocket System (GMLRS) missile propulsion systems. Notably, as of June 30, 2020, Aerojet's backlog was \$6.8 billion, compared with \$5.4 billion as of December 31, 2019. To this end, the company expects to recognize approximately 30%, or \$2.1 billion, of the remaining performance obligations as sales over the next 12 months, an additional 22% in the following 12 months, and 48% thereafter.

Growing backlog, cost reduction initiatives and strong solvency position should bode well for Aerojet Rocketdyne

▲ Aerojet has been taking notable strategic initiatives to reduce costs and serve its customers more efficiently. In this regard, it is imperative to mention its Competitive Improvement Program (CIP), Phase I of which was initiated in 2015, aimed at optimization of facilities and footprint reduction; product affordability; and reduce administrative and overhead costs. Under Phase II, approved in 2017, the company targeted to further consolidate its Sacramento, CA, and Gainesville, VA sites, while centralizing and expanding its existing presence in Huntsville, AL.

To this end, in 2019, Aerojet initiated recurring production activity at its new Advanced Manufacturing Facility in Huntsville, AL, wherein the company is now producing high-value non-energetic subassemblies for Standard Missile and THAAD. As of Dec 31, 2019, the company incurred restructuring and related costs of the Phase I and II programs of approximately \$197.0 million, down \$38.0 million compared with its initial cost estimate of \$235 million. Such initiatives will enable the company to upgrade its existing products and innovate new ones, and in turn, boost investors' confidence in this stock. Evidently, in the past year, Aerojet Rocketdyne's shares have declined 14.6% compared to the industry's 38.8% decline.

▲ Aerojet's cash and cash equivalents were \$1,032 million at the end of second quarter 2020, compared with \$906 million as of Mar 31, 2019. Its long-term debt was \$380 million as of June 30, 2020, while current debt stands at \$293 million. While the company's cash and cash equivalent has improved sequentially, its long-term and current debt values also stands below its current cash reserve. This indicates a solid solvency position acquired by Aerojet, considering the fact that the COVID-19 led uncertainty is causing cash crunch for companies as they face manufacturing and supply halt.

Moreover, the company's current ratio of 1.76 as of June 30, 2020, came in higher than the prior-quarter level of 1.67. Also, the ratio being more than 1 indicates that this defense contractor is well capable of paying off its short-term obligations. Further, Aerojet's debt-to-capital ratio of 0.5 as of Mar 31 declined sequentially from 0.52. Such favorable financial ratio also indicates the company's strong solvency position, at least in the near term.

---

## Reasons To Sell:

- ▼ A comparative analysis of the company's historical 12-month Price/Earnings ratio indicates a relatively gloomy picture that might be a cause for investors' concern. Consequently, the stock currently has a trailing 12-month Price/Earnings ratio of 28.85. The company's Price/Earnings ratio has been above the industry's Price/Earnings ratio of 12.00 in the past year.
- ▼ In recent times, the company has been facing increasing competition from entrepreneurs such as SpaceX and Blue Origin, which are in the process of developing liquid fuel propulsion capabilities and primarily focused on the development of space propulsion systems for heavy lift launch vehicles. These new entrepreneurs are trying to compete primarily on price front, thus weighing on the existing cost paradigms and Aerojet's manufacturing methodologies. Such intensifying competition may cause Aerojet to lose a contract or more, which in turn might hurt its top-line performance.
- ▼ In January 2020, the Trump administration announced plans to expand its existing tariffs on imports of steel and aluminum, stating that from Feb 8, steel and aluminum derivatives will also come under the tariff mandate. This tariff expansion is expected to deal a heavy blow to the U.S. aerospace and defense industry, which relies heavily on imported aluminum. In 2018, when the initial tariff was imposed, the AIA had expressed concern by saying that such a tariff will raise cost and disrupt the supply chain. Now that tariffs are being imposed on derivatives as well, growth prospects for aerospace and defense equipment stocks like Aerojet seem bleak.

**Intensified competition and unfavorable valuation poses major risk for Aerojet Rocketdyne**

## Last Earnings Report

### Aerojet Rocketdyne Q2 Earnings Surpass Estimates

Aerojet Rocketdyne Holdings reported second-quarter 2020 adjusted earnings of 47 cents per share, which surpassed the Zacks Consensus Estimate of 43 cents by 9.3%. However, the bottom line declined 8% year over year.

Barring one-time adjustments, the company reported GAAP earnings of 47 cents per share, reflecting a decline of 1.9% from 54 cents recorded in the prior-year quarter.

Quarter Ending **06/2020**

Report Date	Jul 27, 2020
Sales Surprise	2.27%
EPS Surprise	9.30%
Quarterly EPS	0.47
Annual EPS (TTM)	1.49

### Operational Performance

Aerojet Rocketdyne's second-quarter revenues of \$512.4 million came in 5.6% higher than the year-ago quarter's \$485 million. The top line also exceeded the Zacks Consensus Estimate of \$501 million by 2.3%. The increase in net sales was primarily driven by the Guided Multiple Launch Rocket System (GMLRS) and the Medium Range Ballistic Missile (MRBM) programs.

Total backlog at the end of second-quarter 2020 was \$6.8 billion compared with \$5.4 billion as of Dec 31, 2019. Of this, funded backlog amounted to \$3.2 billion compared with \$2.1 billion at 2019-end.

Total operating expenses increased 7.1% year over year to \$443.4 million in the second quarter. Meanwhile, operating income of \$69 million fell 3% from \$71.1 million a year ago.

### Segmental Performance

**Aerospace & Defense:** Revenues at this segment improved 6% year over year to \$511.9 million.

**Real Estate:** The segment generated revenues of \$0.5 million compared with the year-ago quarter's figure of \$1.9 million.

### Financial Update

Aerojet Rocketdyne exited the second quarter with cash and cash equivalents of \$1,003.9 million, up from \$932.6 million as of Dec 31, 2019.

Long-term debt amounted to \$338.4 million as of Jun 30, 2020, down from \$352.3 million as of Dec 31, 2019.

Operating cash inflow from continuing operations summed \$127.6 million as of Jun 30, 2020, compared with \$31.2 million in the year-ago period.

Free cash flow at the end of the first six months of 2020 was \$111.4 million compared with \$24.3 million a year ago.

## Recent News

On **June 22, 2020**, Aerojet Rocketdyne delivered the 600th Boost Motor and the 600th Divert and Attitude Control System (DACS) for the Terminal High Altitude Area Defense (THAAD) weapon system, one of the nation's primary defenses against short-, medium-, and intermediate-range missiles.

## Valuation

Aerojet Rocketdyne's shares are down 9.7% in the year-to-date period and 14.6% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Aerospace sector are down 45% and 32.1% in the year to date period, respectively. Over the past year, the Zacks sub-industry and sector are down 38.8% and 29.8%, respectively.

The S&P 500 index is up 1.6% in the year to date period and 15.4% in the past year.

The stock is currently trading at 22.3X forward 12-month earnings, which compares to 22.3X for the Zacks sub-industry, 20.4X for the Zacks sector and 22.6X for the S&P 500 index.

Over the past five years, the stock has traded as high as 37.1X and as low as 15.5X, with a 5-year median of 23.7X. Our Underperform recommendation indicates that the stock will perform worse than the market. Our \$44 price target reflects 23.8X earnings value.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	B
Momentum Score	A
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
