### Summary

Cardinal Health's Pharmaceutical segment witnessed solid growth in Pharmaceutical Distribution and Specialty Solutions customers. Moreover, the Medical segment exhibited a solid performance in the quarter under review. Apart from these, the company's extension of agreements with CVS Health, collaboration with PANTHERx Specialty Pharmacy and buyout of mscrisps buoy optimism. The company reaffirmed fiscal year 2020 outlook, which instills investor optimism. Cardinal Health exited the fiscal third quarter on a strong note, wherein both earnings and revenues outpaced the consensus mark. Shares of Cardinal Health outperformed the industry in a year's time. However, contraction in gross margin remains a woe. Intense competition and customer concentration are other concerns.

## Overview

Headquartered in Dublin, OH, Cardinal Health Inc. is a nation-wide drug distributor and provider of services to pharmacies, healthcare providers and manufacturers. The company has two reporting segments – Pharmaceutical and Medical.

The Pharmaceutical segment is the second largest pharmaceutical distributor in the United States and the largest nuclear pharmacy. Its products and services include pharmaceutical distribution, manufacturer and specialty services, and nuclear and pharmacy services. This segment also offers “specialty pharmaceutical products and services”, which supplies (1) oncology, rheumatology, urology and other pharmaceutical products to physician offices; (2) human plasma products and specialty pharmaceutical products to hospitals and other healthcare providers; (3) consulting and other services to pharmaceutical manufacturers, third party payors and healthcare providers.

The Medical segment manufactures products such as single-use surgical drapes, gowns and apparel; exam and surgical gloves; and fluid suction and collection systems and offers sterile and non-sterile procedure kits. These products are sold directly or distributed via third-party sources in the U.S., Canada, Europe, South America and the Asia/Pacific.

### FY19 at a Glance

In fiscal 2019, Cardinal Health registered adjusted earnings of \$5.28 per share, up 5.6% on a year-over-year basis. Revenues increased 6.4% on a year-over-year basis to a record \$145.53 billion. Delving deeper into the segmental revenue details, Pharmaceutical (89.3% of net revenues) increased 7.2% to \$129.92 billion in fiscal 2019. Medical revenues (10.7% of net revenues) rose 0.3% on a year-over-year basis to \$15.63 billion.

### Important Acquisitions & Divestments

On Feb 1, 2018, Cardinal Health announced the divestiture of its Cardinal Health China business to Shanghai Pharmaceuticals Holding Co., Ltd. for \$1.2 billion.

## Reasons To Buy:

- ▲ **Share Price Movement:** Over the past year, shares of Cardinal Health gained 19%, against the industry's decline of 14.5%. Pharmaceutical segment, broad product portfolio and prudent acquisitions continue to favor the stock.
- ▲ **Cost Savings:** In terms of costs, Cardinal Health announced in fourth-quarter fiscal 2019 earnings call that it anticipates incremental cost savings of \$130 million associated with actions intended to optimize and simplify its operating model and cost structure. In the fiscal first quarter, the company reaffirmed the same. The company is expected that the benefits from this and additional actions will continue to improve through the balance of 2020. This is likely to aid the company's margins in the days ahead.
- ▲ **Pharmaceutical Segment to Drive Growth:** Cardinal Health's Pharmaceutical segment is the second largest pharmaceutical distributor in the United States. The segment's products and services comprise pharmaceutical distribution, manufacturer and specialty services, and nuclear and pharmacy services, which are expected to majorly drive the quarters ahead. In the fiscal third quarter, pharmaceutical revenues improved 11.9% to \$35.11 billion on a year-over-year basis. The upside can be attributed to sales growth from Pharmaceutical Distribution and Specialty Solutions customers.

Cardinal Health's diversified portfolio represent significant long-term opportunities. Further, the company follows an acquisition-driven strategy.

However, it is important to mention Cardinal Health anticipates a substantial net negative impact on this segment's performance in the fiscal fourth quarter primarily due to decline in volume associated with the cancellation or deferral of elective medical procedures.

- ▲ **Diversified Product Portfolio:** Cardinal Health's Medical and Pharmaceutical offerings provide the company with a competitive edge in the niche space. The company offers industry expertise and an expanding portfolio of safe products. For example, Cardinal Health's Bathroom Safety, Mobility, and Exam Room Equipment products are exclusively designed for both patients and care givers. With a variety of products ranging from wheelchairs and crutches to exam room tables and commodes, Cardinal Health offers the right mix of medical equipment. Cardinal Health's ECG Monitoring Electrodes offer quality performance and are neoprene-free, lead-free and mercury-free. These are not made with natural rubber latex, and are highly exclusive in the markets.

Per management, for the fiscal year 2019, Specialty business finished strongly around \$19 billion in sales, driven by uniqueness of its product profile. Specialty once again delivered excellent revenues and profits on the back of higher volumes and mix in the fiscal second quarter. Management continues to expect this business to sustain growth.

In April 2019, Cardinal Health Specialty Solutions announced collaboration with PANTHERx Specialty Pharmacy that has been created to cater to growing needs of the market and bolster its cell and gene therapy ability.

- ▲ **Acquisition Drives Growth:** Cardinal Health follows an acquisition-driven strategy and continues to focus on investment in key growth businesses to gain market traction and boost profits. In recent past, Clayton, Dubilier & Rice and Cardinal Health jointly invested in Brentwood, Tennessee-based naviHealth. Cardinal Health sold a 55 percent stake in naviHealth to the New York City-based private equity firm Clayton Dubilier & Rice (CD&R). naviHealth has always been a strong performer for Cardinal Health. Management at Cardinal Health announced that the company is likely to have a competitive edge in the MedTech space with CD&R as a partner.

In April 2019, Cardinal Health acquired mscripts, a company that specializes in delivering patient adherence and engagement solutions via an innovative, user-friendly mobile and web-based health management platform.

- ▲ **Cushioned Against Macroeconomic Sluggishness:** Large-cap, diversified healthcare distributors such as Cardinal Health are relatively insulated from macroeconomic uncertainty and a weak economy. Cardinal Health is one of the largest distributors of pharmaceuticals and medical supplies. It has a diversified product portfolio, which is a hedge against the risk of sales shortfall in testing times. In fiscal 2019, Cardinal Health's focused on taking the necessary steps to address the changing industry dynamics to position the pharma distribution business for a long-term growth.

The company's generics business continues to show healthy growth, supported by a solid customer base, significant scale of operation and the competence to source products from a complex and global supply network. Cardinal Health has rationalized the number of generic suppliers. In addition, the company has expanded relationships with generic manufacturers that include several benefits like higher service levels, greater clarity on generic cost of goods sold, and a more consistent product supply with fewer disruptions.

- ▲ **Long-term Supply Agreements Buoy Optimism:** Cardinal Health is also pursuing growth via joint ventures and long-term supply agreements with several firms. The company entered a long-term strategic agreement with Henry Schein, under which the latter purchased Cardinal Health's medical supplies for physician practices. The collaboration is expected to drive core sales and prove accretive to Cardinal Health's earnings in the long term.

Fred's Inc. also signed a multi-year agreement for Cardinal Health to be the primary supplier of branded and generic pharmaceutical products to all of Fred's more than 360 in-store pharmacies and EIRIS Health Services in the United States in the past.

The signing of a 15-year agreement with Bayer Healthcare for the contract manufacturing of Xofigo is significantly positive. In our opinion, this will help the company leverage its expertise in the nuclear pharmacy industry to expand access to a therapeutic agent and increase the use of radiopharmaceuticals in the U.S. and Canada. The Red Oak Sourcing joint venture with CVS Health, which will negotiate generic pharmaceutical supply contracts on behalf of both companies, also holds significant long-term prospects for Cardinal Health. Cardinal Health extended agreements with CVS Health to distribute pharmaceuticals to retail pharmacies and distribution centers through Jun 30, 2023. In fact, with the recent renewals of CVS Health and Kroger, Cardinal Health now has contracts with three of its largest customers for the next four years.

- ▲ **Good Client Retention:** The performance of Cardinal Health's Pharmaceutical segment has been facilitated by good client retention, with the loss of only a few key customers (Walgreens and Express Scripts). Cardinal Health has already renewed many of its chain customer

---

contracts for subsequent years. The concentration of suppliers has also been well managed by the company. At the end of third-quarter fiscal 2019, management at Cardinal Health confirmed that its new platforms like at-Home distribution services have witnessed solid client uptake with double digit growth in the quarter. Moreover, both at-Home distribution services, and national brand and services exhibited a solid performance in the fiscal first quarter.

▲ **Strong Liquidity Position:** Cardinal Health exited the fiscal third quarter with cash and cash equivalents of \$2.33 billion, compared with \$2.53 billion in the previous quarter. Meanwhile long-term debt came up to \$6.75 billion, a slight decline from the \$7.58 billion sequentially. The long-term debt level is significantly higher than the quarter's cash and cash equivalent level. However, we can see that the current debt level of \$508 million in the quarter, up from \$452 million sequentially, is in fact much lower than the short-term cash level. This is good news in terms of the company's solvency level as, at least during the year of economic downturn, the company has sufficient cash for debt repayment.

Moreover, the company has robust cash flow trends. Cumulative cash from operating activities totaled \$1.68 billion at end of the fiscal third quarter, compared with \$1.48 billion in the year-ago quarter. Per management, the company is on track to lower outstanding long-term debt by at least \$1 billion in fiscal 2020. In terms of dividend, the company's board recently approved an increase of 1%.

---

---

## Reasons To Sell:

- ▼ **Weak Trends:** In the fiscal third quarter, as a percentage of revenues, gross margin was 4.8%, down 20 bps on a year-over-year basis. Distribution, selling, general and administrative expenses totaled \$1.17 billion, up 6.2% year over year. Also, Pharmaceutical segment witnessed a decline of 0.4% in profits to \$534 million in the quarter under review. An adverse impact of Pharmaceutical Distribution customer contract renewals weighed on the performance. On the basis of the anticipated COVID-19 related impact, Pharmaceutical segment profits might decline to an extent of mid-single-digits in 2020.
- ▼ **Probabilities of Loss of a Major Customer:** Cardinal Health faces the risk of losing considerable business in case of loss of a major customer, which in turn will severely impair its revenues in the future. In this regard, post the establishment of a generic sourcing joint venture with CVS Caremark in 2014, Cardinal Health largely depends on the former for over 20% of its revenues. Collectively, five of Cardinal Health's main customers, including CVS, accounted for as much as 40% of its revenues.
- ▼ **Group Purchasing Organizations:** Cardinal Health derives a significant quantum of revenues through agreements with group purchasing organizations (GPOs). These organizations act as agents that negotiate vendor contracts on behalf of their members. The company's largest GPO agents are Asembia, HealthTrust, Innovatix, Intalere, Premier Purchasing Partners, and six more. These GPOs accounted for a significant amount of Cardinal Health's revenues. Loss of relationship with either of these agents will severely affect the company's sales. In addition, some GPOs sell products that compete with distributors.
- ▼ **Integration Risks:** Cardinal Health continues to acquire a large number of companies. While this improves the company's revenue opportunities, it adds to integration risks. The Cordis acquisition was financed through a combination of debt and cash and the \$1 billion debt financing increased leverage in the near term.
- ▼ **Cutthroat Competition in MedTech Space:** Cardinal Health faces tough competition in each of its business segments. For example, its pharmaceutical supply chain business faces competition from McKesson and AmerisourceBergen as well as several smaller medical-surgical distributors such as Henry Schein and Owens & Minor. Moreover, the medical device market is a mature one compared to Cardinal Health's pharmaceutical business. Although Cordis has significant brand presence, we believe growing competition will hurt Cardinal Health's medical segment's margins in the near term.

Cardinal Health has been facing sluggishness in the exam-gloves unit lately. Further, cutthroat competition in the niche space is a headwind.

## Last Earnings Report

### Cardinal Health Beats Q3 Earnings and Revenue Estimates

Cardinal Health, Inc. reported third-quarter fiscal 2020 adjusted earnings of \$1.62 per share, which surpassed the Zacks Consensus Estimate of \$1.43 by 13.3%. Further, the bottom line rose 1.9% year over year.

Revenues improved 11.2% on a year-over-year basis to \$39.16 billion. The top line also beat the Zacks Consensus Estimate by 5.8%.

Quarter Ending **03/2020**

Report Date	<b>May 11, 2020</b>
Sales Surprise	<b>6.12%</b>
EPS Surprise	<b>13.29%</b>
Quarterly EPS	<b>1.62</b>
Annual EPS (TTM)	<b>5.52</b>

### Segmental Analysis

#### *Pharmaceutical Segment*

In the fiscal third quarter, pharmaceutical revenues improved 11.9% to \$35.11 billion on a year-over-year basis. The upside can be attributed to sales growth from Pharmaceutical Distribution and Specialty Solutions customers.

Pharmaceutical witnessed a decline of 0.4% in profits to \$534 million. An adverse impact of Pharmaceutical Distribution customer contract renewals weighed on the performance.

#### *Medical Segment*

In the quarter under review, revenues at this segment rose 4.6% to \$4.05 billion on account of growth in Cardinal Health at Home, and products and distribution.

Medical segment profit improved 14.8% to \$178 million driven by increase in products and distribution, which included benefits from cost savings initiatives and global manufacturing.

### Margin Analysis

Gross profit improved 6.9% year over year to \$1.89 billion.

As a percentage of revenues, gross margin in the reported quarter was 4.8%, down 20 basis points (bps) on a year-over-year basis.

Distribution, selling, general and administrative expenses totaled \$1.17 billion, up 6.2% year over year.

The company reported operating income of \$562 million in the quarter under review, up 30.1% from the year-ago quarter. As a percentage of revenues, operating margin in the reported quarter was 1.4%, up 20 bps on a year-over-year basis.

### Financial Update

The company exited the quarter with cash and cash equivalents of \$2.33 billion, up 7.9% sequentially.

Cumulative cash from operating activities totaled \$1.68 billion at end of the fiscal third quarter, compared with \$1.48 billion in the year-ago quarter.

### 2020 Guidance Reiterated

The company has reaffirmed fiscal 2020 adjusted earnings per share, which ranges between \$5.20 and \$5.40. The Zacks Consensus Estimate is pegged at \$5.19 per share.

## Valuation

Cardinal Health's shares are up 4.5% and 19% in the year-to-date period and the trailing 12-month periods, respectively. Stocks in the Zacks sub-industry and the Zacks Medical sector are down 5.4% and 5.2% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry is down 14.5% while sector is down 2.7%.

The S&P 500 index is down 5.5% in the year-to-date period while up 5.3% in the past year.

The stock is currently trading at 9.9X Forward 12-months earnings, which compares to 18.1X for the Zacks sub-industry, 22X for the Zacks sector and 21.9 for the S&P 500 index.

Over the past five years, the stock has traded as high as 19.5X and as low as 7.5X, with a 5-year median of 12X.

Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$56 price target reflects 10.4X forward 12-months earnings.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	A
Momentum Score	A
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
