Summary

Copart's earnings in second-quarter 2020 were in-line with the estimates. The company's active presence across U.S. and international markets is aiding worldwide sales volumes. High activity levels in the United States and expansion efforts in Canadian and European markets are expected to boost the company's prospects. Increased demand for its vehicle remarketing services and the higher average selling prices from the international online bidders are buoying the firm's profits and revenues. However, increased investments to support growth initiatives, including expansion of the business in international markets and the United States, are hampering its bottom line. Improving safety features in vehicles will also likely have a negative impact on its future earnings. Hence, the investors are recommended to wait for a better point.

Overview

Based in Dallas, TX, Copart, Inc. was founded in 1982. The company provides online auction and a wide range of remarketing services to process and sell salvage and clean title vehicles. This is done mainly over the Internet, through its Virtual Bidding Third Generation (VB3) Internet auction-style sales technology.

Sellers are primarily insurance companies, banks and financial institutions, charities, car dealerships, fleet operators, and vehicle rental companies. Buyers include licensed vehicle dismantlers, rebuilders, repair licensees, used vehicle dealers and exporters, along with the general public.

Copart's services include online supplier access, salvage estimation services, end-of-life vehicle processing, virtual insured exchange, transportation services, vehicle inspection stations, on-demand reporting, DMV processing and flexible vehicle processing programs, among others.

In the United States, Canada, Brazil, the Republic of Ireland, Finland, the U.A.E., Oman, Bahrain, and Spain, Copart sells vehicles primarily as an agent and earns revenue from sales transaction fees paid by vehicle suppliers and vehicle buyers, as well as the associated fees for services, such as towing and storage. In the United Kingdom and Germany, it operates on a principal basis, purchasing the salvage vehicle from insurance companies and reselling it to buyers. It also serves as an agent in the United Kingdom. In Germany and Spain, Copart generates revenue from sales listing fees for listing vehicles for insurance companies.

Copart acquires and develops hubs in new as well as existing regions as an expansion strategy. It believes that acquisitions and facility opening will strengthen its footprint across the United States, the U.K., Brazil, the Republic of Ireland, Germany, Finland, the U.A.E., Oman, Bahrain, and Spain.

Reasons To Buy:

- ▲ Copart is expanding its network of facilities to manage the inflating volume of vehicles. The company's active presence across U.S. and international markets is aiding worldwide sales volumes. High activity levels in the United States and expansion efforts in Canadian and European markets are expected to boost the company's prospects further. Expanding footprint will aid Copart in a fast pickup across the country, leading to improved growth in a competitive marketplace.
- ▲ To meet the ever-increasing demand from car buyers and sellers, Copart has been doubling down on storage capacity expansion. Along with that, an increased demand for its vehicle remarketing services and the higher average selling prices from the international online bidders are buoying the firm's profits and revenues. Notably, the revenues have witnessed a CAGR of 15.5% from 2015-2019.
- ▲ In addition to opening hubs and expanding its network of facilities, the company's strategic acquisitions are likely to drive revenues. Copart's 2019 buyout of Kentucky-based online auctioning platform, Vincent Auto Solutions, has strengthened its footprint in western Kentucky. In 2018, with an aim to expand its presence throughout Europe, it acquired AVK, a leading Finland-based salvage auto auction company. In 2017, it acquired that supported its expansion in the areas of Atlanta, Cincinnati, Dallas, Philadelphia and San Diego. Further, the company has a good track record in profitably integrating acquisitions to their benefit.

High activity levels in the United States and expansion efforts in Canadian and European markets are expected to boost the company's prospects further.

Reasons To Sell:

- ▼ Increased investments to support growth initiatives, including expansion of the business in international markets and the United States, are hampering Copart's bottom line. Further, the company is still struggling with increased labor and temporary storage costs. In 2019, the company's operating expenses rose to \$1.32 billion from the year-ago figure of \$1.22 billion.
- ▼ Copart's presence in various international markets makes it vulnerable to foreign currency fluctuations and country-specific policy threats. In fact, during 2019, the company's year-over-year revenue growth was partly offset by strength of the U.S. dollar in comparison with the pound and the Brazilian real.
- ▼ Improving safety features in vehicles will likely have a negative impact on Copart's future earnings. As safety features improve, the accident rate and hence, the supply of salvage vehicles is expected to reduce. Moreover, the rapid progress in the development of driverless cars is a looming threat in the long run. In the medium term, the increasing addition of driver-assist features to vehicles is expected to lower accident rates. This could affect Copart's inventory levels, which in turn, will hamper revenue growth.

Increased expenses due to business expansion and costs associated with hurricanes are concerns before Copart. Moreover, improving safety features in vehicles may impact revenue growth.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.
