Summary

Fiserv enjoys a dominant position in the financial and payments solutions business on the back of broad and diverse customer base, and continued technology upgrades. The company's diversified product portfolio helps attract a steady flow of customers. Acquisitions help expand its product portfolio and enhance its offerings, boost its market share and customer base. The company has been consistently rewarding shareholders through share buybacks. These initiatives instill investors' confidence, positively impacting earnings per share. However, maintaining strong and long-term client relationships is a difficult task amid stiff competition. Acquisition of a large number of companies results in some integration risk. High debt may limit the company's future expansion. Partly due to these negatives, the stock has declined in the past year.

Overview

Founded in 1984, Fiserv Inc. is headquartered in Brookfield, WI. The company provides financial services technology solutions to over 12,000 clients worldwide in the banking, insurance, healthcare and investment industries. Fiserv serves banks, credit unions, leasing and finance companies, investment management firms, billers, retailers, and merchants.

The company has grown its business through developing highly specialized products and services and enhancing them, increasing capabilities through innovation, expanding client base, and acquiring complementary businesses. Core focus areas of Fiserv's business are portfolio management, client relationship value enhancement, operational effectiveness, capital discipline and innovation.

Revenues climbed 2.2% year over year to \$5.8 billion in 2018. Processing & services revenues, primarily generated from account-and-transaction based fees under contracts (three to five-year terms), represented 85.4% of revenues in 2018. The company has two reportable segments –

Payments and Industry Products– This segment provides electronic bill payment and presentment services; person-to-person payment services; account-to-account transfers; debit and credit card processing and services; Internet and mobile banking software and services; payments infrastructure services; and other electronic payments software and services. The segment also provides card and print personalization services; fraud and risk management products and services, and investment account processing services for separately managed accounts. It accounted for about 59% of 2018 revenues.

Financial Institution Services– This segment provides account processing, item processing and source capture, cash management and consulting services, loan origination and servicing products, among others. The segment also provides ACH and treasury management, and source capture optimization services and case management and resolution services to the financial services industry. It accounted for about 41% of total revenue in 2018.

Fiserv has announced the acquisition of First Data Corporation in a \$22 billion all-stock deal which is expected to close during the second half of 2019.

Reasons To Buy:

- ▲ Fiserv's **dominant position** in the financial and payments solutions business is expected to drive long-term growth. We believe that the broad and diverse customer base, efforts to enhance high recurring revenues and continued technology upgrades will help the company to drive growth. In 2019, the company achieved \$47 million of savings, completing its five-year \$250 million operational effectiveness program a year early.
- ▲ Fiserv continues to expand its product portfolio and enhance its offerings with the help of **strategic acquisitions**. In 2020 so far, Fiserv completed the acquisitions of MerchantPro Express, Bypass Mobile and Inlet. While MerchantPro expands the company's merchant services business, Bypass enhances its omni-commerce capabilities. Inlet boosts its digital bill payment strategy. In 2019, Fiserv completed the acquisition of First Data. This is one of the biggest financial mergers in a decade and will help Fiserv emerge as one of the world's largest payments and financial technology providers. In 2018, Fiserv completed the purchase of Elan's debit card processing, ATM Managed Services and MoneyPass surcharge free network for approximately \$690 million. It should boost Fiserv's payments portfolio, widen its client base and provide new solutions to enhance the value proposition for its existing 3,000 debit solutions clients. In 2017, Fiserv completed four acquisitions - Online Banking Solutions, Inc., PCLender, LLC, Dovetail Group Limited and Monitise plc. These buyouts helped the company to improve cash management and digital business banking solutions and transform payments infrastructure. We believe that the company will continue to pursue accretive deals, which will boost its market share and customer base going forward. Fiserv is focused on becoming a global leader in transaction-based technology solutions.
- ▲ Fiserv's **diversified product portfolio** continues to yield a steady flow of customers. The rapidly changing financial services industry and increasing demand for digital banking and payment services provide significant growth opportunities to Fiserv. Notably, second-quarter 2020 witnessed significant client additions. Fiserv's DNA platform signed 9 new clients. Also, it had signed 17 new core account processing clients. The company witnessed solid growth in account-to-account transfers and P2P, which grew almost double from the year-ago quarter and up 20% sequentially. Mobiliti ASP subscribers increased 6% in the quarter to more than \$9.3 million and Architect, the company's single digital platform grew 56% to 3 million users. The number of clients using Zelle increased more than 5 times from the year-ago quarter and went up 31% from the previous quarter. Backed by such strong demand, the company expects to witness more client additions moving ahead.
- ▲ The company seems to be actively **engaged in enhancing its services**. In October 2019, Fiserv launched an intelligent bill payment system, CheckFreeNext, which should transform the bill payment experience with personalized suggestions, increased automation and unmatched connectivity. In February 2019, Fiserv announced the launch of Mortgage Momentum, a digital-focused approach, aimed at enhancing the overall lending and borrowing experience. In October 2018, Fiserv announced the launch of a flexible and interactive financial planning tool (which integrates with home office systems and streamlines manual processes) to help financial advisors operate more efficiently and collaborate with clients in their investment targets. In September 2018, Fiserv announced the launch of Originate, a new suite of solutions aimed at helping banks and credit unions deliver enhanced digital account opening and loan origination to customers. In August 2018, the company upgraded its unified managed account (UMA) services to help financial institutions and advisors operate more efficiently and announced the launch of two enhanced consumer authentication solutions, step-up authentication and identity verification to help call centers counter card fraud.
- ▲ We are also impressed with Fiserv's consistent efforts to **return value to shareholders** in the form of share repurchases. During 2019, the company repurchased 4.2 million shares for \$394 million. In 2018, 2017 and 2016, the company had repurchased shares worth \$1.91 billion, \$1.17 billion and \$1.20 billion, respectively. Such moves indicate the company's commitment to create value for shareholders and underline its confidence in its business. These initiatives instill investors' confidence and positively impacting earnings per share.

Fiserv continues to widen its client base and enhance its product portfolio with the help of acquisitions.

Reasons To Sell:

- ▼ Fiserv's core banking products and services are part of a **highly competitive market**. The industry is getting more competitive with the entry of several non-banking bodies such as internal data processing departments, data processing affiliates of large companies, large computer hardware manufacturers, independent computer service firms, and processing centers that offer both customer facing and back office financial technology products and services. Going forward, competition is anticipated to increase as market entrants multiply in number and the existing ones expand their product lines and services with updated technologies to attract customers and retain the existing ones. Maintaining strong and long-term client relationships is a difficult task amid stiff competition.
- ▼ Fiserv has a **debt-laden balance sheet**. Total debt at the end of second-quarter 2020 was \$21.9 billion, flat sequentially. The total debt to total capital ratio of 0.39 is higher than the industry's 0.38 and in line with the previous quarter. An increase in debt to capitalization ratio indicates higher risk of insolvency in challenging times. Further, the company's cash and cash equivalent of \$869 million at the end of the second quarter was well below this debt level, underscoring that the company doesn't have enough cash to meet this debt burden. The cash level, however, can meet the short-term debt of \$359 million. This may weigh on the company's share price which has declined 5.2% over the past year.
- ▼ Fiserv's policy of acquiring a large number of companies results in some **integration risk**. Acquisitions can negatively impact its balance sheet in the form of a high level of goodwill and intangible assets, which accounted for 69% of total assets at the end of Dec 31, 2019. Moreover, frequent acquisitions are a distraction for management, which could impact organic growth.

Stiff competition, acquisition-related integration risks and high debt continue to weigh on Fiserv's prospects.

Last Earnings Report

Fiserv Misses Q2 Earnings & Revenue Estimates

Fiserv reported disappointing second-quarter 2020 results, wherein earnings and revenues missed the Zacks Consensus Estimate.

Adjusted earnings per share of 93 cents fell below the consensus mark by a penny. Adjusted revenues of \$3.22 billion missed the consensus estimate by 1.8%.

Internal revenues declined 7% in the reported quarter, with declines of 15% in the Merchant Acceptance segment, 1% in the Financial Technology segment and 3% in the Payments and Network segment.

Quarter Ending 06/2020

Report Date	Aug 05, 2020
Sales Surprise	-1.80%
EPS Surprise	-1.06%
Quarterly EPS	0.93
Annual EPS (TTM)	4.07

Revenues in Detail

Revenues at the **Merchant Acceptance** segment came in at \$1.22 billion. Adjusted revenues of \$1.17 billion fell 20.4% year over year.

Revenues at the **Payments and Network** segment increased 99% year over year to \$1.32 billion. Adjusted revenues of \$1.33 billion declined 4.5% year over year.

Revenues at the **Financial Technology** segment decreased 2.3% year over year to \$714 million.

Revenues at **Total processing and services** segment increased more than 100% year over year to \$2.89 billion while **product revenues** grew more than 100% year over year to \$575 million.

Operating Results

Adjusted operating income of \$927 million was down 14.4% from the year-ago quarter. Adjusted operating margin of 28.8% fell 90 basis points (bps) year over year.

Adjusted operating income at the Merchant Acceptance segment was \$223 million, down 46.9% year over year. Adjusted operating margin declined 950 bps year over year to 19.1%.

Adjusted operating income at the Payments and Network segment was \$558 million, up 0.5% year over year. Adjusted operating margin improved 220 bps year over year to 42.8%.

Operating income at the Financial Technology segment totaled \$252 million, up 14% year over year. Operating margin of 35.4% improved 520 bps.

Balance Sheet and Cash Flow

Fiserv exited second-quarter 2020 with cash and cash equivalents of \$869 million compared with \$896 million at the end of the prior quarter. Long-term debt was \$21.5 billion compared with \$21.6 billion at the end of the prior quarter.

The company generated \$1.03 billion of net cash from operating activities in the reported quarter. Free cash flow was \$895 million. Capital expenditures were \$242 million. Fiserv repurchased 5.7 million shares for \$550 million in the reported quarter.

2020 Guidance

Fiserv expects full-year 2020 adjusted earnings per share to register nearly 10% growth.

The company is hopeful of delivering its 35th consecutive year of double-digit adjusted earnings per share growth in 2020 and remains well-positioned for 2021, considering strength of the results to date and improvement in performance trends across the globe.

Recent News

On **Jun 4, 2020**, Fiserv announced that it has unveiled a new solution, FlexLine Advance, aimed at helping consumers and small businesses easily access funds from existing credit lines on credit cards through their financial institutions.

On **May 20, 2020**, Fiserv announced that it has been recognized as the Best Digital Mortgage Company in the fourth annual FinTech Breakthrough Awards.

Valuation

Fiserv shares are down 11.6% in the year-to-date period and 5.2% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Business Services sector are up 4% and 2.3%, in the year-to-date period, respectively. Over the past year, the Zacks sub-industry and the sector are up 6.7% and 3.5%, respectively.

The S&P 500 index is up 4.5% in the year-to-date period and 15.7% in the past year.

The stock is currently trading at 20.42X forward 12-month price-to-earnings, which compares to 31.07X for the Zacks sub-industry, 29.77X for the Zacks sector and 22.85X for the S&P 500 index.

Over the past five years, the stock has traded as high as 28.86X and as low as 14.92X, with a 5-year median of 22.48X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$108.00 price target reflects 21.58X price-to-earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	B
Momentum Score	F
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.

Disclosures
