Summary

Growth in security subscriptions, aided by strong demand for its advanced solutions, primarily CloudGuard, Sandblast Zero-day threat prevention and Infinity solutions, drove Check Point's first-quarter results. Increased demand for network security gateways to support higher capacities aided the adoption of the company's remote access VPN solutions. Several Infinity deals in various industries, including government, telecommunication and industrial were positives. However, lack of components in the supply chain due to coronavirus-led disruptions, and the closure of some logistic centers were hindrances. Some customers are likely to be credit constrained in the second quarter. Check Point is evaluating suitable payment terms to ensure continued service. This is expected to partially affect the cash flow in the near term.

Overview

Headquartered in Tel Aviv, Israel, Check Point Software Technologies Ltd. has evolved into a well-known provider of information technology (IT) security solutions across the world.

The company offers a comprehensive range of software and combined hardware and software products aimed at IT security. Attached either to an operating system, a computer device, a server or a virtual desktop, the solutions cover network and gateway security, data security and management needs.

Check Point entered the industry with its breakthrough product, FireWall-1, equipped with the stateful packet inspection technology. A firewall is a device or a set of devices designed to protect networks from unauthorized access, while permitting legitimate communications.

Stateful Inspection technology, invented and patented by Check Point, runs on a firewall or a PC and helps to extract and maintain extensive data for providing a framework for future screening decisions, from relevant communication layers. It also expedites network traffic inspection.

However, Check Point has expanded its footprint from “firewall” to include a full enterprise security offering with endpoint security, remote access and network security. The company’s network security gateways protect customer data, reduce security complexities and lower the total cost of ownership. Customers are able to implement their security policies on traffic between internal networks and the Internet, as well as between internal and private networks that are shared with partners.

Check Point’s products and services are sold through a network of channel partners, including distributors, resellers, value-added resellers, system integrators and managed service providers. The company has its operations in different geographic regions including the Americas, Europe and the Asia-Pacific, Middle East and Africa.

In 2019, Check Point reported revenues of \$2 billion, which was 4% higher than the figure reported in the previous year.

Reasons To Buy:

- ▲ Check Point Software intends to drive revenues further by selling subscription-based solutions and services. This business model generates stable recurring revenues with high gross margin. Therefore, the more the company sells subscription-based solutions and services, the more it will be able to generate steady revenues, which will drive the bottom-line performance.
- ▲ Enterprises face continued sophisticated cyber threats making cyber security a mission critical, high-profile requirement. Check Point's rich experience in the security space and continued delivery of mission-critical solutions will help it to maintain and grow its market share. Per a latest report of Grand View Research, global threat intelligence market will witness CAGR of 17.4% through 2017 to 2025. Another research firm, Markets and Markets, projected that the global threat intelligence security market will reach approximately \$12.9 billion by 2023 from \$5.3 billion in 2018, representing a CAGR of 19.7%. These predictions bode well for Check Point which recently launched the Maestro Hyperscale and 6000 Series Getaways to bolster its offerings.
- ▲ Check Point has made acquisitions to expedite growth. Acquisitions have expanded its portfolio and capabilities, helping the company enter newer markets like bring-your-own-device (BYOD). BYOD has enhanced employee productivity with anytime, anywhere access. However, it has made it all the more necessary for organizations to adopt data security measures. Check Point integrated Lacocon's products to its mobile security solution called Capsule. With this, the company added Advanced Mobile Application Threat Emulation, behavioral risk analysis and real-time anomaly detection capabilities to Capsule. The company also acquired Dome9, with which it expects to enhance its Infinity architecture and CloudGuard security offering. The recent buyout of ForceNock is also expected to bring machine learning to its security offerings.
- ▲ Check Point is winning new customer accounts, which is driving its revenue growth. Also, Check Point serves almost every Fortune 500 company and has a huge user base. This vast customer base presents the company an opportunity to upsell products within its installed user base. Moreover, any product refreshes bring in additional dollars as every enterprise tries to remain up-to-date in their threat management techniques to guard against impending security threat to their IT system. These factors in turn support the company's top line growth.
- ▲ Check Point has a strong balance sheet with ample liquidity position and no debt obligations. Cash and cash equivalents have remained stable over a billion for the past 5 quarters. As of Mar 31, 2020, the company had cash balance of \$1.74 billion. Since it carries no long-term debt, the cash is available for pursuing strategic acquisitions, investment in growth initiatives and distribution to shareholders.

Growing cyber-security threats are driving rapid adoption of Check Point's subscription-based solutions, which along with acquisitions are expected to significantly drive the top line.

Reasons To Sell:

- ▼ Check Point faces competition from numerous big and small companies in the security application market. Competing firms must deliver prompt and advanced technologies to suit customer requirements and expedite product introduction in order to survive. Moreover, we believe that Check Point's dominance could be challenged by new entrants. This could lead the company to resort to competitive pricing to maintain and capture further market share.
- ▼ To survive in the highly competitive cyber security market, each player must continually invest in broadening its capabilities. Over the past few years, Check Point has invested heavily to enhance its sales and marketing capabilities, particularly by increasing the sales force. This has negatively impacted its operating margins.
- ▼ Check Point is largely dependent on indirect channels for selling its products. The company derives a significant portion of total sales (53% of total sales) from the 10 biggest distributors. We think that this level of dependence increases customer concentration risk. If these distributors reduce their purchases due to supply chain or competitive issues (focusing on sales of the products of competitors), Check Point's business would be adversely affected.
- ▼ Though frequent acquisitions improve revenue opportunities, it increases integration risks. These large acquisitions deteriorate the quality of its balance sheet in the form of a high level of goodwill and intangible assets (more than 18% of total assets as of Mar 31, 2020). Moreover, frequent acquisitions are a distraction for management and can impact organic growth, as the acquired assets will take some time to generate expected return.

Customer concentration risk due to dependence on indirect channels, intensifying competition in the Cyber security space and integration risks related to frequent acquisitions are headwinds.

Last Earnings Report

Check Point Q1 Earnings & Revenues Surpass Estimates

Check Point reported first-quarter 2020 results, wherein both top and bottom lines beat the Zacks Consensus Estimate.

The company's non-GAAP earnings per share of \$1.42 beat the consensus mark by 2.9%. The figure came within the company's guidance of \$1.37-\$1.43 and climbed 7% year over year.

Revenues were \$486 million, up 3% year over year. The figure came within the company's guidance of \$475-\$495 million. Moreover, the figure exceeded the Zacks Consensus Estimate of \$481 million.

Increased demand for network security gateways to support higher capacities aided the adoption of the company's remote access VPN solutions.

However, lack of components in the supply chain due to coronavirus-led disruptions, and closure of some logistic centers were hindrances.

Quarter Details

Security subscription revenues came in at \$158.8 million, increasing 10.3% year over year, aided by strong demand for its advanced solutions, primarily CloudGuard, Sandblast Zero-day threat prevention and Infinity solutions. During the quarter, the company secured several Infinity deals in various industries, including government, telecommunication and industrial.

However, revenues of \$110.2 million from products and licenses fell 2.3%. Products are in the process of transitioning to cloud solutions, which is included in the subscription line, naturally leading to lower revenues.

Total revenues from product and security subscriptions were \$269 million, growing 4.8% year over year.

Software update and maintenance revenues increased to \$217.5 million, up 1.2%.

As of Mar 31, deferred revenues were \$1.35 billion, up 3% year over year, reflecting strength in security subscription.

Region-wise, the Americas generated 46% of total revenues; Europe, Middle East and Africa accounted for 43%; and the Asia Pacific contributed 11%.

The first quarter witnessed strong execution in the Americas, driven mainly by strength in financial services and healthcare verticals.

Non-GAAP operating income for the reported quarter came in at \$231 million, decreasing 1.7% year over year. Non-GAAP operating margin contracted 200 basis points to 48%.

Balance Sheet & Other Financial Details

Check Point exited the first quarter with cash and cash equivalents, marketable securities and short-term deposits of \$3.99 billion compared with the previous quarter's \$3.95 billion.

The company generated cash worth \$359 million from operational activities, up from the previous quarter's \$246.4 million.

It repurchased approximately 3 million shares for about \$325 million in the first quarter.

Outlook

As most of the world is under lockdown due to coronavirus, a change in demand pattern is expected. Check Point is still assessing the potential impacts of the pandemic-led disruptions on its business, and thus refrained from providing any formal guidance for the second quarter or 2020.

Nonetheless, some customers who are seeing a disproportionate economic impact are likely to be credit constrained in the second quarter. Check Point is evaluating suitable payment terms to ensure continued service. This is expected to partially affect the cash flow in the second quarter.

Quarter Ending **03/2020**

Report Date	Apr 27, 2020
Sales Surprise	1.22%
EPS Surprise	2.90%
Quarterly EPS	1.42
Annual EPS (TTM)	6.26

Recent News

On Jul 7, Check Point launches Infinity SOC, which unifies threat prevention, detection, investigation and remediation in a single platform to give unrivalled security and operational efficiency.

On Jun 23, Check Point announced partnering with Coursera under which the two companies will introduce a series of Check Point cyber-security courses and content to security and network professionals.

On Jun 17, Check Point unveiled new 1570R rugged security gateway to protect networks in critical infrastructure, Industrial Control Systems (ICS) and SCADA systems against all types of advanced Gen V cyber-threats.

On Jun 10, Check Point launches CloudGuard Cloud Native Security, which will enable customers to seamlessly protect all of their cloud deployments and workloads, and manage security through a single pane of glass.

On May 27, Check Point announced that current Vice Chairman Jerry Ungerman will be appointed Chairman of the Board and current director Guy Gecht will be appointed Lead Independent Director of the Board.

On Apr 21, Check Point revealed that it has extended the availability of its complete Quantum Security Gateways series to prevent organizations from rising security threats and attacks amid the coronavirus crisis.

On Apr 14, citing Check Point Research's Q1 2020 Brand Phishing report, the company revealed that Apple is the most imitated brand for phishing attempts.

On Apr 9, Check Point announced that Appdome has joined its OPSEC Technology Partner Program.

On Feb 6, Check Point named SYNnex Corporation as the 2019 North American Distributor of the Year.

On Feb 6, citing Check Point Research's Q4 2019 Brand Phishing report, the company revealed that Facebook is the most imitated brand for phishing attempts.

On Feb 5, Check Point announced that its R80 unified security software is now available as a cloud service.

On Feb 3, Check Point's board of directors expanded the company's share repurchase program by an additional \$2 billion.

On Jan 15, Check Point announced Fast Track Network Security, a new portfolio of solutions. This enables enterprises to deploy threat prevention capabilities at all points of their infrastructure and scale security per changing business needs.

Valuation

Check Point shares are up 7% year-to-date (YTD) while declined 0.4% over the trailing 12-month period. Stocks in the Zacks sub-industry have increased 14.4% while the Zacks Computer & Technology sector gained 16.5%, year-to-date (YTD). Over the past year, the Zacks sub-industry and the sector have gained 17.9% and 27.9%, respectively.

The S&P 500 Index has declined 1.3% YTD while has gained 6.2% in the past year.

The stock is currently trading at 18.2X forward 12-month earnings, which compares to 80.15X for the Zacks sub-industry, 26.43X for the Zacks sector and 22.62X for the S&P 500 index.

Over the past five years, the stock has traded as high as 23.64X and as low as 13.98X, with a 5-year median of 19.88X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$125 price target reflects 19.11X forward 12-month earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	D
Momentum Score	D
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
