As of Dec 31 2019, the company owns and operates 29 properties, offering 1.77 million square feet of casino space, 36,977 slot machines, 809 table games and 11,090 hotel rooms. It also has 320 food and beverage outlets.

Boyd Gaming reports its operating results under the following segment:

**Las Vegas Locals** (26.6% of first-quarter 2020 revenues): This segment consists of nine casinos and mainly targets the people of Las Vegas metropolitan area. The segment competes directly with other locals casinos and gaming companies.

**Downtown Las Vegas** (7.9%): This segment consists of three casinos, which competes with eight other casinos in the area.

**Midwest and South** (65.5%): The segment has four land-based casinos, six dockside riverboat casinos, three racinos and four barge-based casinos. These casinos operate in nine states in the Midwest and southern United States.

During 2019, Boyd Gaming completed several transactions to improve its long-term financial position. In the fourth quarter of 2019, the company issued \$1 billion aggregate principal amount due December 2027. The proceeds from the debt issuance were used to finance the redemption of all of its outstanding 6.875% senior notes due 2023 and prepay a portion of Refinancing Term B Loans.

One of the notable initiatives by Boyd Gaming has been regarding the legalization of sports gambling. In July 2018, the company entered a partnership with MGM Resorts International, under which the companies have the opportunity to offer online and mobile gaming platforms, including sports betting, casino gaming and poker.

In 2018, Boyd Gaming opened sports books at its two Mississippi properties, IP Casino Resort Spa ("IP") in Biloxi, and Sam's Town Hotel & Gambling Hall in Tunica. It also entered a partnership with FanDuel Group to pursue sports betting and online gaming opportunities across the United States.

## Reasons To Buy:

▲ **Portfolio Expansion & Acquisitions to Drive Growth:** Boyd Gaming continues to expand its portfolio by strengthening current operations and growing through capital investment as well as other strategic measures. The company extensively depends on acquisitions as a strategy to expand its brand presence. Earlier, it entered an agreement with Penn National Gaming to acquire the operations of Ameristar St. Charles; Ameristar Kansas City; Belterra Casino Resort in Florence, IN; and Belterra Park in Cincinnati, OH. Notably in 2019, the company benefitted from the acquisitions of Latner (on Jun 1, 2018), Valley Forge (Sep 17, 2018) and Ameristar Kansas City, Ameristar St. Charles, Belterra Resort and Belterra Park (Oct 15, 2018).

Boyd Gaming is poised to benefit from portfolio expansion, acquisitions and increased focus on online betting.

▲ **Increased Focus On Online Betting Bodes Well:** Meanwhile, Boyd Gaming has also been undertaking efforts to expand online betting offerings. One of the notable initiatives by the company has been regarding the legalization of sports gambling. During the third quarter 2019, the company partnered with FanDuel Group and opened sports books at Blue Chip, Belterra Resort, Diamond Jo Dubuque and Diamond Jo Worth properties in the Midwest. It also introduced a market-leading mobile app in Pennsylvania. Moreover, courtesy of its performance in Pennsylvania and New Jersey, FanDuel launched its mobile betting app in the state of Indiana. In July 2018, it entered a partnership with MGM Resorts International, under which the companies have the opportunity to offer online and mobile gaming platforms, including sports betting, casino gaming and poker in jurisdictions, where they have physical casino resorts and online licenses. In 2018, Boyd Gaming also opened sports books at its two Mississippi properties, IP Casino Resort Spa ("IP") in Biloxi, and Sam's Town Hotel & Gambling Hall in Tunica.

▲ **Local Markets to Drive Growth:** Post the coronavirus-induced shutdowns, increased traffic from local and regional customer base is likely to benefit the company. Notably, the company considers the local market in Las Vegas to be a major driver for its portfolios. With restaurants and bars open, frequent visitation of locals is likely to drive growth for the company.

▲ **Enough Liquidity to Tide Over COVID-19 Pandemic:** At the end of the first quarter, Boyd Gaming had cash and cash equivalents of \$831.2 million, significantly up from \$250 million at fiscal 2019-end. The increase was primarily due to the borrowing of \$660 million under its Revolving Credit Facility and an additional \$10 million under the Swing Loan facility of the Credit Facility. Notably, the initiative was in line with the company's motive to increase cash and preserve financial flexibility. Nonetheless, with cash burn standing at \$60 million per month, the company expects to fund operations with available cash over the next 12 months. Moreover, at the end of first-quarter 2020, the company had total debt-to-capital ratio of 0.8, which indicates manageable debt levels.

## Reasons To Sell:

- ▼ **Coronavirus Likely to Hurt 2020 Results:** Boyd Gaming's financials in 2020 are likely to be impacted by the outbreak of coronavirus. To contain the spread of the virus, the company shut operations in each of its 29 properties. Since the severity and duration of the outbreak's impact on its business cannot be estimated at present, the company has not only suspended its share repurchase programs but has also withdrawn its 2020 guidance.
- ▼ **High Cost a Concern:** Despite having several margin-improvement initiatives in place, Boyd Gaming is grappling with escalating expenses across gaming, food and beverage, room, and other offerings. Costs in the coming quarters are likely to shoot up due to the coronavirus-induced shutdowns.
- ▼ **Intense Competition Hurts:** Boyd Gaming is persistently facing intense competition from various casinos and hotel casinos. The company faces competition from not only gaming services but also from other non-gaming resorts and vacation destination. The company's operations, therefore, are facing heightened competition with new entries in the already high-supply market.
- ▼ **Dependence on Discretionary Spending:** The gambling industry is cyclical and a worsening of global economic conditions might in turn dent Boyd Gaming's revenues and profits. Consumer demand for services is closely linked to the performance of the general economy, and is sensitive to business and personal discretionary spending levels. Declines in consumer demand due to adverse general economic conditions, poor travel patterns, lower consumer confidence and high unemployment can lower the revenues and profitability of Boyd Gaming.

Boyd Gaming is persistently facing intense competition from various casinos and hotel casinos. Also coronavirus-related woes are pressing concerns.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	F
Momentum Score	D
VGM Score	D

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
