Summary

Shares of Allegiant have plunged 55.4% since the beginning of the year due to the drop in leisure travel demand in the wake of the coronavirus outbreak. With demand drooping massively, the company's March revenues declined around 36%. Moreover, for April and May, the company expects capacity to decline 80-90%. With travel demand likely to be significantly low in the usually busy summer season, Allegiant's top line might take a beating. Amid this downturn, low fuel prices are expected to partly offset the adversity and aid the bottom line in turn. The carrier is also taking substantial cost-cutting measures, such as freezing hiring and suspending construction of Florida resort. Due to the ongoing economic crunch, it suspended dividend payments and buyback activities as well. Its high debt levels are worrisome too.

Overview

Allegiant Travel Company, based in Las Vegas, NV, was founded in 1997. The company, through its subsidiary Allegiant Air LLC, operates a low-cost passenger airline. It focuses on linking leisure travelers in small and medium sized cities to world-class leisure destinations.

At 2019-end, the company which competes with the likes of Southwest Airlines, JetBlue Airlines and Spirit Airlines in the low-cost space, provides services on 466 routes across 97 origination cities and 27 leisure destinations, simultaneously covering 43 states and Puerto Rico.

Apart from air travel, the company offers vacation deals including car rentals and hotel bookings. Allegiant is making constant efforts to modernize its fleet. As of Dec 31, 2019, the company's operating fleet consisted of 54 A320 and 37 A-319 jets.

The company focusses on unbundling its air-related products and services like baggage fees, advance seat assignment among others. Allegiant, which also offers air transportation through fixed fee flight arrangements, focuses on generating significant additional ancillary revenues thanks to its unique business model.

By focusing on leisure travelers only, this unique business model enables the company to avoid heavy costs of serving a variety of customers. In order to reduce costs, Allegiant usually purchases used aircraft with useful remaining years. Additionally, this non-traditional approach also brings down distribution-related expenses.

The company also attracts customers by offering third party travel products like hotel rooms and ground transportation. The company also generates revenues by temporarily functioning as a lessor to acquire aircraft and/or engines. Unlike many other carriers, Allegiant does not offer connecting flights. It also does not have frequent flier agreements.

The company reported a 10.4% year over year increase in operating revenues to \$1,841 million in 2019. The uptick was driven by a 9.7% increase in passenger revenues. Passenger revenues accounted for 91.4% of the top line in 2019.

Revenues from third-party products increased 20.6% year over year and contributed 3.8% to the top line in 2019. Fixed fee contract revenues, increased 29.4% and contributed 3.5%. Other sources of revenues accounted for the balance. Notably, the company's fiscal year coincides with the calendar year.

Reasons To Buy:

▲ Even though Allegiant suspended buybacks and dividends due to the present crisis, we note that the company had an impressive record of dividend payments and share repurchases prior to the outbreak. Additionally, the company's performance on the punctuality front is impressive.

The current scenario of low fuel costs is a positive for the company.

▲ The current scenario of low fuel costs is a positive for the company. Evidently, average fuel cost per gallon (scheduled) declined 12.2% to \$1.87 in the March-end quarter. Low fuel costs should partly offset the turbulence due to the extremely low-demand scenario.

▲ We are also impressed by the company's efforts to modernize its fleet. The carrier operates an all-Airbus fleet. Allegiant's fleet-size at the end of 2019 was 91 (37 A319 and 54 A320), indicating an increase from 2018's reported figure. The transition to an all-Airbus fleet, completed in November 2018, increased Allegiant's fuel efficiency.

Reasons To Sell:

- ▼ The coronavirus pandemic is taking a toll on Allegiant. With air-travel demand for leisure spiraling down to an unprecedented level, the company's March quarter revenues declined 9.4% year over year on the back of 9.8% fall in passenger revenue. Capacity at the end of first quarter was up 4.3% year on year. Load factor tanked 1010 basis points as capacity expansion surpassed traffic plunge. Additionally, for April and May, the company expects capacity to decline 80-90% year over year. The carrier will also trim its summer schedule. Travel demand is likely to be significantly low in the usually busy summer season.
- ▼ The Zacks Consensus Estimate for current-year earnings being revised downward over the past 60 days. Particularly, due to coronavirus-induced low demand, shares of the company have slumped 55.4% since the beginning of 2020. With the crisis showing no signs of fading, the stock price may depreciate further, dampening investor confidence in the stock
- ▼ Allegiant's liquidity position is bland. The carrier exited the first quarter with cash and equivalents of \$138.4 million, compared with \$121.9 million at the end of fourth quarter 2019. In fact, the cash balance at the end of first-quarter 2020 is far less than the total debt levels of \$1488 million. This implies that the company doesn't have enough cash to meet its total debt burden.

Allegiant's high debt levels and woes related to coronavirus are quite concerning.

Last Earnings Report

Allegiant Beats on Q1 Earnings

Allegiant reported first-quarter 2020 earnings (excluding \$4.13 from non-recurring items) of \$2.05 per share, which surpassed the Zacks Consensus Estimate of 58 cents per share. However, the bottom line fell 48.5% year over year due to lower revenues stemming from falling demand for air travel. Quarterly revenues came in at \$409.2 million, which beat the Zacks Consensus Estimate of \$408.3 million. However, the top line declined 9.39% year over year on the back of a 9.8% fall in passenger revenues.

Notably, quarterly earnings (airline operations adjusted for tax) fell to \$1.89 per share.

Quarter in Details

Air traffic (measured in revenue passenger miles or RPMs) for scheduled service fell 8.3% in the quarter under review. Capacity (measured in available seat miles or ASMs) increased 4.3% year over year. Load factor (percentage of seats filled by passengers) was 73.8%, down 1010 basis points as capacity expanded while traffic declined.

Airline operating cost per available seat miles (CASM) excluding fuel rose 1.7% year over year. Average fuel cost per gallon (scheduled) declined 12.2% to \$1.87 in the quarter. Moreover, total scheduled service passenger revenue per available seat miles (TRASM) fell 13.4% to 9.96 cents.

The company has suspended all share repurchase and dividends payouts due to the uncertain economic conditions stemming from the pandemic.

Quarter Ending **03/2020**

Report Date	May 12, 2020
Sales Surprise	0.22%
EPS Surprise	253.45%
Quarterly EPS	2.05
Annual EPS (TTM)	12.80

Recent News

March Traffic – Apr 15, 2020

Traffic for scheduled service, measured in revenue passenger miles (RPMs), plunged 39.4% on a year-over-year basis in March. Scheduled capacity, calculated in available seat miles (ASMs), also declined 12.2%. With traffic declining more than the contraction in capacity, load factor (or percentage of seats filled by passengers) deteriorated 2,670 basis points (bps) year over year to 59.4%.

The number of departures for scheduled service decreased 13.3%. The average stage length (average distance flown per aircraft departure) was flat at 914 miles in the same month. For the total system (including scheduled service and fixed fee contract), the number of departures declined 14% while the average stage length was unaltered.

Valuation

Allegiant's shares are down 57.3% and 48.5% in the year-to-date period and over the trailing 12-month period respectively. Stocks in the Zacks sub-industry and the Zacks Transportation sector are down 62.5% and 28.2% in the year-to-date period respectively. Over the past year, the Zacks sub-industry and the sector are down 59.4% and 26.2% respectively.

The S&P 500 index is down 12.4% and 2.3% in the year-to-date period and in the past year, respectively.

The stock is currently trading at 5.05X trailing 12-month price to earnings, which compares to 6.72X for the Zacks sub-industry, 12.99X for the Zacks sector and 18.29X for the S&P 500 index.

Over the past five years, the stock has traded as high as 24.5X and as low as 4.5X, with a 5-year median of 12.66X. Our Neutral recommendation indicates that the stock will perform in line the market. Our \$79 price target reflects 5.36X trailing 12-month earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	B
Momentum Score	F
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
