Summary

Shares of Affiliated Managers have underperformed the industry so far this year. The company's earnings have surpassed the Zacks Consensus Estimate in each of the trailing four quarters. In second-quarter 2020, it recorded a decline in revenues and lower assets under management (AUM) balance. Persistently declining AUM balance, owing to outflows and pressure on revenues, are major near-term concerns. These are expected to hurt the company's profitability in the quarters ahead. The presence of substantial intangible assets on its balance sheet might hamper financials. Nevertheless, the company is well-poised for growth, backed by successful partnerships, diverse product mix, strong balance sheet position and focus on strengthening the retail market operations. Further, the BlueMountain stake sale is likely to be accretive to earnings.

Overview

Headquartered in Massachusetts, Affiliated Managers Group is a global asset manager with equity investments in a large group of investment management firms or affiliates.

On the whole, the affiliates manage more than 500 investment products across each major product category – global, international and emerging markets equities, domestic equities, alternative and fixed income products. As of Jun 30, 2020, Affiliated Managers had total AUM of \$638.4 billion.

The company operates its business through three principal distribution channels:

- Institutional:** Through affiliates, this channel manages assets for large institutional investors worldwide, including sovereign wealth funds, foundations, endowments and retirement plans for corporations and municipalities. Moreover, affiliates manage assets for non-U.S. clients in more than 50 countries. AUM acquired through the channel was \$364.9 billion as of Jun 30, 2020.
- Retail:** Through this channel, the company provides advisory or sub-advisory services to mutual funds and other retail-oriented products, which are distributed to retail and institutional clients directly and through intermediaries. AUM acquired through the channel was \$161.8 billion as of Jun 30, 2020.
- High Net Worth:** Through affiliates, the company offers advisory services to ultra-high net worth individuals, families and charitable foundations. Direct services to these clients include customized investment counseling, investment management and fiduciary services. Further, it provides advisory services to high net worth individuals through managed account relationships with intermediaries and provides enhanced managed account distribution and administration capabilities to individual managed account clients through AMG Funds. AUM acquired through the channel was \$111.7 billion as of Jun 30, 2020.

Reasons To Buy:

▲ Affiliated Managers with its strong balance sheet and liquidity position has considerable capability to invest in other companies and is expected to continue generating meaningful growth through new investments. The company is targeting investments in alternatives and global strategies, given the strong preference of investors for the same. In June 2020, it announced that it will become a minority equity partner to Inclusive Capital Partners. In February 2020, it acquired a minority equity interest in Comvest Partners, while in July 2019, it had acquired an equity interest in Garda Capital Partners. Besides, in October 2019, the company had divested its stake in BlueMountain, which will likely be accretive to earnings. Despite the current crisis owing to the coronavirus pandemic, rising demand for equity and alternative strategies among institutional clients are expected to aid the company's profitability, going forward.

Affiliated Managers is well positioned for growth on successful partnerships, global distribution capability and a robust balance sheet position. Its capital deployment activities are sustainable.

▲ Though Affiliated Managers lowered quarterly dividends, it has a steady capital deployment plan in place. In the third quarter of 2020, the company expects to repurchase \$50 million worth of shares, similar to the second quarter. Given a robust capital position and lower dividend payout ratio than peers, it is expected to sustain capital-deployment activities, thereby, continuing to enhance shareholder value.

▲ Affiliated Managers' trailing 12-month return on equity (ROE) reflects its superiority in terms of utilizing shareholders' funds. The company's ROE of 18.94% compares favorably with 12.39% for the industry and 14.99% for the S&P 500.

▲ Shares of Affiliated Managers have underperformed the industry so far this year. Nevertheless, the company's earnings estimates for the current year have moved 1.4% upward over the past 30 days. Moreover, the stock seems undervalued when compared with the broader industry. Its current price-to-book (P/B) and price-earnings (P/E) (F1) ratios are lower than the respective industry averages. Also, it has a Value Score of B. Given the strength in fundamentals and positive estimate revisions, the price performance is expected to improve in the near term.

Reasons To Sell:

- ▼ Though Affiliated Managers' revenues improved in 2017 and 2018 on the back of solid performance of affiliates and strong equity markets, the company has been facing revenue pressure of late. Its revenues declined 5.8% in 2019 amid a challenging operating backdrop and significant market volatility, with the continuation of the same trend in the first half of 2020. Despite the company's portfolio of investment products, which provides it a competitive edge when it comes to fulfilling diverse needs of clients, the downward trend in revenues is likely to continue in the near term, owing to the coronavirus outbreak-related crisis.
- ▼ Also, Affiliated Managers' affiliates have been witnessing a steady increase in net outflows over the past several months. In 2019, net client cash outflows were \$53.5 billion, which resulted in a decline in AUM balance. Likewise, outflows continued in the first six months of 2020, which resulted in a further plunge in the AUM balance on a year-over-year basis. Though the company's differentiated product categories will likely support cash flows across the channels, a challenging operating backdrop is expected to keep investors on the sidelines in the near term.
- ▼ As of Jun 30, 2020, Affiliated Managers had total debt worth \$2.04 billion, marginally down from the end of the prior quarter. However, total debt was significantly higher than the cash and cash equivalents balance of \$681.6 million. Moreover, the company's second-quarter 2020 times-interest-earned ratio of 5.9X declined sequentially and has remained volatile over the past several quarters. Thus, in addition to being highly leveraged, the company earnings position does not seem sufficient enough to be able to meet debt obligations in the near term if the economic situation worsens.
- ▼ Intangible assets form a substantial portion of Affiliated Managers' balance sheet. These intangible assets are subject to annual impairment reviews. As of Jun 30, 2020, intangible assets (goodwill and acquired client relationships) constituted 49.1% of total assets. Several factors may initiate the impairment of the book value of such assets, due to which the value of these assets may have to be written down. This will adversely affect the company's financials.

Pressure on revenues owing to substantial outflows and decline in the assets balance will hurt Affiliated Managers' prospects. Presence of intangible assets on its balance sheet is a key concern.

Last Earnings Report

Affiliated Managers' Q2 Earnings Top Estimates, Revenues Fall Y/Y

Affiliated Managers' second-quarter 2020 economic earnings of \$2.74 per share surpassed the Zacks Consensus Estimate of \$2.70. However, the bottom line declined 17.7% year over year.

Results reflected lower operating expenses and a robust liquidity position. However, lower revenues, fall in AUM balance and decline in adjusted earnings before interest, taxes, depreciation and amortization (EBITDA) were headwinds.

Economic net income was \$129.6 million, down 23.8% from the prior-year quarter.

Revenues & AUM Down, Expenses Fall

Total revenues fell 20.4% year over year to \$471.1 million. However, the top line beat the Zacks Consensus Estimate of \$464 million.

Adjusted EBITDA was \$162.1 million, down 26.1% from the year-ago quarter.

Total expenses decreased nearly 1% from the prior-year quarter to \$409.6 million. Decline in compensation and related expenses, and selling, general and administrative costs primarily led to the fall.

As of Jun 30, 2020, total AUM was \$638.4 billion, down 17.3% year over year. Net client cash outflows of \$18.2 billion hurt AUM.

Capital & Liquidity Position Decent

As of Jun 30, 2020, Affiliated Managers had \$681.6 million in cash and cash equivalents compared with \$539.6 million on Dec 31, 2019. The company had \$2 billion of debt, up 13.9% from the Dec 31, 2019 level.

Shareholders' equity as of Jun 30, 2020 was \$2.9 billion, on par with the Dec 31, 2019 level.

Share Repurchase Update

During the quarter, the company repurchased shares worth \$50 million.

Third-Quarter 2020 Outlook

Management expects adjusted EBITDA of \$170-\$175 million. Performance fee is anticipated to be seasonally lower in the range of \$1-\$5 million.

Interest expenses are expected to be \$23 million, suggesting 4.5% increase from the prior quarter level. The company's share of reported amortization and impairments are expected to be \$50 million, down 41.9% sequentially.

Adjusted weighted average share count is estimated to be \$46.5 million.

GAAP tax rate is expected to be 25%. Additionally, cash tax rate is expected to be 18%.

Intangible-related deferred taxes are expected to be \$6 million. Other economic items are anticipated to be \$1 million.

Recent News

Affiliated Managers Partners With Inclusive Capital - Jun 23, 2020

Affiliated Managers announced its plans of becoming a minority equity partner to the recently founded San Francisco-based independent investment firm, Inclusive Capital Partners. Notably, Inclusive Capital Partners was launched, following the completion of ValueAct Capital Management's long-term succession plan, established in 2007.

ValueAct Capital Management is a longtime affiliate of Affiliated Managers. Its founder, Jeffrey W. Ubben, will retire from ValueAct Capital and continue to manage the ValueAct Spring Fund after he transitions to Inclusive Capital Partners.

Affiliated Managers' president and CEO, Jay C. Horgen, stated, "The success of this generational transition has enabled ValueAct founder Jeff Ubben to retire and launch Inclusive Capital Partners, which will focus on the important mission of allocating capital to corporate leaders who prioritize long-term responsible decision-making. AMG's investment in ValueAct was the first investment I led upon joining AMG, which has now come full-circle."

He added, "Long-term sustainability has been at the very heart of AMG's business strategy since inception, in working closely with Affiliates to design and implement management succession over time and support Affiliate growth initiatives. We are very pleased with the excellent execution of ValueAct's succession plan over the past decade, which has resulted in the successful transition from the founding generation to a truly outstanding next generation of partners, led by CEO Mason Morfit, and we are highly confident in ValueAct's forward prospects."

In fact, Mr. Ubben said, "Inclusive Capital Partners will seek to demonstrate that high returns should accrue to businesses that responsibly and creatively address environmental and societal problems by using sustainable business models, and we have partnered with stakeholders who we believe are world pioneers in wildlife, conservation, governance, and social equality to help encourage companies to embrace these principles. I am thrilled to announce the formation of Inclusive Capital Partners as the next iteration of my investing career."

Dividend Update

On Jul 27, Affiliated Managers announced a quarterly dividend of 1 cent per share. The dividend will be paid out on Aug 20 to shareholders of record on Aug 6.

Valuation

Affiliated Managers' shares are down 19.2% in the year-to-date period and 17.3% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Finance sector are down 1.3% and 17.1% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry is up 6.5% while the sector is down 10.4%.

The S&P 500 index is up 1.3% in the year-to-date period and 10.8% in the past year.

The stock is currently trading at 5.48X forward 12 months earnings, which compares to 12.97X for the Zacks sub-industry, 16.35X for the Zacks sector and 22.69X for the S&P 500 Index.

Over the past five years, the stock has traded as high as 14.58X and as low as 3.27X, with a 5-year median of 9.74X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$72 price target reflects 5.76X forward earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	F
Momentum Score	A
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
