Summary

Shares of Invesco have underperformed the industry in the past year. Its earnings have outpaced the Zacks Consensus Estimate in two of the trailing four quarters. Its first-quarter 2020 results reflect higher net outflows due to increased market volatility. Increasing outflows are expected to result in a decline in assets under management (AUM) balance. Therefore, the company's revenues will likely be under pressure in the near term. While the efforts to capitalize on investors' demand for different investment strategies and synergies from acquisitions will support growth, continuously increasing operating expenses will likely hurt the bottom line to some extent. The presence of high debt levels remains a near-term concern. Its efforts to enhance liquidity by slashing dividends and suspending buybacks are negatives for retail investors.

Overview

Headquartered in Atlanta, GA, Invesco Ltd., – formerly AMVESCAP PLC – operates as an independent investment manager and offers a wide range of investment products and services. The company was inceptioned in 1935. As of Mar 31, 2020, Invesco had offices in more than 20 countries and AUM worth \$1,053.4 billion.

With the support of a global operating platform, Invesco distributes a broad range of investment products and services. Invesco's asset classes include money market, fixed income, balanced income, equity and alternatives.

Invesco sells its products through two principal distribution channels:

- **Retail:** Invesco offers retail products within all of the major asset classes in the form of mutual funds, separately managed accounts, variable annuities, collective trusts and ETFs. The retail product management teams collectively managed \$702.5 billion in assets as of Mar 31, 2020.
- **Institutional:** Invesco offers a broad range of domestic and global products to institutional investors, which include traditional equities, structured equities, fixed income, real estate, private equity, financial structures and absolute return strategies. AUM for the channel totaled \$350.9 billion as of Mar 31, 2020.

In 2010, Invesco completed the Van Kampen/Morgan Stanley deal. In 2013, it divested Atlantic Trust Private Wealth Management to Canadian Imperial Bank of Commerce.

In 2017, Invesco acquired Europe-based Source. In 2018, it acquired the ETF business of Guggenheim Partners LLC and the leading U.K.-based advisor-focused digital solutions firm, Intelliflo. In 2019, the company acquired OppenheimerFunds, Inc.

Reasons To Sell:

- ▼ Invesco's operating expenses have increased at a four-year (2016-2019) CAGR of 14%, with the trend continuing in first-quarter 2020. Rise in compensation costs and marketing expenses are the primary reasons for this increase. While the company realized net cost synergies of \$501 million from the OppenheimerFunds acquisition, exceeding the target of \$475 million; operating expenses are likely to flare up in the upcoming quarters, given its inorganic growth efforts and investment in franchise.
- ▼ Invesco has been actively involved in capital deployment activities. Since 2009, it has been increasing its dividend annually, with the latest announcement in April 2019. Also, the company has a share repurchase plan in place. However, as the company is focused on improving financial strength and improving liquidity, it slashed quarterly dividend by 50% and doesn't foresee additional share buyback this year on the assumption of continuation of the current unfavorable operating backdrop.
- ▼ High debt level of the company could restrict it from procuring additional finance for working capital, capital expenditures, acquisitions, debt service requirements or other purposes. As of Mar 31, 2020, Invesco's long-term debt amounted to \$2.6 billion (nearly 7% of total assets). High-debt obligation, if combined with unfavorable economic and industry conditions, can drag the company to a relatively disadvantageous position.
- ▼ The goodwill and intangible assets on Invesco's balance sheet are subject to annual impairment reviews. As of Mar 31, 2020, goodwill and net intangible assets remained at considerably high levels, totaling \$15.9 billion (accounting for 42.9% of total assets). Several factors may initiate the impairment of the book value of such assets, due to which their value may have to be written down. This will adversely affect the company's financials.
- ▼ Invesco's trailing 12-month return on equity (ROE) undercuts its growth potential. The company's ROE of 10.97% compares unfavorably with ROE of 12.21% for the industry and 16.60% for the S&P 500. This indicates that the company is less efficient in using shareholders' funds.
- ▼ Shares of Invesco have underperformed the industry over the past six months. Also, the company's 2020 earnings estimates have been revised 13.7% downward over the past 30 days. Hence, given the concerns and downward estimate revisions, the price performance is not expected to improve in the near term.

Rising costs resulting from higher compensation and marketing expenses, and acquisitions will likely impede bottom-line growth. Also, presence of high levels of debt remains a major near-term concern.

Risks

- Invesco's top-line growth looks impressive. Net revenues witnessed a six-year (2014-2019) CAGR of 4.1%, with momentum continuing in the first quarter of 2020. The increase was mainly driven by solid AUM balance and OppenheimerFunds buyout. The company's diverse product offerings and alternative investment strategies will continue to attract investors, which are expected to support revenue growth. Given a robust institutional pipeline, solid retail channel, and synergies from opportunistic acquisitions, the company's revenues will continue to improve in the quarters ahead.
 - Invesco's AUM has been witnessing consistent improvement. Though total AUM declined in 2018 and in first-quarter 2020 owing to significant market volatility, the same witnessed a CAGR of 9.1% over the last six years (2014-2019). The acquisition of OppenheimerFunds resulted in a rise in the company's AUM, making it one of the leading global asset managers. The company has been capitalizing on growing demand for passive products and alternate asset classes that were 23.4% and 15.4%, respectively, of total AUM as of Mar 31, 2020.
 - Apart from a strong presence in the United States, Invesco maintains a solid foothold in Europe, Canada and the Asia-Pacific. As of Mar 31, 2020, the company's client AUM from outside the United States constituted 28.2% of total AUM. Acquisitions of the leading U.K.-based advisor-focused digital solutions firm, Intelliflo and Europe-based Source, a leading, independent specialist provider of ETFs to improve market share globally continue to support the company's global presence. This, along with its broad diversification will help the company generate further momentum from business in these regions.
 - Further, Invesco seems undervalued compared with the broader industry. Its current price-to-book and price-to-earnings (F1) ratios are lower than the respective industry averages. Also, it has a Value Score of A.
-

Last Earnings Report

Invesco Misses on Q1 Earnings, Revenues & AUM Rise

Invesco reported first-quarter 2020 adjusted earnings of 34 cents per share, missing the Zacks Consensus Estimate of 56 cents. Also, the bottom line declined 39.3% from the prior-year quarter.

Increase in operating expenses and net outflows were the major headwinds amid coronavirus scare. Yet, a rise in AUM balance and higher revenues — driven by the OppenheimerFunds buyout — were the supporting factors.

On a GAAP basis, net income attributable to common shareholders came in at \$81.5 million or 18 cents per share, down from \$177.7 million or 44 cents per share a year ago.

Revenues & Expenses Rise

GAAP operating revenues in the quarter were \$1.60 billion, increasing 31.6% year over year. However, the figure missed the Zacks Consensus Estimate of \$1.71 billion. Adjusted net revenues jumped 29.2% from the prior-year quarter to \$1.15 billion.

Adjusted operating expenses were \$733.1 million, up 21.6% from the prior-year quarter.

Adjusted operating margin was 36.0% compared with 32.0% a year ago.

AUM Improves

As of Mar 31, 2020, AUM was \$1.05 billion, increasing 10.3% year over year. Average AUM in the first quarter totaled \$1.18 billion, up 26.1% from the year-ago quarter. AUM growth was mainly driven by the closure of the deal to acquire OppenheimerFunds in May 2019, partially offset by long-term net outflows of \$19.1 billion.

Share Repurchase Update

During the first quarter, Invesco didn't repurchase any shares.

Outlook

Management expects revenues to remain under pressure in the near term, similar to first-quarter 2020, as outflows continue to hurt AUM balance.

The company now expects quarterly operating expenses to be around \$675 million for the remainder of 2020 (down from prior guidance of \$755 million), mainly owing to decline in compensation as well as G&A and marketing costs.

Quarter Ending **03/2020**

Report Date	Apr 23, 2020
Sales Surprise	-6.26%
EPS Surprise	-39.29%
Quarterly EPS	0.34
Annual EPS (TTM)	2.33

Recent News

Dividend Update

On Apr 23, Invesco declared a quarterly dividend of 15.5 cents per share, representing a cut of 50% from the prior payout. The dividend will be paid out on Jun 3 to shareholders of record as of May 11.

Valuation

Invesco's shares are down 66.4% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Finance sector are down 27.2% and 23.1% over the past year, respectively.

The S&P 500 index is down 4.9% in the past year.

The stock is currently trading at 2.72X forward 12 months earnings, which compares to 11.71X for the Zacks sub-industry, 13.72X for the Zacks sector and 19.51X for the S&P 500 index.

Over the past five years, the stock has traded as high as 15.01X and as low as 2.72X, with a 5-year median of 11.24X. Our Underperform recommendation indicates that the stock will perform worse than the market. Our \$6.50 price target reflects 2.44X forward earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	F
Momentum Score	A
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
