## Reasons To Sell:

▼ **Casey's Withdraws Guidance:** The coronavirus pandemic has claimed innumerable lives, rattled the stock market and brought the economy to standstill. The retail sector, in particular, has been dealt a massive blow. Supply-chain bottlenecks and reduced traffic has either led to store closures or limited operating hours, which in turn is hurting sales and productivity. Amid the prevailing uncertainty, many retailers have called-off their guidance and drawn cash from revolving facility to maintain liquidity. Witnessing lower footfall and fall in demand, Casey's has decided to withdraw its fiscal 2020 guidance.

We note that higher operating expenses is a threat to margin and the bottom line. Operating expenses rose 10.5% during the third quarter of fiscal 2020.

▼ **Top-Line Misses Estimate:** We note that the company's top line fell short of the Zacks Consensus Estimate for the second quarter in row, while the bottom line declined on a year-over-year basis on account of lower fuel margin and higher operating expenses. Fuel margin of 21.7 cents per gallon fell 1.8% year over year. Management highlighted that an unfavorable pricing environment compared with the year-ago period resulted in lower growth in fuel gross profit dollars.

▼ **Soft Fuel Gallons Same-Store Sales:** We note that during the third quarter of fiscal 2020 Fuel gallons same-store sales decreased 2% compared with 3.4% decline witnessed in the year-ago quarter. This follows a decline of 1.8%, 2%, 2.8% and 3.4% witnessed in the preceding four quarters.

▼ **Rise in Operating Expenses May Hurt Margins:** We note that higher operating expenses may be a threat to margin and the bottom line. Operating expenses rose 10.5% during the third quarter of fiscal 2020. This follows an increase of 8.5%, 5.7% and 9.6% during the preceding three quarters. The year-over-year increase can be attributed to 70 more stores from the prior-year period, technology costs associated to digital systems and rise in credit card fees. Same-store operating expenses excluding credit card fees were up 5.4% for the quarter.

▼ **Fuel & Tobacco Products Related Headwinds:** Fuel sales are a significant part of Casey's overall revenues. However, any disruption in the supply of fuel or rise in fuel costs or any other volatility in the wholesale fuel market or price competition may adversely impact its retail fuel profit margins. Quite apparent, these headwinds will have a direct impact on the company's fuel gallon volume, fuel gross profit, and overall customer traffic at its outlets. Similar to fuel, tobacco products form a major part of the grocery and other merchandise category. Increase in the price of the same to offset rise in taxes or stricter government regulation on them or people quitting smoking for health reasons could impact the company's overall sales.

Casey's witnessed an increase of 11% in cost of goods sold and a rise of 10.5% in operating expenses during the reported quarter. Management projects prepared food and fountain same-store sales increase of 1.5-4% with margin between 61% and 63% for fiscal 2020. Notably, the company had reported same-store sales increase of 1.9% and margin expansion of 120 bps to 62.2% in fiscal 2019.
