Summary

HP is benefiting from growing demand in the Commercial PC market. Increase in sales for commercial customers is a tailwind. Strong growth in Personal Systems revenues remains a tailwind. Solid revenue growth in retail solutions business and gaming as well as services orders is a positive. Further, stringent cost control is driving margin expansion. The company's improving market share across the PC and Printer businesses makes us optimistic. Moreover, HP expects to return approximately \$16 billion to shareholders over the next three years, which is encouraging. However, soft consumer market and weakness in the Printing business are negatives. Further, macroeconomic weakness, particularly in Europe, the Middle East and Africa (EMEA), is denting Supplies revenues. Shares have underperformed the industry in the past year.

Overview

HP Inc. is the surviving entity following the November 2015 split of Hewlett-Packard Company into publicly traded entities - Hewlett Packard Enterprise Company and HP Inc.

The company is a leading global provider of personal computing and other access devices, imaging and printing products, and related technologies, solutions and services to individual consumers, SMBs and large enterprises, including customers in the government, health and education sectors.

Headquartered in Palo Alto, CA, HP Inc. was founded in 1939. In Europe, Middle East, Africa (EMEA), the company is headquartered in Geneva, Switzerland. In Asia Pacific, the company's headquarter is in Singapore.

HP reported net revenue of \$58.8 billion in fiscal 2019. HP has three reportable segments: Personal Systems, Printing and Corporate Investments.

The Personal Systems segment (65.8% of FY19 Revenues) offers Commercial and Consumer desktop and notebook personal computers (PCs), Workstations, thin clients, Commercial mobility devices, retail point-of-sale (POS) systems, displays and other related accessories, software, support and services.

The Printing segment (34.2%) provides Consumer and Commercial printer hardware, Supplies, solutions and services, as well as scanning devices. Corporate Investments includes HP Labs and certain business incubation projects.

The Personal Systems Group competes with Lenovo, Dell, Acer, Apple, Toshiba and Samsung Electronics while the Printing segment shares space with the likes of Canon, Lexmark International, Xerox, Seiko Epson, The Ricoh Company and Brother Industries.

The company recognized 35.1% of its fiscal 2019 revenues from the United States while "Other countries" contributed to the rest of the revenues.

In the past three fiscal years, notebook PCs, printing supplies and the desktop PCs, each accounted for more than 10% of the company's consolidated net revenue stream.

As of Oct 31, 2019, the company's worldwide patent portfolio included more than 27,000 patents comprising the ones acquired from Samsung.

The company had approximately 56,000 employees worldwide as of Oct 31, 2019.

Reasons To Buy:

- ▲ Product innovation and differentiations are the key drivers that have helped HP in maintaining its leading position in PC market. The company is also one of the largest sellers of printers. HP has been launching several new innovative models in the PC segment as well as in the Printing segment. We believe that the continuous product launches will help HP stay afloat in the current uncertain macroeconomic environment.
- ▲ The acquisition of Samsung Electronics' printer business (S-Print) is believed to be a strategic move by HP to turn around the printer business. The S-Print business has more than 6,500 printing patents, which will help HP expand in the domain. All these will support development and manufacturing of HP printers, going forward. Moreover, it will help HP gain market share from its Japanese rivals – Canon Inc. and Espon, and control prices. Apart from this, the acquisition will also give HP access to Samsung's partners and strengthen HP's position across various geographies.
- ▲ To give a further boost to its Printing business, HP is increasing investments on its A3 multifunction printers (MFPs). These printers are designed to disrupt the traditional \$55 billion A3 copier category. HP's highly scalable and cost-optimized printers will meet the increasing demand of customers' printing needs. We believe that the successful deployment of the new A3 MFPs printers will boost revenue growth for the company, going forward. Additionally, HP expects its acquisition of Europe's largest independent provider of print and document services, Apogee Corporation, to drive growth in contractual office print market. Management believes that A3 is on track to achieve 12% market share by 2020.
- ▲ Apart from fortifying its traditional printing product portfolio, HP is focusing on enhancing its 3D printing business capabilities. Notably, the 3D printing market presents significant long-term investment opportunities as a large number of engineers, designers, architects and entrepreneurs are now turning to 3D solutions for primary designing and product modeling. Thus, in order to establish its base in this space, HP unveiled its Jet Fusion 3D printing solution last year. The company believes that its expanded product portfolio, materials and industrial partnerships will help it cater to the needs of a growing range of customers with a diverse range of manufacturing needs. We believe, growth in the 3D printing portfolio will help it establish a stronger footprint in this intensely competitive market, dominated by well-established players, namely Stratasys, 3D Systems and Voxeljet.

Product innovation and differentiations are the key drivers that are helping HP maintain its leading position in the PC market.

Risks

- The near-term prospects for HP's PC division look gloomy due to the coronavirus outbreak. According to the latest data compiled by IDC, global PC shipments fell drastically year-over-year in the first quarter despite a demand surge due to the shift toward the work-and-learn from home trend amid coronavirus-led global lockdown. Lockdown measures to contain the spread of coronavirus in China, the world's largest supplier of PCs, have significantly delayed productions as well as created logistic and labor issues, resulting in a global PC shipment decline.
 - Rising macro uncertainties and the price sensitivity among customers are undermining the company's high-margin Printing business. Change in customer purchasing behavior with more commercial customers buying items online, is negatively impacting HP's Supplies share. Management had earlier stated that the company has a lower market share in that space as compared to its share of traditional commercial resellers and in-store retailers. Further, given the high inventory and pricing issues, the company expects sales for the Printing segment to be weighed on.
 - The company faces stiff competition for its PC and printer businesses. The PC segment competes with Lenovo, Dell, Acer, Apple, Toshiba Corporation and Samsung Electronics, while in the printing segment compete with the likes of Xerox Corporation and Seiko Epson Corporation. Moreover, even though HP has been operating in 3D printing for almost five years now, the company lags behind 3D Systems Corporation and Stratasys.
 - Around 65% of the company's revenues come from businesses outside the United States. Thus, an economic condition which impacts the foreign currency exchange rates does result in transaction exposure, which leads to profit fluctuation.
-

Last Earnings Report

HP Q1 Earnings Top, Personal Systems Revenues Rise

HP delivered first-quarter fiscal 2020 non-GAAP earnings from continuing operations of 65 cents per share, beating the Zacks Consensus Estimate by 3.45% and also the year-ago quarterly figure by 20.4%.

HP's net revenues of \$14.618 billion surpassed the Zacks Consensus Estimate of \$14.613 billion but declined 0.6% year over year. However, in constant currency (cc), revenues rose 1%.

HP's results in the fiscal first quarter benefited from strong growth in Personal Systems revenues. However, soft consumer market and weakness in the Printing business remain concerns.

Quarter Ending **01/2020**

Report Date	Feb 24, 2020
Sales Surprise	0.03%
EPS Surprise	20.37%
Quarterly EPS	0.65
Annual EPS (TTM)	2.36

Quarter in Detail

Personal Systems revenues (68% of net revenues) were \$9.89 billion, up 2.4% year over year (3.8% in CC). Further, commercial revenues increased 7% but consumer revenues were down 7%.

HP's total units sold rose 4% from the year-ago quarter. Notebooks registered a 2% climb while desktop units improved 7% year over year. Notebooks (41%), Desktop (20%) and Workstation (7%) revenues were up 1%, 2% and 6%, respectively.

Printing business revenues (32% of net revenues) were down 6.6% year over year (down 5.8% in CC) to \$4.72 billion.

HP's total hardware units sold declined 10%. Moreover, Consumer Hardware unit fell 10% and Commercial Hardware unit dipped 12% on a year-over-year basis.

Commercial Hardware revenues (7%) slid 1% year over year. Further, revenues from Consumer Hardware (4%) and Supplies (21%) decreased 13% and 7%, respectively.

Region wise, at cc, revenues from Asia-Pacific plus Japan region (23%) grew 4%. Meanwhile, Europe, the Middle East and Africa (EMEA) revenues (36%) were flat. Revenues from Americas (41% of net revenues) declined 1%.

Operating Results

Segment wise, Personal Systems operating margin expanded 250 basis points (bps) to 6.7%, driven by cost control. However, printing operating margin contracted 20 bps to 16% due to lower supplies revenues.

Meanwhile, non-GAAP operating margin from continuing operations of 8.1% expanded 120 bps year over year.

Balance Sheet and Cash Flow

HP ended the fiscal first quarter with cash and cash equivalents of \$4.21 billion compared with \$4.5 billion sequentially.

The company generated cash flow of \$1.3 billion from operational activities and \$1.1 billion free cash flow during the quarter under review.

HP returned nearly \$900 million to its shareholders in the form of stock repurchases (\$700 million) and cash dividends (\$300 million).

Guidance

HP expects coronavirus to adversely impact its top line, bottom line and free cash flow in the fiscal second quarter.

For the second quarter of fiscal 2020, HP predicts non-GAAP earnings between 49 cents and 53 cents.

HP expects the competitive pricing environment and Intel's CPU shortage to remain concerns for its Personal Systems business.

For fiscal 2020, HP now expects non-GAAP earnings between \$2.33 and \$2.43 per share, upped from the previous guidance of \$2.24-\$2.32.

HP expects to return approximately \$16 billion to shareholders over the next three years, with minimum of \$8 billion of shares repurchased in the 12 months. In order to support this, the company increased the total share repurchase authorization to \$15 billion from \$5 billion announced in October 2019.

Recent News

On Mar 24, HP announced that it is building 3D printed hands-free door openers, mask adjusters and face shields, and has already supplied more than 1,000 of these to hospitals. The products are being manufactured at its 3D research and development centers in San Diego; Corvallis, OR; Vancouver, WA; and Barcelona.

On Mar 11, HP launched several digital printers and printing solutions to accelerate its transition from analog to digital printing. The portfolio of HP Indigo digital labels and packaging has been created especially to be demonstrated in the drupa 2020, which is scheduled to be held from Jun 16-26.

Valuation

HP shares lost 28.9% in the year-to-date (YTD) period and 25.4% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Computer & Technology sector are down 5.8% and 6.7%, respectively, YTD. Over the past year, the Zacks sub-industry and the sector gained 33% and 0.4%, respectively.

The S&P 500 index has declined 13.2% YTD and 4.8% in the past year.

The stock is currently trading at 5.58X forward 12-month earnings, compared with 19.43X for the Zacks sub-industry, 21.44X for the Zacks sector and 19.31X for the S&P 500 index.

Over the past five years, the stock has traded as high as 13.1X and as low as 3.82X with a 5-year median of 9.36X. Our Outperform recommendation indicates that the stock will perform better than the market. Our \$17 price target reflects 6.42X forward 12-month earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	B
Momentum Score	F
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
