## Summary

Shares of Credit Acceptance have outperformed the industry so far this year. Its earnings surpassed the Zacks Consensus Estimate in one and lagged in three of the trailing four quarters. Its second-quarter 2020 results were aided by a rise in revenues and lower costs. Increase in finance charges, driven by a rise in demand for consumer loans, is expected to support profitability. Improvement in dealer enrollments and active dealers (despite tough competition) is a positive for the company, which is expected to further support revenues. Its steady capital deployment activities are commendable. However, elevated operating expenses, owing to an increase in compensation and marketing costs, will likely hurt the bottom line to an extent. Moreover, deteriorating credit quality and high levels of debt are other key concerns and might hamper financials.

## Overview

Headquartered in Southfield, MI, Credit Acceptance Corporation is a credit services company. The company, founded in 1972, operates through one segment. The segment primarily focuses on offering financing programs, and related products and services to automobile dealers in the United States enabling them to sell vehicles to consumers irrespective of their credit history.

Credit Acceptance offers financing programs through a country-wide network of automobile dealers. These dealers benefit from sales of vehicles to consumers who otherwise could not obtain financing; from repeat and referral sales generated by these same customers; and from sales to customers responding to advertisements for financing programs but actually end up qualifying for traditional financing.

Credit Acceptance has two loan programs:

- **Portfolio Program:** Under this, the company gives money to dealers (called Dealer Loans) in exchange for the right to service the underlying Consumer Loan.
- **Purchase Program:** Under this, the company buys Consumer Loans from the dealers (called Purchased Loan) and keeps all the money collected from the consumer.

Further, Credit Acceptance through its wholly-owned subsidiary, VSC Re Company, is engaged in the business of reinsuring coverage under vehicle service contracts sold to consumers by dealers on vehicles financed by the company.

As of Jun 30, 2020, Credit Acceptance had net loans receivable of \$6.75 billion, total assets of \$7.34 billion, cash and cash equivalents (including restricted cash) of \$391.2 million, and total stockholders' equity of \$2.07 billion.

---

## Reasons To Buy:

- ▲ Revenue growth remains a major positive for Credit Acceptance. The company's top line has witnessed a six-year (2014-2019) CAGR of 15.5%, with the uptrend continuing in the first six months of 2020. Growth is primarily attributable to steady rise in finance charges, which is also the main revenue component (accounting for 93% of total revenues in the first half of 2020). Despite the current economic crisis resulting from the coronavirus outbreak, finance charges are likely to continue improving supported by rise in demand for auto loans. A decent rise in dealer enrollments and active dealers is also expected to aid the company's top line.
- ▲ Credit Acceptance believes in returning capital to shareholders through stock repurchases instead of paying dividends. In March 2020, it authorized additional 3 million shares to be repurchased (in addition to the previous authorizations). As of Jun 30, 2020, the company had 3.1 million shares left to be repurchased. Despite having a substantial debt burden, its high cash flow generating business model and low capital expenditures are likely to help sustain share buybacks, going forward.
- ▲ Credit Acceptance's trailing 12-month return on equity ("ROE") reflects its superiority in terms of utilizing shareholders' funds. The company's ROE of 30.64% compares favorably with 13.95% for the industry.

Growth in revenues, primarily driven by increase in consumer loans along with a rise in dealer enrollments, remains a positive for Credit Acceptance. Its share buyback policy seems impressive.

---

## Reasons To Sell:

- ▼ Credit Acceptance has been witnessing a continuous increase in expenses over the past several years. Operating expenses have increased at a CAGR of 13.9% over the last six years (2014-2019). The increase has been mainly due to a rise in salaries and wages, and sales and marketing expenses. While operating expenses declined in the first half of 2020, the same is expected to remain elevated in the near term due to the company's continued efforts to hire additional team members and sales force.
- ▼ Credit Acceptance's asset quality has been deteriorating over the past few years. While provision for credit losses declined in 2018, the same witnessed a six-year (2014-2019) CAGR of 42.9%. Moreover, in the first six months of 2020, provisions increased significantly, owing to the coronavirus-related concerns. Given the rise in loan balances and the continued uncertainty related to the impact of the virus, provisions are expected to remain elevated in the near-term.
- ▼ As of Jun 30, 2020, Credit Acceptance had total debt worth \$4.80 billion, significantly higher than the cash and cash equivalents balance (including restricted cash and restricted securities) of \$459.1 million. Moreover, its times-interest-earned ratio of 3.2 for second-quarter 2020 declined sequentially. In fact, the ratio has been witnessing a declining trend over the past several quarters. Thus, given the company's significantly high debt burden, its current liquidity position might not be sufficient to meet debt obligations in the future if the economic situation worsens.
- ▼ Shares of Credit Acceptance have outperformed the industry so far this year. However, the company's current-year earnings estimates have been revised 3.5% lower over the past 30 days. Also, the stock seems overvalued when compared with the broader industry. Its current price-to-book and price-to-earnings (F1) ratios are higher than the respective industry averages. Given the concerns and downward estimate revisions, the stock has limited upside potential.

Continuously increasing operating expenses and deteriorating credit quality remain major concerns for Credit Acceptance. Its high levels of debt will likely hurt growth and hence make us apprehensive.

## Last Earnings Report

### Credit Acceptance Q2 Earnings Beat, Provisions Rise

Credit Acceptance reported second-quarter 2020 earnings of \$5.40 per share, beating the Zacks Consensus Estimate of \$4.65. The company recorded earnings of \$8.68 per share in the prior-year quarter. Notably, the figure includes certain non-recurring items.

Increase in revenues and lower operating expenses supported results. Moreover, the balance sheet remained strong during the second quarter. However, a significant increase in provisions remained a major headwind.

Excluding non-recurring items, net income (non-GAAP basis) was \$154.1 million or \$8.63 per share, down from \$162.9 million or \$8.60 per share in the prior-year quarter.

### GAAP Revenues Increase, Expenses Fall

Total revenues were \$406.3 million, up 9.6% year over year. The increase was largely driven by a rise in finance charges. Also, the figure beat the Zacks Consensus Estimate of \$372.7 million.

Operating expenses of \$81.6 million declined slightly from the prior-year quarter. Lower general and administrative attributed to the fall.

As of Jun 30, 2020, net loans receivable amounted to \$6.7 billion, up 2% from the prior quarter. Total assets were \$7.3 billion as of the same date, which increased 1.1% sequentially. Also, total stockholders' equity was \$2 billion, up 5% from the prior quarter.

### Credit Quality Deteriorates

Provision for credit losses surged substantially from the year-ago quarter to \$139.4 million. The rise was mainly due to the adoption of CECL on Jan 1, 2020, and the impact of a reduction in expected future cash flows from its loan portfolio.

Allowance for credit losses at the second-quarter end was \$3.4 billion, up significantly year over year.

Quarter Ending 06/2020

Report Date	Jul 30, 2020
Sales Surprise	9.01%
EPS Surprise	16.13%
Quarterly EPS	5.40
Annual EPS (TTM)	18.12

## Valuation

Credit Acceptance's shares are up 12.1% in the year-to-date period and 7.6% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Finance sector are down 31.5% and 17.9%, respectively, in the year-to-date period. Over the past year, the Zacks sub-industry and the sector are down 29.1% and 9.4%, respectively.

The S&P 500 index is up 2.6% in the year-to-date period and 15% in the past year.

The stock is currently trading at 33.29X forward 12 months earnings, which compares to 10.55X for the Zacks sub-industry, 16.33X for the Zacks sector and 22.58X for the S&P 500 index.

Over the past five years, the stock has traded as high as 33.29X and as low as 8.76X, with a 5-year median of 12.97X. Our Neutral recommendation indicates that the stock will perform in line with the market. Our \$520 price target reflects 34.90X forward earnings.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	D
Momentum Score	C
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
