Summary

Annual earnings estimates for Huntsman have been moving down over the past month. The company is witnessing weak demand in automotive and construction markets in Europe due to a difficult macroeconomic environment. Demand weakness is also expected to persist in China, partly due to trade uncertainties and outbreak of coronavirus. For the Polyurethanes unit, Huntsman expects demand headwinds in several major markets and regions in 2020. Moreover, margins in component and polymeric systems is likely to remain challenging in the short-term, especially in Europe and Asia. The company also faces headwinds from higher raw material costs. Soft market conditions in the North American unsaturated polyester resin and across most of the European markets are exerting pressure on maleic anhydride business volumes.

Overview

Woodlands, TX-based Huntsman Corporation is among the world's largest manufacturers of differentiated and commodity chemical products. The company markets its products to a diverse group of industrial and consumer customers. Its products include MDI (methylene diphenyl diisocyanate), polyols, propylene oxide, amines, surfactants, maleic anhydride, epoxy-based polymer formulations, textile chemicals and dyes.

Huntsman's products are used in number of applications including aerospace, automotive, construction products, adhesives, personal care and hygiene, durable and nondurable consumer products, digital inks, electronics, medical, packaging, coatings and construction, power generation, refining and textile chemicals.

Huntsman, in Aug 2017, completed the separation of its pigments and additives division through the spinoff of its subsidiary, Venator Materials PLC. Venator's ordinary shares started trading on the NYSE under the ticker symbol "VNTR" on Aug 3, 2017.

Huntsman and Clariant, in May 2017, agreed to combine in an all-stock deal. However, the companies terminated the merger of equals deal by mutual agreement in Oct 2017 after facing pressure from activist investors.

The company currently has four reportable segments – Polyurethanes, Performance Products, Advanced Materials and Textile Effects.

Polyurethanes (57% of 2019 sales): The division makes a vast range of polyurethane chemicals including MDI products are used to make rigid foams, coatings, adhesives, sealants and elastomers.

Performance Products (17%): The unit is a leading producer of amines, surfactants and maleic anhydride and caters to a vast spectrum of consumer and industrial end markets.

Advanced Materials (15%): The division is a leading producer of technologically advanced epoxy, acrylic and polyurethane-based polymer products for a number of industrial and consumer applications.

Textile Effects (11%): The unit offers a diverse portfolio of textile chemicals, dyes and digital inks in a wide range of end-markets including apparel, sportswear, institutional textiles and furnishings.

Reasons To Sell:

- ▼ Huntsman is exposed to demand weakness in major markets globally. It is seeing weak demand in automotive and construction in Europe, hurting its Polyurethanes segment. A difficult macroeconomic environment coupled with geopolitical issues including Brexit are affecting customers' behavior. Regulatory changes (affecting production) are also affecting automotive in Europe. The company expects headwinds to continue across these markets. Demand also remains weak in China, hurt by the U.S-China trade conflict, outbreak of coronavirus and economic weakness in that country. Also, the demand and margins in component and polymeric systems is likely to remain challenging in the short-term, especially in Europe and Asia. Soft market conditions in the North American unsaturated polyester resin and across most of the European markets are exerting pressure on maleic anhydride business volumes. The company expects demand headwinds in several major markets and regions for the Polyurethanes unit in 2020.
- ▼ The company's Performance Products business is facing challenges from lower margins in the ethylene amines business as witnessed in the recently reported quarter. Revenues in the segment declined 10% to \$278 million in the last reported quarter due to reduced selling prices as well as lower sales volumes. The downside was caused mainly by weaker end market demand in ethylene amines and maleic. Huntsman expects weak demand in the maleic anhydride in 2020. The Performance Products unit is also exposed to lower industrial demand, especially in automotive.
- ▼ Huntsman faces headwind from higher raw material costs. Prices of the company's raw materials follow the price trends of crude oil and natural gas feedstocks. The stricter environmental policy in China has led to the tightening in the supply of certain key raw materials. The company saw an unfavorable impact from elevated raw material costs in its performance products unit in the recently reported quarter. Raw material costs also remain a headwind for its Advanced Materials unit. As such, higher feedstock costs are expected to put some pressure on margins.
- ▼ The company's high debt level is another concern. The company's long-term debt was around \$2,561 million at the end of fourth-quarter 2019, up from \$2,553 million in the sequentially prior quarter. Its debt-to-total capital ratio stood at 0.50 as of Dec 31, 2019, higher than its industry's 0.42. As such, the company appears to have a higher default risk.

Huntsman faces headwinds from higher raw material cost. It is also seeing weak demand in automotive and construction markets in Europe. Demand also remains weak in China.

Risks

- Huntsman remains committed to grow its downstream specialty and formulation businesses and is shifting its MDI business from components to differentiated systems that typically have higher margins and lower volatility. The company is seeing healthy demand for MDI, which has been growing around 6%-7% globally a year driven by megatrends and material substitution. In the last reported quarter, the total global differentiated systems volumes rose 7% year over year and global component MDI volumes expanded 5%. The core Polyurethanes segment, which accounted for more than half of Huntsman's revenues last year, is poised for strong upside on the back of the company's focus on beefing up its high-value differentiated downstream portfolio. Substitution of MDI for less effective materials will remain a key driving factor for the MDI business.
 - The buyout of Demilec, a leading manufacturer and distributor of spray polyurethane foam (SPF) insulation systems in North America, is also expected to offer significant synergies. The integration of Demilec into its Polyurethanes business delivers considerably higher and stable margins along with offering significant synergies by pulling large quantities of upstream polymeric MDI into specialized spray foam systems. The integrated business is likely to have more than 25% EBITDA margins and double-digit growth.
 - Huntsman is focused on expanding its margins and generating strong free cash flows. The company generated free cash flow of \$389 million in 2019. It expects to generate strong free cash flow in 2020. It projects a free cash flow conversion between 20% and 25% in 2020. Also, the company's board has also approved an increase in its earlier authorized share repurchase program to up to \$1 billion. The company has repurchased around 10.1 million shares worth roughly \$208 million in 2019. Moreover, from Jan 1, 2020 through Jan 31, 2020, the company repurchased an additional 336,478 shares of its common stock for around \$7 million.
-

Last Earnings Report

Huntsman's Earnings and Revenues Beat Estimates in Q4

Huntsman swung to a profit of \$308 million or \$1.34 per share in fourth-quarter 2019 from a loss of \$315 million or \$1.43 in the year-ago quarter.

Barring one-time items, adjusted earnings per share were 29 cents in the quarter, down from 38 cents in the year-ago quarter. The figure topped the Zacks Consensus Estimate of 28 cents.

Revenues were \$1,657 million, down around 9% year over year. However, it surpassed the Zacks Consensus Estimate of \$1,584.7 million. The company saw lower sales across its business segments in the reported quarter. It witnessed lower volumes and prices in most of its businesses.

Quarter Ending **12/2019**

Report Date	Feb 13, 2020
Sales Surprise	4.57%
EPS Surprise	3.57%
Quarterly EPS	0.29
Annual EPS (TTM)	1.79

Full-Year Results

Earnings for 2019 were \$2.44 per share, up from \$1.39 per share a year ago. Adjusted earnings per share for the year were \$1.53, down from \$2.66 a year ago.

Revenues were \$6,797 million for the full year, down around 11% year over year.

Segment Highlights

Polyurethanes: Revenues in the segment fell 3% year over year to \$980 million due to lower MDI (methylene diphenyl diisocyanate) average selling prices, which were partly offset by higher MDI sales volumes.

Performance Products: Revenues in the unit declined 10% to \$278 million due to reduced average selling prices as well as lower sales volumes.

Advanced Materials: Revenues in the unit dropped 9% to \$241 million due to lower average selling prices and sales volumes.

Textile Effects: Revenues in the division were down 7% to \$180 million. The decline was due to lower sales volumes and average selling prices. Volumes were affected by softer demand as a result of uncertainties surrounding the trade conflict.

Financials

Huntsman had total cash of \$525 million at the end of 2019, up around 54% year over year. Long-term debt was \$2,177 million, down around 2% year over year.

Net cash provided by operating activities from continuing operations was \$656 million in 2019 compared with net cash provided by operating activities of \$704 million in 2018. Huntsman generated free cash flow of \$389 million in 2019 compared with \$454 million a year ago.

The company repurchased around 10.1 million shares worth roughly \$208 million in 2019.

Outlook

Moving ahead, Huntsman noted that it will remain focused, in 2020, on investing in its downstream and specialty platforms both through acquisitions and organically. It will also remain balanced in its capital allocation including opportunistic share repurchases and maintaining a competitive dividend.

For the Polyurethanes unit, Huntsman expects demand headwinds in several major markets and regions in 2020. It also anticipates differentiated MDI margins to be stable.

For Performance Products, the company sees growth in performance amines. It also expects weak demand in the maleic anhydride with stable margins.

For Advanced Materials, the company expects stable overall margins amid weakness in industrial markets and demand headwind in aerospace.

For Textile Effects unit, Huntsman expects growth in specialty products. It also sees stable volumes and improved margins.

Recent News

Huntsman to Acquire CVC Thermoset Specialties for \$300M – Mar 16, 2020

Huntsman has announced a deal to acquire CVC Thermoset Specialties, a North American specialty chemical producer that serves the industrial composites, adhesives and coatings markets.

CVC Thermoset Specialties is part of Emerald Performance Materials LLC and has annual revenues of roughly \$115 million, with two production facilities located in Akron, OH, and Maple Shade, NJ.

Per the terms of the deal, Huntsman is expected to pay \$300 million in the all-cash transaction financed from available liquidity, subject to customary closing adjustments. The purchase price reflects an adjusted EBITDA multiple of around 10 times or between roughly 7-8 times pro forma for synergies based on 2019. Notably, the transaction is slated to close in the middle of 2020.

Per Huntsman, the CVC Thermoset Specialties acquisition adds an important complementary technology breadth to its portfolio of Advanced Materials and the latter's unique products can make systems, using Huntsman's class-leading epoxy-based material, even tougher, stronger, and more robust. The buyout will also improve Huntsman's ability to generate differentiation in customers' applications, especially through its strong formulation business. Huntsman anticipates generating substantial synergies within two years.

Huntsman Announces Quarterly Dividend – Feb 24, 2020

Huntsman's board has declared a cash dividend of 16.25 cents per share on its common stock. The dividend was paid on Mar 31, 2020 to stockholders of record as of Mar 13, 2020.

Valuation

Huntsman's shares are down 30.3% in the year-to-date period and down 27.1% over the trailing 12-month period. Stocks in the Zacks Chemical - Diversified industry and Zacks Basic Materials sector are down 25.4% and 19.2% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry and sector are down 34.7% and 20.1%, respectively.

The S&P 500 index is down 10.8% in the year-to-date period and 3% in the past year.

The stock is currently trading at 13.62X forward 12-month earnings, which compares to 13.35X for the Zacks sub-industry, 13.68X for the Zacks sector and 20.2X for the S&P 500 index.

Over the past five years, the stock has traded as high as 15.16X and as low as 3.8X, with a 5-year median of 9X.

Our Underperform recommendation indicates that the stock will perform worse than the market. Our \$14 price target reflects 11.32X forward 12-month earnings per share.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	D
Momentum Score	C
VGM Score	D

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
