Summary

Lockheed Martin, being the largest defense contractor in the world, enjoys strong demand for its high-end military equipment in domestic and international markets. Expansionary budgetary provisions made by the current U.S. administration will immensely boost this defense prime's business. It continues to be a strong cash generator, which helps it take important cash deployment decisions. In a year's time, Lockheed Martin has outperformed the industry. However, the company's higher debt-to-equity ratio shows that the stock is highly leveraged when compared with its industry. Lockheed Martin also faces intense global competition for its broad portfolio of products and services. Furthermore, forced cost reduction initiatives for the F-35 program might hamper its operating results.

Overview

Lockheed Martin Corporation is the largest defense contractor in the world. Its main areas of focus are in defense, space, intelligence, homeland security and information technology including cyber security. In 2018, 70% of the company's net sales were from the U.S. Government (including 60% from the Department of Defense (DoD), 28% were from international customers and 2% were from U.S. commercial and other customers. The company currently operates through the following four businesses: Aeronautics, Missiles and Fire Control (MFC), Rotary and Missions Systems (RMS) and Space Systems.

Aeronautics is engaged in the design, research and development, systems integration, production and support of advanced military aircraft and related technologies. This segment includes programs like F-35 Lightning II Joint Strike Fighter; C-130 Hercules; F-16 Fighting Falcon; F-22 Raptor; and C-5M Super Galaxy. It generated sales of \$23.69 billion in 2019, accounting for 39.6% of the total sales.

In the **MFC** business, headquartered in Dallas, some of its high-profile programs include the Terminal High Altitude Area Defense System, Joint Light Tactical Vehicle, PAC-3 Missiles, as well as logistics and other technical services from GTL. It generated sales of \$10.13 billion in 2019, constituting 16.9% of total sales.

In the **RMS** business, headquartered in Washington, DC, some of its high-profile programs include the Aegis Combat System, Littoral Combat Ship, MH-60 helicopter avionics, as well as military and commercial orders. It generated sales of \$15.12 billion in 2019, comprising 25.3% of the total sales.

Space Systems is engaged in the design, development, engineering, and production of commercial and military space systems. It generated sales of \$10.86 billion in 2019 or 18.2% of the total sales.

Lockheed Martin ended the fourth quarter (on Dec 31, 2019) with \$144 billion in backlog, up 4.8% from \$137.4 billion at the end of fourth-quarter 2018.

Reasons To Buy:

- ▲ **Solid Order Growth:** Keeping up with its trend of securing big contracts from the Pentagon, Lockheed Martin was successful in clinching several notable deals during the fourth quarter. These include a \$7-billion contract for providing the U.S. Air Force with F-22 Raptor sustainment, which provides an option for additional five-year ordering for comprehensive F-22 air vehicle sustainment. Its Aeronautics division also clinched a modification contract for the production and delivery of 14 F-35A aircraft from the 15th lot during the quarter, valued at \$831 million. The company's Sikorsky Aircraft unit also secured a deal for the production of Black Hawk helicopters, valued at \$556.2 million. Such significant contract wins bolster revenue growth prospects for Lockheed Martin over the long run, thereby enabling it to outperform the industry. Consequently, the company's total backlog increased \$6.6 billion during the fourth quarter and is now approximately \$144 billion, reaching a record level for the fifth consecutive year. Such developments may have boosted investor's confidence in the stock. In a year's time, shares of Lockheed Martin have gained 32.5% against the industry's decline of 5.5%.
- ▲ **F-35 - A Prime Program:** Lockheed Martin is the largest U.S. defense contractor with a platform-centric focus that guarantees a steady inflow of follow-on orders from a leveraged presence in the Army, Air Force, Navy and IT programs. Notably, the F-35 program continues to be a key growth driver for the company, which recognized orders of approximately \$5 billion in the fourth quarter and added 374 production aircraft in backlog as of Dec 31, 2019. The company's Aeronautics unit witnessed 8.5% annual top-line growth in the fourth quarter, with the F-35 program being a prime contributor. Furthermore, in 2019, Lockheed Martin delivered 134 F-35 aircraft, exceeding its joint government and industry target of 131 aircraft, with approximately a 50% improvement from last year delivery figures. With the company consistently increasing production of F-35 jets, these delivery figures are expected to rise in the coming days, enabling Lockheed Martin to meet its target of achieving full-rate production for F-35 over the next few years.
- Moreover, production of the F-35 jets is expected to continue for many years ahead, given the U.S. government's current inventory target of 2,456 aircraft for the Air Force, Marine Corps and Navy. Consequently, we may expect Lockheed Martin to witness more order inflows for F-35, in coming days, which in turn should significantly bolster this defense contractor's top line.
- ▲ **Impressive Budgetary Attributes:** As part of the fiscal 2020 defense budget, \$718.3 billion is being kept as funding for the Pentagon, reflecting 5% growth over the fiscal 2019 budget. This increased spending provision highlights the U.S. government's decision to spend more on defense primes like Lockheed Martin. Notably, the budget has allotted \$11.2 billion for procurement of 78 F-35 Joint Strike Fighters. The financial plan also includes an investment plan of \$1.7 billion for the procurement of 37 AEGIS Ballistic Missile Defense and \$0.8 billion for 37 THAAD missiles. All these expansionary budgetary provisions will immensely boost this defense prime's business.
- ▲ **International Foray:** Apart from enjoying a strong forte in the domestic front, Lockheed Martin's products are also well acclaimed in the international market. In recent times, the company is witnessing increased demand for its THAAD missiles from the Kingdom of Saudi Arabia (KSA). Moreover, PAC-3 programs are undergoing production and sustainment activities in the KSA, UAE, Qatar, the Republic of Korea, Japan and Taiwan. The company's Missiles and Fire Control unit saw the highest overall growth in 2019, increasing 20% year over year. Deliveries of tactical and strike weapons, development work on new hypersonic and classified programs, and PAC-3 missile production were the strongest contributors. Further, its Space Systems unit was awarded a \$3.3-billion 10-year IDIQ contract for the combined orbital operations, logistics and resiliency, or COOLR program during the quarter, to support the nation's nuclear command and control system. Such developments should boost the company's international sales in the days ahead and aid long-term growth, with more and more nations strengthening their defense arsenals across the world.
- ▲ **Stable Cash Flow:** Lockheed Martin continues to be a strong cash generator, which helps it take important cash deployment decisions. During the fourth quarter, the company bought back 1.3 million of shares for \$490 million and paid out dividends worth \$675 million to its shareholders, reflecting an 8.5% increase year over year. Additionally, Lockheed Martin's cash from operations at the end of fourth-quarter 2019 amounted to \$7.31 billion compared with \$3.14 billion a year ago. This reflects solid operational improvements for the company. Lockheed Martin further increased its dividend by 9% and exceeded its share repurchase objective by \$200 million in the fourth quarter. This reflects the solid financial position that this jet-maker boasts, which enables it to hike its cash distribution to shareholders.

Lockheed Martin is the largest U.S. defense contractor with a platform-centric focus that guarantees a steady inflow of follow-on orders from a leveraged presence in the Army, Air Force, Navy and IT program

Reasons To Sell:

▼ **Lower F-35s in Budget:** The Pentagon surprised many by cutting back on the number of F-35 stealth fighters in the fiscal 2020 budget from what it has asked Congress to pay for this year. Notably, the Pentagon has provisioned funding for 78 F-35 jets in the latest budget, down from the 84 fighter jets the Defense Department had projected for 2020. By lowering the F-35 count, the Pentagon has provisioned for buying eight new Boeing F-15EX jets. Such lowering the number of F-35 jets in the budget reflects a slight decline in its demand from the U.S. government, which might hurt Lockheed Martin's profitability in near-term.

F-35 program's cost issues and intense competition might hurt the company's growth trajectory.

▼ **A Highly Leveraged Stock:** Debt-to-equity is a liquidity ratio that indicates the amount of financial risk a company bears. A company with a higher debt-to-equity ratio shows deteriorating solvency for a company. This is because while debt brings with it the capacity to spend a little bit more, it also carries the burden of repayment with additional interest in the future. As a result, prudent investors try to avoid companies with large debt loads since they are more vulnerable during economic downturns.

Currently, Lockheed Martin's debt-to-equity ratio stands at 399.05% compared with its sector's level of 239.98%. This substantiates the fact that the stock is highly leveraged when compared to its industry and thus bears higher chance of insolvency. Therefore, investors may get attracted to other growth stocks in the same industry that bear low debt-to-equity ratio to avoid losses.

▼ **Cost Issues of F-35:** The F-35 program or the Joint Strike Fighter Program was conceived and developed by the U.S. and its allies to replace the ageing F-16s and other older fighter jets in their fleet. It is the largest as well as the costliest U.S. weapons system. As this program represents around 27% of the company's total sales, which are expected to go up in days ahead, any decision to cut spending or reduce planned orders could have an adverse impact on its financial results.

In fact, President Trump had earlier expressed his concerns for this program, claiming it to be an 'overtly expensive' one. To this end, the company has already reduced the cost structure for this jet and now plans to reduce to \$80 million or less per plane by 2020. However, the F-35A, the most common version of the aircraft, is expected to cost \$82.4 million per unit in 2020, per a report by Reuters. Moreover, according to the Defense Department's latest annual program overview, the company must find ways to reduce the Pentagon's current \$1.1 trillion estimate to own and operate the F-35 jets. Such forced cost reduction initiatives might hamper the operating results of the company.

▼ **Rising Competition:** Lockheed Martin faces intense competition for its broad portfolio of products and services, both in the domestic front as well as the global market. Particularly, it faces competitive threat from various smaller competitors, particularly in some of its services businesses. Moreover, information technology procurements are increasingly focusing on price over other competitive factors.

Last Earnings Report

Lockheed Martin Beats on Q4 Earnings, Sales Top Estimates

Lockheed Martin reported fourth-quarter 2019 earnings of \$5.29 per share, which surpassed the Zacks Consensus Estimate of \$4.99 by 6%. The bottom line also improved 20.5% from \$4.39 registered in the year-ago quarter. This year-over-year upside can be attributed to solid sales and operating profit growth.

For 2019, earnings were \$21.95 per share, which surged 24.8% from \$17.59 in the year-ago quarter. Moreover, full-year earnings figure exceeded the Zacks Consensus Estimate of \$21.64 by 1.4%.

Quarter Ending **12/2019**

Report Date	Jan 28, 2020
Sales Surprise	3.94%
EPS Surprise	6.01%
Quarterly EPS	5.29
Annual EPS (TTM)	21.94

Operational Highlights

In the reported quarter, net sales amounted to \$15.88 billion, which outshined the Zacks Consensus Estimate of \$15.28 billion by 3.9%. The reported figure also increased 10.2% from \$14.41 billion recorded a year ago. Notably, all the segments registered year-over-year growth in sales during the fourth quarter.

The company recorded operating profit of \$1.64 billion compared with the year-ago quarter's figure of \$1.51 billion.

In 2019, total revenues increased 11.3% year over year to \$59.81 billion. Full-year revenues surpassed the Zacks Consensus Estimate of \$59.19 billion by 1%.

Backlog

Lockheed Martin ended the fourth quarter (on Dec 31, 2019) with \$144 billion in backlog, up 4.8% from \$137.4 billion at the end of fourth-quarter 2019. Of this, the Aeronautics segment accounted for \$55.6 billion, while Rotary and Mission Systems contributed \$34.3 billion. While Space Systems accounted for \$28.3 billion, Missiles and Fire Control segment contributed \$25.8 billion.

Segmental Performance

Aeronautics: Sales increased 8.5% year over year to \$6.38 billion, primarily driven by higher net sales from the F-35 program owing to increased volume on sustainment and development contracts. Also, higher sales from classified programs contributed to this segment's top-line growth.

While operating profit improved 8.5% year over year to \$679 million, operating margin remained flat at 10.6%.

Missiles and Fire Control: Quarterly sales increased 14.1% year over year to \$2.77 billion owing to higher sales from tactical and strike missiles programs. Also, higher sales from integrated air and missile defense programs along with increased sensors and global sustainment programs contributed to this unit's top-line growth.

While operating profit declined 7.45% year over year to \$348 million, operating margin contracted 290 bps to 12.6%.

Rotary and Mission Systems: Quarterly sales of \$3.89 billion improved 7.6% from the prior-year quarter on account of higher net sales for training and logistics (TLS) programs, increased sales for C6ISR programs and higher sales for integrated warfare systems and sensors (IWSS) programs.

Operating profit increased 22.1% year over year to \$353 million, while operating margin improved 110 bps to 9.1%.

Space Systems: Sales improved 14% year over year to about \$2.84 billion in the fourth quarter. The uptick was driven by higher net sales from government satellite programs, Global Positioning System (GPS) III as well as strategic and missile defense programs.

Operating profit also increased 16% to \$260 million, while operating margin remained improved 20 basis points to 9.2% in the reported quarter.

Financial Condition

Lockheed Martin's cash and cash equivalents totaled \$1.51 billion as of Dec 31, 2019, compared with \$0.77 billion at the end of 2018. Long-term debt was \$11.4 billion, lower than the prior year-end level of \$12.60 billion.

Cash from operations at the end of fourth-quarter 2019 amounted to \$7.31 billion compared with \$3.14 billion a year ago.

During the reported quarter, the company repurchased 1.3 million shares for \$490 million compared with 2.25 million shares for \$666 million a year ago.

Lockheed Martin paid out dividends worth \$675 million to its shareholders in the fourth-quarter compared with the year-ago figure of \$622 million.

Guidance

Lockheed Martin issued its financial guidance for full year 2020. The company expects to generate revenues of \$62.75-\$64.25 billion. On the bottom-line front, it expects to deliver earnings per share in the \$23.65- \$23.95 band.

The company also expects to generate cash from operations of more than \$7.6 billion during the year.

Recent News

On **Feb 26, 2020**, Lockheed Martin received a direct commercial sale contract from the United Arab Emirates Air Force and Air Defence (AFAD) for expedited delivery of Sniper Advanced Targeting Pods (ATP), spares and upgrades. This contract marks the first integration of Sniper ATP on the Mirage aircraft. Deliveries of Sniper ATPs and spares will support the UAE AFAD's requirement to provide precision targeting capability for their existing Mirage 2000 fleet.

On **Feb 7, 2020**, Lockheed Martin signed a memorandum of understanding (MoU) with Navratna Defence PSU Bharat Electronics Limited (BEL) to explore industrial opportunities in the F-21 programme today at DefExpo 2020. Lockheed Martin is strengthening and growing its partnerships with the Indian industry to support the company's F-21 proposal for the Indian Air Force.

On **Feb 7, 2020**, Lockheed Martin delivered the second of two KC-130J Super Hercules aerial refuelers to representatives from France's Armée de l'Air on Feb. 4, at its Aeronautics facility in Marietta, Georgia.

On **Jan 13, 2020**, Lockheed Martin secured a multi-year contract from the U.S. Department of Defense for delivering 50 C-130J Super Hercules aircraft between 2021 and 2025. The jets will be manufactured at the company's Marietta, GA, facility. The contract, worth more than \$3 billion, will serve the U.S. Air Force, Marine Corps and Coast Guard.

On **Jan 3, 2020**, Lockheed Martin's Aeronautics business clinched a contract to offer long lead materials, parts components and effort for the production of 28 F-35 aircraft of the 15th lot. The deal was awarded by the Naval Air Systems Command, Patuxent River, MD.

Valued at \$172 million, the contract is expected to be completed by November 2023 and will cater to the U.S. Navy and Marine Corps. The majority of the task will be executed in Fort Worth, TX, El Segundo, CA and Warton, United Kingdom.

On **Jan 1, 2020**, Lockheed Martin's Aeronautics business division won a \$1.93-billion reimbursable contract in relation to the F-35 Lightning II Joint Strike Fighter Air Systems. This deal will cater to the U.S. Air Force, Marine Corps, Navy, non-Department of Defense (DoD) participants, along with foreign military sales (FMS) customers.

Work related to the deal will be performed in Fort Worth, TX; Orlando, FL; alongside other locations, and is expected to conclude by December 2020

Valuation

Lockheed Martin's shares are up 4% in the past six months and 32.5% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Aerospace sector are down 9.6% and 6.9% in the past six months, respectively. Over the past year, the Zacks sub-industry is down 5.5% while the sector is down 0.4%.

The S&P 500 index is up 5.3% in the past six months period and 11.6% in the past year.

The stock is currently trading at 16.4X of forward 12-month earnings, which compares to 20.2X for the Zacks sub-industry, 19.5X for the Zacks sector and 17.9X for the S&P 500 index.

Over the past five years, the stock has traded as high as 25.4X and as low as 12.6X, with a 5-year median of 18.1X. Our Neutral recommendation indicates that the stock will perform in line with the market. Our \$426 price target reflects 17.3X forward 12-month earnings.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	D
Growth Score	C
Momentum Score	B
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.

ZIR certifies that no part of the analysts compensation was, is, or will be, directly or indirectly, related to the specific recommendation or views expressed by the analyst in the report.

Additional information on the securities mentioned in this report is available upon request. This report is based on data obtained from sources we believe to be reliable, but is not guaranteed as to accuracy and does not purport to be complete. Any opinions expressed herein are subject to change.

ZIR is not an investment advisor and the report should not be construed as advice designed to meet the particular investment needs of any investor. Prior to making any investment decision, you are advised to consult with your broker, investment advisor, or other appropriate tax or financial professional to determine the suitability of any investment. This report and others like it are published regularly and not in response to episodic market activity or events affecting the securities industry.

This report is not to be construed as an offer or the solicitation of an offer to buy or sell the securities herein mentioned. ZIR or its officers, employees or customers may have a position long or short in the securities mentioned and buy or sell the securities from time to time. ZIR is not a broker-dealer. ZIR may enter into arms-length agreements with broker-dealers to provide this research to their clients. Zacks and its staff are not involved in investment banking activities for the stock issuer covered in this report.

ZIR uses the following rating system for the securities it covers. **Outperform-** ZIR expects that the subject company will outperform the broader U.S. equities markets over the next six to twelve months. **Neutral-** ZIR expects that the company will perform in line with the broader U.S. equities markets over the next six to twelve months. **Underperform-** ZIR expects the company will underperform the broader U.S. equities markets over the next six to twelve months.

No part of this report can be reprinted, republished or transmitted electronically without the prior written authorization of ZIR.
