Summary

IMAX shares have underperformed the industry in the past six months. IMAX's significant exposure to China, its second largest revenue generating market, is a concern. Management expects slump in IMAX China box office in the near term, primarily due to the coronavirus outbreak. The company postponed theatrical releases planned for the Chinese New Year holiday, which is expected to hurt top-line growth. Further, IMAX faces significant competition in the out-of-home entertainment industry. Moreover, higher marketing expenses are expected to hurt profits in the near term. However, IMAX reported impressive fourth-quarter 2019 results that benefitted from strong growth in network and theater business driven by strength in gross box office from IMAX DMR films, partially offset by a decrease in new business and other segments.

Overview

Headquartered in Mississauga, Canada, IMAX is a leading global entertainment technology, specializing in motion picture technologies and presentations.

The company reported revenues of \$395.7 million in 2019. It generates revenues primarily from four main groups: Network business (49.7% of 2019 revenues), Theater business (45.6%), New business (0.7%) and other (3.9%).

The company primarily offers IMAX Digital Re-Mastering (DMR) and IMAX Theater Systems. IMAX DMR digitally re-masters Hollywood films into IMAX digital cinema package format or 15/70-format film for exhibition in its theaters.

In 2019, 60 films were converted through the IMAX DMR process and released at theaters in the IMAX network by film studios compared to 70 films in 2018.

The company recently introduced IMAX with Laser, its next-generation laser projection system designed for IMAX theaters, in commercial multiplexes.

The company has signed IMAX with Laser agreements with leading, global exhibitors such as AMC Entertainment, Cineworld Group, Les CinémasPathé Gaumont and others for a total of 139 new theaters, 147 upgrades to existing IMAX theaters and 52 upgrades to existing backlog arrangements.

As of Dec 31, 2019, the company's backlog had 144 new IMAX with Laser systems, 92 upgrades to IMAX with Laser systems and has installed 130 IMAX with Laser systems.

Moreover, as of Dec 31, 2019, IMAX had an installed base of 1,624 theater systems — 1,529 commercial multiplex, 14 commercial destination, 81 institutional — operating in 81 countries.

The company is also exploring new businesses like Home Entertainment and investing in original content.

In September 2018, the company announced a new home entertainment licensing and certification program called IMAX Enhanced. Notable partners of the program were Sony Electronics, Sony Pictures, Paramount Pictures and Sound United.

Moreover, in 2017, IMAX piloted a virtual reality (VR) initiative that included several pilot IMAX VR Centers located in a number of multiplexes and a stand-alone venue, each retrofitted with proprietary VR pods that permitted interactive, moveable VR experiences. However, in December 2018, the company decided to close its VR locations as part of its strategic review.

Reasons To Sell:

- ▼ IMAX's significant exposure to China, its second largest revenue generating market, is a concern. Greater China continues to be IMAX's largest market, with approximately 31% of overall revenues generated in 2019. Moreover, the company postponed theatrical releases due to the coronavirus breakout in China, which is expected to hurt its top-line growth in the near term.
- ▼ Moreover, IMAX faces significant risk from foreign currency volatility as it derives a significant portion of its revenues from International markets.
- ▼ IMAX faces significant competition in the out-of-home entertainment industry. Moreover, the continuing evolution of home video, pay-per-view, streaming services, video-on-demand, DVD, Internet and syndicated and broadcast television also presents significant threat to IMAX's growth prospects.

Significant exposure to China, exposure to foreign exchange volatility, significant competition and failure of new businesses to gain traction are headwinds.

Risks

- IMAX is benefiting from studios' increasing emphasis on releasing franchise content and consumers' growing desire to experience this content in differentiated ways. The launch of cutting-edge IMAX with Laser in April 2018 is a key differentiator in this regard. The offering has gained significant adoption within a short span of time (more than 200 agreements since launch). Additionally, the company stated that partners like Cineworld, AMC Networks and Pathé are increasingly installing IMAX Laser systems, which is a positive.
 - Growing number of blockbuster movies like *Avengers:Endgame*, *Captain Marvel*, *Lion King*, *Spider-Man*, *Joker*, *Terminator: Dark Fate*, *Frozen II*, *Jumanji: The Next Level* and *Star Wars Episode IX* is a key catalyst for IMAX. Further, a strong slate of releases, including *Wonder Woman 1984*, *No Time To Die* (newest instalment in the James Bond franchise), Chris Nolan's latest sci-fi epic, *TENET*, Paramount's *Top Gun: Maverick* and *Detective Chinatown 3*, Marvel's *Black Widow* and *Eternals* to *Fast 9* as well as local language titles are likely to drive growth in 2020. Moreover, the company is expected to gain from the launch of new pricing programs, which are expected to increase foot traffic, thereby driving IMAX's top-line growth in the long haul.
 - International market is a major growth driver for IMAX. The company signed several deals in 2019 across China, the Middle East and Japan. The company's growing focus on China increased box office contribution from Greater China driven by blockbuster Hollywood and Chinese language titles. Moreover, partnership with ticketing platform Maoyan and growth in IMAX theaters in the country boosted box-office revenues.
