Summary

Lockheed Martin enjoys strong demand for its high-end military equipment in domestic and international markets, being the world's largest defense contractor. Expansionary budgetary provisions made by the current U.S. administration will immensely boost this defense prime's business. It continues to be a strong cash generator. In a year's time, Lockheed Martin has outperformed the industry. However, Lockheed Martin faces intense global competition for its broad portfolio of products and services. Furthermore, forced cost reduction initiatives for the F-35 program might hamper its operating results. America and Turkey's tiff on the later accepting Russian products may hurt Lockheed's component supply from Turkey. It is also facing performance issues in relation to some of its products, which in turn may hurt its results.

Overview

Lockheed Martin Corporation is the largest defense contractor in the world. Its main areas of focus are in defense, space, intelligence, homeland security and information technology including cyber security. In 2019, 71% of the company's net sales were from the U.S. Government (including 61% from the Department of Defense (DoD), 28% from international customers and 1% from U.S. commercial and other customers. The company currently operates through four businesses — Aeronautics, Missiles and Fire Control (MFC), Rotary and Missions Systems (RMS) and Space Systems.

Aeronautics is engaged in the design, research and development, systems integration, production and support of advanced military aircraft and related technologies. This segment includes programs like F-35 Lightning II Joint Strike Fighter; C-130 Hercules; F-16 Fighting Falcon; F-22 Raptor; and C-5M Super Galaxy. It generated sales of \$23.69 billion in 2019, accounting for 39.6% of the total sales.

In the **MFC** business, headquartered in Dallas, some of its high-profile programs include the Terminal High Altitude Area Defense System, Joint Light Tactical Vehicle, PAC-3 Missiles, as well as logistics and other technical services from GTL. It generated sales of \$10.13 billion in 2019, constituting 16.9% of total sales.

In the **RMS** business, headquartered in Washington, DC, some of its high-profile programs include the Aegis Combat System, Littoral Combat Ship, MH-60 helicopter avionics, as well as military and commercial orders. It generated sales of \$15.12 billion in 2019, comprising 25.3% of the total sales.

Space Systems is engaged in the design, development, engineering, and production of commercial and military space systems. It generated sales of \$10.86 billion in 2019 or 18.2% of the total sales.

Lockheed Martin ended the first quarter (on Mar 29, 2020) with \$144.1 billion in backlog.

Reasons To Buy:

▲ **Solid Order Growth:** Keeping up with its trend of securing big contracts from the Pentagon, Lockheed Martin was successful in clinching several notable deals during the first quarter. These include a contract, worth more than \$3 billion for delivering 50 C-130J Super Hercules aircraft to the U.S. Air Force, Marine Corps and Coast Guard. Its Space Systems unit clinched a \$601.3-million contract for submarine-launched ballistic missile (model) Trident II D5 production and deployed systems support. Also during the quarter, its Sikorsky Aircraft unit secured a deal for supplying 38 UH-60M Army aircraft, valued at \$525.4 million. Such significant contract wins bolster revenue growth prospects for Lockheed Martin over the long run, thereby enabling it to outperform the industry. Consequently, the company's total backlog of \$144.1 billion during the first quarter reached a record level for the fifth consecutive year. Such developments may have boosted investor's confidence in the stock. In a year's time, shares of Lockheed Martin have gained 9.5% against the industry's decline of 23.2%.

Lockheed Martin is the largest U.S. defense contractor with a platform-centric focus that guarantees a steady inflow of follow-on orders from a leveraged presence in the Army, Air Force, Navy and IT program

▲ **F-35 - A Prime Program:** Lockheed Martin is the largest U.S. defense contractor with a platform-centric focus that guarantees a steady inflow of follow-on orders from a leveraged presence in the Army, Air Force, Navy and IT programs. Notably, the F-35 program continues to be a key growth driver for the company, which added 352 production aircraft in backlog as of Mar 29, 2020. The company's Aeronautics unit witnessed 14% annual top-line growth in the first quarter, with the F-35 program being a prime contributor and 22 F-35 jets being delivered during the quarter. Furthermore, during the quarter, its Aeronautics unit won a \$1.93-billion reimbursable contract in relation to the F-35 Lightning II Joint Strike Fighter Air Systems. With the company consistently increasing production of F-35 jets, delivery figures and contract acquisitions are expected to rise in the coming days, enabling Lockheed Martin to meet its target of achieving full-rate production for F-35 over the next few years.

Moreover, production of the F-35 jets is expected to continue for many years ahead, given the U.S. government's current inventory target of 2,456 aircraft for the Air Force, Marine Corps and Navy. Consequently, we may expect Lockheed Martin to witness more order inflows for F-35, in coming days, which in turn should significantly bolster this defense contractor's top line.

▲ **Impressive Budgetary Attributes:** As part of the fiscal 2021 proposed defense budget, \$740.5 billion is being kept as funding for the Pentagon, reflecting 3% growth from the fiscal 2020 budget. This increased spending provision highlights the U.S. government's decision to spend more on defense primes like Lockheed Martin. Notably, the budget has allotted \$11.4 billion for the procurement of 79 F-35 Joint Strike Fighters. The financial plan also includes an investment of \$1.1 billion for the procurement of AEGIS Ballistic Missile Defense system and \$0.92 billion for THAAD missiles. All these expansionary budgetary provisions will immensely boost this defense prime's business.

▲ **International Foray:** Apart from enjoying a strong forte in the domestic front, Lockheed Martin's products are also well acclaimed in the international market. In recent times, the company is witnessing increased demand for its THAAD missiles from the Kingdom of Saudi Arabia (KSA). Moreover, PAC-3 programs are undergoing production and sustainment activities in the KSA, UAE, Qatar, the Republic of Korea, Japan and Taiwan. Moreover, for its F-35 program, Poland has committed to receive 32 such jets, while the company is witnessing increased growth opportunities for this fighter jet in Finland, Switzerland and Spain. Such developments should boost the company's international sales in the days ahead and aid long-term growth, with more and more nations strengthening their defense arsenals across the world.

▲ **Stable Liquidity Position:** Lockheed Martin's cash and cash equivalent at the end of first quarter 2020 was \$1.99 billion. On the other hand, the company's long-term debt as of Mar 31, 2020, stands at \$11.44 billion, almost flat sequentially. Although the long-term debt level lies much above the company's cash reserve, its current debt worth \$1.25 billion as of Mar 31, 2020, remains lower than the cash reserve. This reflects the company's capability to duly meet its obligations over the short run.

Moreover, the company's current ratio as of Mar 31, 2020, is 1.23, which being more than 1, indicates that this defense major has sufficient capital on hand to meet its short-term obligations. Further, Lockheed's times interest earned ratio improved sequentially from 12.1 to 12.6 at the end of the first quarter, where as its debt-to-capital ratio dipped to 0.79 sequentially and also remained below the industry level of 0.86. All these favorable ratio levels make us optimistic about the company's ability to meet debt obligations in the near future. Such stable liquidity position enables Lockheed Martin to take important cash deployment decisions. During the first quarter, the company bought back 1.7 million shares for \$756 million and paid out dividends worth \$693 million to its shareholders, reflecting an 8.6% increase year over year.

Reasons To Sell:

▼ **Tiff with Turkey:** On July 17, 2019, the U.S. Government suspended Turkey's participation in the F-35 program and initiated the process to formally remove Turkey from the program, since Turkey accepted delivery of the Russian S-400 air and missile defense system. As of Mar 31, 2020, although the U.S. administration has not imposed sanctions on Turkish entities involved in the S-400 procurement, there remains a chance of new sanction provisions targeted at Turkey, if the "Promoting American National Security and Preventing the Resurgence of ISIS Act of 2019" gets approved by Congress in 2020. To this end, if this bill gets enacted and a step is taken against Turkey, Lockheed Martin's programs involving Turkey will get affected.

F-35 program's cost issues, issues with Turkey and intense competition might hurt the company's growth trajectory.

Notably, Turkish suppliers also produce component parts for the F-35 program, many of which are single-sourced. Therefore, in case of any sanction imposed on Turkey, Lockheed Martin's operating results, financial position or cash flows might get adversely impacted.

▼ **Cost Issues of F-35:** The F-35 program or the Joint Strike Fighter Program was conceived and developed by the U.S. and its allies to replace the ageing F-16s and other older fighter jets in their fleet. It is the largest as well as the costliest U.S. weapons system. As this program represents around 27% of the company's total sales, which are expected to go up in days ahead, any decision to cut spending or reduce planned orders could have an adverse impact on its financial results.

In fact, President Trump had earlier expressed his concerns for this program, claiming it to be an 'overtly expensive' one. To this end, the company has already reduced the cost structure for this jet and now plans to reduce to \$80 million or less per plane by 2020. However, the F-35A, the most common version of the aircraft, is expected to cost \$82.4 million per unit in 2020, per a report by Reuters. Moreover, according to the Defense Department's latest annual program overview, the company must find ways to reduce the Pentagon's current \$1.1 trillion estimate to own and operate the F-35 jets. Such forced cost reduction initiatives might hamper the operating results of the company.

▼ **Rising Competition:** Lockheed Martin faces intense competition for its broad portfolio of products and services, both in the domestic front as well as the global market. Particularly, it faces competitive threat from various smaller competitors, particularly in some of its services businesses. Moreover, information technology procurements are increasingly focusing on price over other competitive factors.

▼ **COVID-19 Impacts:** Although the pandemic did not have a material impact on Lockheed Martin's operating results or business in the first quarter of 2020, its ongoing and prolonged impacts may be a cause of concern and might dent its second-quarter performance. This could be because the company is already experiencing issues in each of its business areas related to COVID-19, primarily in access to some locations and delays of supplier deliveries. The company had to briefly halt its operations at the F-35 Final Assembly and Check Out (FACO) facilities in Japan and Italy in March, in observance of such countries' COVID-19 policies. Additional closures like these could have a longer-term impact on the company's financials. Flight test operations and training are also being negatively impacted by travel restrictions, which could delay deliveries to customers. Further, other milestones on affected programs could be adversely impacted by the extended period of global supply-chain disruption. Since the pandemic is unlikely to die out anytime soon, it might turn out to be a major growth inhibitor for this stock.

▼ **Program Issues:** Lockheed's EADGE-T program, used to design, integrate, and install an air missile defense command, control, communications, computers-intelligence (C4I) system, has been experiencing performance issues. As of first quarter end, cumulative losses related to this remained at approximately \$260 million. The company has also been experiencing performance issues related to the development and integration of a modernized LM 2100 satellite platform. Cumulative losses remained at approximately \$410 million for this program, at March 2020 end. If no positive developments are made on these loss-incurring programs, it might weigh on the company's operating results.

Last Earnings Report

Lockheed Martin Q1 Earnings & Sales Beat Estimates

Lockheed Martin reported first-quarter 2020 earnings of \$6.08 per share, which surpassed the Zacks Consensus Estimate of \$5.76 by 5.5%. The bottom line also improved 1.5% from the year-ago quarter's \$5.99. This year-over-year upside can be attributed to higher sales.

Operational Highlights

In the reported quarter, net sales amounted to \$15,651 million, which outshined the Zacks Consensus Estimate of \$15,227 million by 2.8%. The reported figure also increased 9.2% from \$14,336 million a year ago. Except for the company's Rotary and Missions Systems unit, all segments registered year-over-year growth in sales.

Backlog

Lockheed Martin ended the first quarter (on Mar 29, 2020) with \$144.1 billion in backlog, up 0.1% from \$144 billion at the end of 2019. Of this, the Aeronautics segment accounted for \$52.9 billion, while Rotary and Mission Systems contributed \$37.5 billion. Also, \$26.7 billion came from Space Systems and \$27.1 billion from the Missiles and Fire Control segment.

Segmental Performance

Aeronautics: Sales increased 14.1% year over year to \$6.37 billion, primarily driven by higher net sales from the F-35 programs. Also, higher sales from classified development activities owing to increased volumes contributed to sales growth at this unit.

The segment's operating profit improved 14.9% year over year to \$672 million, whereas the operating margin expanded 10 basis points (bps) to 10.6%.

Missiles and Fire Control: Quarterly sales improved 11.4% year over year to \$2.62 billion owing to higher sales from tactical and strike missile programs as well as integrated air and missile defense programs.

The segment's operating profit declined 5% year over year to \$396 million, whereas operating margin contracted 260 bps to 15.1%.

Rotary and Mission Systems: Quarterly sales of \$3.75 billion declined 0.4% from the prior-year quarter on account of lower sales for Sikorsky helicopter programs, which include combat rescue helicopter and Black Hawk production programs.

The segment's operating profit declined 0.8% year over year to \$376 million, while operating margin contracted 10 bps to 10%.

Space Systems: Sales rose 10.5% year over year to about \$2.92 billion in the first quarter. The uptick was driven by higher net sales for strategic and missile defense programs, and increased volumes from government satellite programs.

The segment's operating profit declined 15.9% to \$281 million, while its operating margin contracted 310 bps to 9.6% in the reported quarter.

Financial Condition

Lockheed Martin's cash and cash equivalents totaled \$1.99 billion as of Mar 29, 2020, compared with \$1.51 billion at the end of 2019. Long-term debt summed \$11.44 billion, slightly higher than the prior-year-end level of \$11.40 billion.

Cash from operations at the end of first-quarter 2020 amounted to \$2.3 billion compared with \$1.7 billion a year ago.

During the reported quarter, the company repurchased 1.7 million shares for \$756 million compared with the buyback of one million shares for \$281 million in the year-ago quarter.

Lockheed Martin paid out dividends worth \$693 million to its shareholders in the first quarter compared with the year-ago quarter's figure of \$638 million.

Guidance

For 2020, Lockheed Martin has updated its financial guidance. The company currently expects to generate revenues of \$62.25-\$64 billion compared with \$62.75-\$64.25 billion projected earlier. The Zacks Consensus Estimate for full-year revenues, pegged at \$63.78 billion, lies toward the higher end of the company's updated guidance.

Earnings per share are anticipated to be in the \$23.65-\$23.95 range for 2020. The Zacks Consensus Estimate for the company's full-year earnings, pegged at \$24.12, lies below the company's guidance.

Recent News

On **June 10, 2020**, Lockheed Martin Corp. secured a modification contract for supporting the Phased Array Tracking to Intercept Of Target (PATRIOT) Advanced Capability-3 (PAC-3) missile program. Work related to the deal is scheduled to be over by Oct 31, 2024.

Valued at \$1.04 billion, the contract was awarded by the U.S. Army Contracting Command, Red Stone Arsenal, AL. Per the terms of the deal, Lockheed will provide incidental services, hardware, facilities, equipment, and all technical, planning, management, manufacturing, and testing to produce PAC-3 missiles.

On **June 4, 2020**, Per major media sources, Lockheed Martin Corp. secured a \$1-billion deal for delivering five C-130J-30 Super Hercules transport aircraft to the military of New Zealand. Further, Lockheed Martin's Aeronautics division will deliver a full mission flight simulator and other supporting infrastructure as New Zealand's military seeks to replace its existing aircraft fleet.

The company will deliver the first of the new Super Hercules aircraft in 2024, with the full fleet operating from 2025.

On **Apr 2, 2020**, Lockheed Martin Aeronautics business division secured a \$512-million deal under the foreign military sales (FMS) program to manufacture eight F-16 Block 70 aircraft for the Republic of Bulgaria. The contract was awarded by the Air Force Life Cycle Management Center, Wright-Patterson Air Force Base, OH.

On **Apr 1, 2020**, Lockheed Martin won a contract for manufacturing the 17th and 18th lots of Joint Air-to-Surface Standoff Missile (JASSM). Work related to the deal will be executed in Orlando, FL.

Valued at \$818.2 million, the contract was awarded by the Air Force Life Cycle Management Center, Eglin Air Force Base, FL. The contract is scheduled to be completed by Oct 31, 2024.

Valuation

Lockheed Martin's shares are down 1.9% in the year-to-date period and 9.5% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Aerospace sector are down 20.5% and 26.5% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry is down 23.2% while the sector is down 24.2%.

The S&P 500 index is down 5.5% in the past year-to-date period and up 5.3% in the past year.

The stock is currently trading at 15.4X of forward 12-month earnings, which compares to 21.7X for the Zacks sub-industry, 21.7X for the Zacks sector and 21.9X for the S&P 500 index.

Over the past five years, the stock has traded as high as 25.4X and as low as 11.2X, with a 5-year median of 18.1X. Our Neutral recommendation indicates that the stock will perform in line with the market. Our \$405 price target reflects 16.1X forward 12-month earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	A
Momentum Score	A
VGM Score	A

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.

Disclosures

This report contains independent commentary to be used for informational purposes only. The analysts contributing to this report do not hold any shares of this stock. The analysts contributing to this report do not serve on the board of the company that issued this stock. The EPS and revenue forecasts are the Zacks Consensus estimates, unless indicated otherwise on the reports first page.
