Summary

Enterprise Products boasts an extensive network of pipeline that spreads across nearly 50,000 miles and connects to every major U.S. shale play. This secures stable fee-based revenues for the partnership, which enabled it to meet earnings estimates in the fourth quarter. Notably, the partnership is well positioned to generate incremental cash flow from \$3.1 billion worth of growth projects that are expected to come online in 2020. However, its balance sheet is more levered than the sector. Its debt to capitalization ratio of more than 50% is much higher than the Zacks Oils-Energy sector's average of 31%. Moreover, the stock's distribution yield is much lower than the industry it belongs to. Also, the global market is likely to generate lower refined products' demand hurting exports. As such, the stock warrants a cautious stance.

Overview

Headquartered in Houston, TX, Enterprise Products Partners is among the leading midstream energy players in North America. With its wide base of midstream infrastructure assets, the partnership provides services to producers and consumers of commodities that include natural gas, natural gas liquids (NGL), oil and refined petrochemical products. It was formed in April 1998.

Enterprise Products has an extensive network of pipeline that spreads across 50,000 miles. The pipelines carry natural gas, NGL, crude oil and refined products. The storage assets have the capacity to store 14 billion cubic feet (Bcf) of natural gas along with 260 million barrels (MMBbls) of NGL, refined products and crude. The partnership's assets include 26 processing plants of natural gas along with 23 NGL and propylene fractionators.

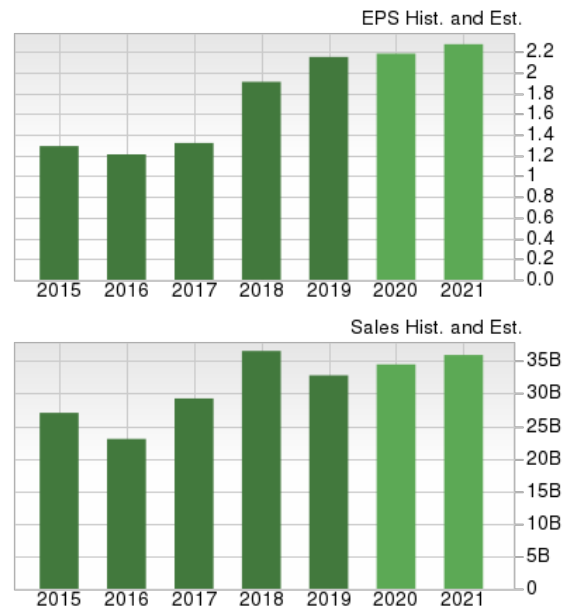

Enterprise divides its operations into four segments: NGL Pipelines & Services, Crude Oil Pipelines & Services, Natural Gas Pipelines & Services and Petrochemical & Refined Products Services.

NGL Pipelines & Services (the segment accounted for 49.1% of 2019 gross operating income): This segment incorporates 26 natural gas processing plants and around 19,200 miles of NGL pipelines. It also owns 16 NGL fractionators and LPG and ethane export terminals.

Crude Oil Pipelines & Services: (25.2%) This segment includes about 5,300 miles of crude oil pipelines, several crude oil storage and marine terminals. Through this segment, the partnership performs various crude oil marketing activities. It has 28.2 million barrels of operational storage capacity.

Natural Gas Pipelines & Services: (12.8%) It includes around 19,700 miles of natural gas pipeline systems as well as related marketing activities.

Petrochemical & Refined Products Services: (12.9%) This segment incorporates propylene production facilities, around 800 miles of pipelines. It also owns a butane isomerization complex and almost 70 miles of associated pipelines. Notably, the segment has refined products pipelines of 4,100 miles and marine transportation activities.

Reasons To Buy:

- ▲ Enterprise Products has an extensive network of pipeline that spreads over nearly 50,000 miles. The pipelines carry natural gas, NGL, crude oil and refined products. Most importantly, the partnership's midstream properties are linked to all prospective shale plays in the United States that are rich in natural gas and oil. These extensive networks of pipelines provide it with stable fee-based revenues.
- ▲ Almost 80% of the Enterprise Products' pipeline contracts with shippers have been extended for 15 to 20 years, which should help the partnership generate steady cashflow for unit holders. Notably, the integrated midstream energy firm's businesses are not limited to connecting producers and consumers of hydrocarbons. In fact, Enterprise Products is expanding its midstream operations to capitalize on the growing feedstock demand in the petrochemical plants of domestic and international markets.
- ▲ Since its IPO in 1998, Enterprise Products has invested a hefty sum of \$26 billion in major acquisitions. The partnership has spent another \$42 billion for its organic growth projects that have been contributing to cashflow. The partnership is also well positioned to generate additional cashflow from growth capital projects of \$3.1 billion that are expected to come online in 2020. The Midland & ECHO storage expansions will increase its Permian footprint.
- ▲ After raising distributions over more than 20 years, the partnership is planning to hike payments by 2.3% through 2020. Notably, the partnership intends to repurchase units in 2020 using a portion of its cash flow from operations. The distribution hike and unit buyback will likely lead to a 5.6% increase in returned capital to limited partners from 2019 levels.

Enterprise Products is well positioned to generate cashflow from growth capital projects.

Reasons To Sell:

- ▼ Lower processing margins, natural gas transportation and propylene production affected Enterprise Products' profits through the December quarter of 2019. The partnership was also hurt by lower refined products pipeline transportation volumes and decreased Rocky Mountain gas processing volumes.
 - ▼ Over the past few years, the partnership's debt-to-capitalization ratio of 50.1% has been consistently higher than the overall energy sector's 31%. This shows that Enterprise's balance sheet is more levered than the sector which can restrict the partnership's financial flexibility.
 - ▼ With the phase-one trade agreement solving a few concerns for the United States, there are many more to be addressed. which raise the possibility of an escalation of the trade war. The threat to economic growth might hurt demand for crude, natural gas liquids and refined petroleum products. This may lower the partnership's cash flow generation from its export facilities.
 - ▼ Although Enterprise Products is strongly committed to returning capital to stockholders, the partnership's distribution yield is much lower than the industry it belongs to.
-

The partnership's levered balance sheet can restrict its financial flexibility.

Last Earnings Report

Enterprise Products' Q4 Earnings Meet Estimates, Declines Y/Y

Enterprise Products reported fourth-quarter 2019 adjusted earnings per limited partner unit of 54 cents, in line with the Zacks Consensus Estimate. The bottom line declined from 59 cents per unit in the year-ago quarter.

Revenues declined to \$8,005.3 million from \$9,182.3 million in the prior-year quarter. However, the top line beat the consensus estimate of \$7,973 million.

The fourth-quarter results were supported by higher sales volumes, and margins from the NGL Pipelines & Services business. Increased crude oil transportation volumes also aided the results. This was partially offset by lower natural gas transportation volumes and decreased operating margin from the propylene business.

Notably, in 2019, the partnership had completed construction and brought online around \$5.4 billion of organic growth capital projects.

Segmental Performance

Gross operating income at **NGL Pipelines & Services** increased from \$969 million in the year-ago quarter to \$1,136 million. The upside can be attributed to higher sales volumes and average margins. A 31% increase in LPG export loadings, supported by the Enterprise Hydrocarbons Terminal expansion, aided the segment. This was partially offset by lower margins from the natural gas processing business.

Natural Gas Pipelines and Services' gross operating income fell to \$238 million from \$263 million in the year-ago quarter. The downside was caused by lower natural gas transportation volumes. The partnership's Rocky Mountain gathering systems reported lower margins in the quarter.

Crude Oil Pipelines & Services recorded gross operating income of \$416.1 million, which declined from \$644.3 million in the prior-year quarter on the back of lower sales margins. This was partially offset by higher crude oil transportation volumes.

Gross operating income at **Petrochemical & Refined Products Services** amounted to \$233.7 million compared with \$254.7 million a year ago. The decline was primarily caused by lower pipeline transportation volumes. Lower operating margin from the propylene business affected the segment.

DCF & Unit Repurchase

Quarterly distribution improved 2.3% year over year to 44.50 cents per common unit or \$1.78 per unit on an annualized basis. This marks the 62nd consecutive quarterly increase of distribution.

Adjusted distributable cash flow was \$1.6 billion, up 12% year over year, and provided coverage of 1.7x. Notably, the partnership retained \$654 million of distributable cash flow in the fourth quarter. It bought back around 2.2 million units for \$58 million in the fourth quarter.

Financials

During the quarter, the partnership's capital expenditure was \$1,229.6 million.

As of Dec 31, 2019, its outstanding total debt principal was \$27.9 billion. Enterprise Products' consolidated liquidity amounted to \$4.9 billion, which included unrestricted cash on hand and available borrowing capacity.

Outlook

Enterprise Products expects to complete the construction of growth developments worth \$3.1 billion through 2020. The projects include two NGL fractionators in the Mont Belvieu region and a third crude oil pipeline connecting the Permian Basin to Houston, TX.

It plans to further increase 2020 distribution by 2.3% from 2019 levels. The partnership also intends to repurchase units in 2020 using a portion of its cash flow from operations. The distribution hike and unit buyback will likely lead to a 5.6% increase in returned capital to limited partners from 2019 levels.

Quarter Ending **12/2019**

Report Date	Jan 30, 2020
Sales Surprise	0.40%
EPS Surprise	0.00%

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	C
Momentum Score	A
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
