Summary

Kronos Worldwide's earnings and sales for the second quarter of 2020 beat the respective Zacks Consensus Estimate. The company should gain from higher demand for TiO2. Demand for TiO2 is growing on the back of healthy consumptions across Western Europe and North America. New product development and a solid customer base will also work in the company's favor. The company has also outperformed the industry it belongs to over the past year. However, the company is exposed to challenges from declining TiO2 selling prices. Lower average selling prices are denting sales and profits. Higher raw material costs are another concern. Kronos Worldwide is witnessing higher cost of third-party feedstock ore, which is hurting its profitability. Higher production costs are anticipated to put pressure on the bottom line in 2020.

Overview

Dallas, TX-based Kronos Worldwide, Inc. is a leading producer and marketer of titanium dioxide (TiO₂), a white pigment for providing whiteness, brightness and opacity that is used in a broad range of products. TiO₂ is a key component of applications such as coatings, plastics and paper, inks, food and cosmetics and is the biggest commercially used whitening pigment.

TiO₂ is broadly considered to be superior to other white pigments mostly due to its opacity that is the ability to cover or mask other materials efficiently and effectively. It is developed and marketed based on specific end-use applications.

The company provides its customers a vast portfolio of products that include more than 40 different TiO₂ pigment grades that offer a number of performance properties to address customers' specific needs. Its major customers include domestic and international paint, plastics, decorative laminate and paper makers.

For coatings, TiO₂ is used to provide opacity, durability, tinting strength and brightness in industrial coatings, and coatings for commercial and residential interiors and exteriors, automobiles, aircraft, machines, appliances and traffic paint, among others. For plastics, TiO₂ improves the optical and physical properties of plastics, including whiteness and opacity. The company's TiO₂ is also used in the production of several types of paper including laminate paper and filled paper.

Kronos Worldwide is among the top six producers of TiO₂ globally. It produced 546,000 metric tons of TiO₂ in 2019, up 1.9% year over year. Sales of the company's core TiO₂ pigments accounted for around 94% of its total sales in 2019.

Kronos Worldwide along with its distributors and agents market and provide technical services for its products in about 100 countries. The company's primary markets are North America (19% market share in 2019) and Europe (18%). Europe, North America, Asia Pacific and Rest of the World accounted for 46%, 34%, 10% and 10% of its TiO₂ sales volumes in 2019. Coatings, plastics, paper and other accounted for 57%, 28%, 5% and 10% of sales volumes last year.

Roughly 50% of the company's common stock was owned by Valhi, Inc. (VHI) and around 30% was owned by a fully-owned subsidiary of NL Industries, Inc. (NL) at the end of 2019.

Reasons To Buy:

- ▲ Kronos Worldwide's shares are up 21.3% in the past year, outperforming the industry's rise of 6.8%. The company should gain from rising demand for TiO₂. Demand for TiO₂ has been growing at an annual rate of 3% over the last several years on the back of strong consumptions across Western Europe and North America. The company is seeing strong demand for its TiO₂ products across most segments, which is expected to continue moving ahead. In particular, markets for TiO₂ are rising in South America, Eastern Europe, the Asia Pacific region and China. The company expects demand to grow 2-3% annually over the long term.
- ▲ Development of new products and improvement of existing facilities as well as solid customer base in paper, coatings, and plastics end markets and overseas markets are likely to work in the company's favor. Also, strengthening operations in international arenas and effective marketing strategies will be advantageous. Research and development, aimed at uplifting the product quality, production process and application areas, also remain a priority for Kronos Worldwide.
- ▲ The company had total long-term debt of \$516 million at the end of the second quarter of 2020, essentially flat compared with the sequentially prior quarter. Its current debt at the end of the second quarter was roughly \$2 million. Its total debt-to-total capital stood at 39.2% as of Jun 30, 2020, lower than its industry's 46.9%. With cash and cash equivalents of roughly \$341 million at the end of the second quarter, the company has adequate liquidity to meet its short-term debt obligations.

Kronos Worldwide should gain from higher demand for TiO₂. New product development and a solid customer base will also work in the company's favor.

Reasons To Sell:

- ▼ Kronos Worldwide faces challenges from weak selling prices. The company's average selling prices for the second quarter of 2020 was 1% lower on a year-over-year basis. Lower average selling prices are likely to continue to weigh on the company's sales and bottom line moving ahead.
- ▼ The company is exposed to raw material cost inflation. It is seeing higher cost of third-party feedstock ore as witnessed in the last reported quarter, which is hurting its profitability. The company saw higher cost of third-party feedstock ore it purchased in the quarter, which impacted margins. The company expects cost of sales per metric ton of TiO₂ sold in 2020 to be higher year over year due to higher feedstock costs.
- ▼ Kronos Worldwide is facing headwinds from higher production costs, which is weighing on its bottom line. Increased production costs contributed to a decline in earnings in the last reported quarter. Higher production costs remain a headwind moving ahead and are expected to hurt the company's profits in 2020.

Kronos Worldwide faces challenges from declining TiO₂ selling prices. Higher raw material and production costs are also expected to weigh on its margins.

Last Earnings Report

Kronos Worldwide's Earnings & Sales Beat Estimates in Q2

Kronos Worldwide logged a profit of \$18.6 million or 16 cents per share in second-quarter 2020, down from \$29.5 million or 25 cents per share in the year-ago quarter. Earnings, however, beat the Zacks Consensus Estimate of 4 cents.

The bottom line in the reported quarter was impacted by lower sales volumes, lower average TiO2 selling prices, increased raw materials and other production costs.

Net sales fell 20% year over year to \$386 million, hurt by lower sales volumes and lower average TiO2 selling prices. However, the figure beat the Zacks Consensus Estimate of \$369.9 million.

Volumes and Pricing

The company's TiO2 sales volumes fell 22% year over year due to lower volumes in all major markets mainly on account of lower demand associated with the coronavirus pandemic. TiO2 production volumes were down 2% year over year in the reported quarter.

Average TiO2 selling prices were down 1% year over year in the reported quarter.

Financials

Kronos Worldwide ended the quarter with cash and cash equivalents of \$341.4 million, up 3.9% year over year. Long-term debt was \$445 million, down 1.6% year over year.

Net cash provided by operating activities was \$18.1 million for the six months ended Jun 30, 2020.

Outlook

Kronos Worldwide said that the coronavirus pandemic impacted its operations through lower demand for the products, resulting in reduced sales and earnings for the second quarter.

The company expects the U.S. and global gross domestic product to be considerably impacted for an indeterminate period. Factoring in the impacts of the pandemic on the world economy, it envisions its sales volumes and earnings to be lower than the prior periods for the balance of 2020.

Quarter Ending 06/2020

Report Date	Aug 05, 2020
Sales Surprise	4.35%
EPS Surprise	300.00%
Quarterly EPS	0.16
Annual EPS (TTM)	0.63

Valuation

Kronos Worldwide's shares are down 3.8% in the year-to-date period and up 21.3% over the trailing 12-month period. Stocks in the Zacks Chemical - Diversified industry and Zacks Basic Materials sector are down 6.2% and up 0.4% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry and sector are up 6.8% and up 12.8%, respectively.

The S&P 500 index is up 3.3% in the year-to-date period and up 17.5% in the past year.

The stock is currently trading at 8.83X trailing 12-month enterprise value-to EBITDA (EV/EBITDA) ratio, which compares to 8.46X for the Zacks sub-industry, 10.9X for the Zacks sector and 12.55X for the S&P 500 index.

Over the past five years, the stock has traded as high as 36.41X and as low as 2.67X, with a 5-year median of 7.11X.

Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$14 price target reflects 2.02X tangible book value.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	A
Growth Score	D
Momentum Score	C
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
