Summary

Shares of Martin Marietta have outperformed its industry in the past year. This outperformance is likely to continue going forward, courtesy of strong 2019 results, higher shipments, strong pricing and cost-management efforts. Notably, the company provided strong guidance for 2020, given strong past quarters' results and attractive underlying market fundamentals. The company is well positioned for the upcoming periods on the back of its strong pipeline of large multi-year energy projects, and improving residential, non-residential, and public construction demand trends. Its strength on acquisitions and divestitures is also encouraging. However, adverse weather conditions and rising costs raise concern. Also, 2020 earnings estimates have been trending downward over the past 30 days, reflecting concern for the company.

Overview

Based in Raleigh, NC, **Martin Marietta Materials, Inc.** produces and supplies construction aggregates and other heavy building materials, mainly cement, in the United States. The end uses of the company's aggregates and cement are infrastructure, private residential and private non-residential construction. Railroad, agricultural, utility and environmental industries also use these products.

The company's total revenues include sales of products and services to customers (net of any discounts or allowances) and freight revenues.

Building Materials (accounting for 94.9% of 2019 total revenues): The Building Materials business includes aggregates, cement, ready mixed concrete, asphalt and paving product lines. The Building Materials business includes three reportable segments: The Mid-America Group (30.3%), the Southeast Group (10.5%) and the West Group (54.1%).

Magnesia Specialties (5.1%): The segment produces magnesia-based chemicals products used in industrial, agricultural and environmental applications and dolomitic lime sold primarily to customers in the steel industry.

Reasons To Buy:

▲ **Leading Supplier of Aggregates:** Martin Marietta is a leading supplier of construction aggregates in the United States used for construction of highways, infrastructure projects and residential, commercial and industrial building development. The company has a vast network of aggregate quarries and distribution centers throughout the southern U.S., in the Bahamas and Canada, as well as distribution centers along the Gulf of Mexico and Atlantic coasts. Higher shipments, pricing improvement and benefits from growth initiatives owing to strong underlying demand will boost its sales and profits at the Aggregates business in the forthcoming quarters.

The company's string of acquisitions, divestitures and attractive shareholder returns are encouraging. Also, an uptick in private and public construction activity will boost demand

Shares of the company have outperformed its industry in the past year. The outperformance was backed by robust underlying construction market fundamentals supported by solid infrastructure (particularly for aggregates-intensive highways and streets), Non-residential (buoyed by both commercial and heavy industrial sectors) and Residential (given attractive mortgage rates and affordable homes prices within the company's geographic footprint).

▲ **Public Infrastructure Demand Improving:** Public sector construction includes spending by federal, state and local governments for construction of highways, bridges, airports, dams, roads and other infrastructure construction. Generally, public sector spending is a lot more stable than the private sector because public construction projects are less affected by general economic cycles and receive predictable government funding. Notably, the infrastructure market represents 35% of its 2019 aggregate shipments. In 2020, the company expects infrastructure shipments to grow meaningfully, driven by healthy state Department of Transportation (DOT) budgets and an expected extension or replacement for the Fixing America's Surface Transportation (FAST) Act.

Importantly, Trump's impetus to spur massive infrastructure investments in roads, highways, ports and airports bodes well for aggregate producers like Martin Marietta. The plan also addresses the issues related to drinking and wastewater system, energy and rural infrastructure, and veterans' hospitals, to name a few. This will further propel demand for products sold by companies like Martin Marietta.

The multi-year highway bill — five-year, \$305 billion FAST Act — enacted in December 2015 increased the funding certainty for the state transportation and highway programs. This, coupled with state/local municipal-level initiatives to finance infrastructure projects, should propel the increased construction of highways, streets, roads, and bridges in the near term, thereby increasing aggregates demand.

▲ **Solid Commercial & Residential Construction Activities:** Aggregate shipments to the non-residential market (representing 36% of 2019 aggregate shipments) is expected to show a meaningful increase in 2020, driven by both commercial and heavy industrial construction activities. The Architectural Billings Index and Dodge Momentum Index suggest commercial and institutional construction activity to remain healthy throughout 2020. The company expects large energy-sector projects, particularly along the Gulf Coast, to continue driving growth and boosting aggregates demand over the next several years.

Residential construction — which represented 22% of 2019 aggregate shipments — should continue to grow within the company's geographic footprint, particularly now, with attractive mortgage rates and a modest rise in home prices. The residential outlook across Martin Marietta's geographic footprint remains a positive (primarily across its leading southeastern and southwestern markets), backed by favorable demographics, job growth, land availability, lower interest rates and higher permits.

▲ **Regular Acquisitions:** The company completed more than 85 smaller acquisitions since its Initial Public Offering in 1994 till 2017, strengthening its position in the Aggregates business. Notably, the company has acquired aggregates and related quarry locations from industry majors like Vulcan Materials, Lafarge North America and CEMEX, Inc.

In April 2018, Martin Marietta acquired Bluegrass Materials Company for \$1.625 billion in cash. The addition of Bluegrass strengthened Martin Marietta's aggregates position in the high-growth regions of Southeastern and Mid-Atlantic. Bluegrass has a portfolio of more than 125 years of strategically-located, high-quality reserves across Georgia, South Carolina, Maryland, Kentucky and Tennessee. In late June, the company acquired several sand and gravel operations and a permitted Greenfield site in Omaha, Nebraska, adding approximately 30 million tons of total reserves to its Midwest business.

Reasons To Sell:

▼ **Weather Woes:** Weather-related challenges in many markets are affecting Martin Marietta. All of the company's businesses are subjected to weather-related risks that can significantly affect production schedules and profitability. Excessive rainfall, flooding, or severe drought can jeopardize shipments, production, and profitability in all of the company's markets. The first and fourth quarters are most adversely affected by winter. Hurricane activity in the Atlantic Ocean and Gulf Coast is most active during the third and fourth quarters. In fact, weather, contractor capacity issues and logistics disruptions have remained causes of concerns throughout 2018 for Martin Marietta.

Adverse weather conditions and rising costs raise concern.

In fourth-quarter 2019, weather-related woes impacted projects in Colorado in the Downstream business.

The asphalt and paving business — which operates solely in Colorado — witnessed lower production days due to continued extreme weather, resulting in a 4.1% decrease in asphalt shipments in the fourth quarter.

In downstream businesses, shipments decreased nearly 16% in third-quarter 2019 owing to unfavorable weather conditions in Texas and Colorado. This was followed by a 4% decrease in shipments in the first quarter of 2019 as Colorado's harsh winter hindered early construction activity in that state.

▼ **Rising Costs Could Hamper Profitability:** Higher labor, freight and material costs remain a concern for the company. Higher costs are likely to pressurize the company's gross margin and also the bottom line.

During the first quarter 2019, although the company's Cement operations benefited from strong volume and pricing growth, extended maintenance outages, higher rail freight costs and reduced operating leverage from lower production levels led to 1,270-basis point degradation in product gross margin. Outages included planned and unplanned repairs at both cement plants, and the acceleration of maintenance activities originally planned for the later part of 2019.

▼ **Lower Margins in Aggregates Downstream Operations:** Martin Marietta's aggregates-related downstream operations have lower gross margins (excluding freight and delivery revenues) than its aggregates product line due to highly competitive market dynamics, lower barriers to entry and volatility in fuel costs. Therefore, as the downstream operations are expanded, overall gross margin (excluding freight and delivery revenues) is likely to be adversely affected.

Last Earnings Report

Martin Marietta Q4 Earnings Miss Estimates, Up Y/Y

Martin Marietta Materials, Inc. reported lower-than-expected fourth-quarter 2019 earnings. Nonetheless, the company highlighted 2019 as the most profitable year in its history. Improved shipments, pricing and profitability across the major part of the Building Materials business helped it to achieve the eighth consecutive year of growth in revenues, gross profit, adjusted EBITDA and earnings per share.

In the quarter under review, the company reported adjusted earnings per share of \$2.09, missing the Zacks Consensus Estimate of \$2.18 by 4.1%. However, the reported figure increased an impressive 39.3% from the year-ago level of \$1.50 per share.

Total revenues (including Product and services and Freight revenues) in the quarter came in at \$1,100.4 million, up 7.9% year over year. The upside was mainly attributable to double-digit growth in cement shipments. Also, higher shipments in the aggregates business led to the upside.

Segment Discussion

The **Building Materials** segment (including aggregates, cement, ready-mixed concrete, asphalt and paving product lines) total revenues were \$1,044.3 million, reflecting an increase of 10.1% year over year.

Within the segment, product and services revenues amounted to \$973.7 million, up 9.6% from the year-ago level. Freight revenues of \$70.6 million were also up 18.8% from the year-ago period.

Again, in Product and Services, Aggregates' revenues of \$635.3 million improved 9.6% from the year-ago quarter. Also, Cement's revenues grew 23.9% year over year to \$108.1 million. Ready Mixed Concrete's revenues also improved 4.9% year over year to \$223.9 million. Revenues in Asphalt and paving product lines increased 2.2% from the year-ago quarter to \$68.4 million.

Geographically, Mid-America Group operations' shipments grew 3.5% from the prior-year period, driven by wind energy and data center projects in the Midwest. Pricing in the said region improved only 1% from the prior-year quarter owing to lower infrastructure shipments and unfavorable product mix. Southeast Group operations inched up 7.5% from the prior-year quarter on the back of strong private-sector construction activity in North Georgia and Florida markets, and 3% growth in pricing. This upside was partially offset by infrastructure project delays. Moreover, West Groups' aggregate shipments grew 3.4% from a year ago, driven by strong underlying Texas demand. This was partly offset by Colorado's weather-impacted construction delays and unanticipated operating downtime. Pricing grew 12.9% year over year.

The **Magnesia Specialties** segment — including magnesium oxide, magnesium hydroxide and dolomite lime products — reported total revenues of \$56.1 million, decreasing 22% year over year. Its product revenues decreased 24.1% to \$51 million. The downside was due to international chemicals and domestic lime customers rationalized inventory levels.

Operating Highlights

Consolidated gross margin during the quarter came in at 23.5%, improving 120 basis points (bps). Selling, general and administrative expenses — as a percentage of total revenues — improved 30 bps year over year. Also, adjusted EBITDA of \$278.8 million grew 11.4% year over year.

Liquidity and Cash Flow

As of Dec 31, 2019, Martin Marietta had cash and cash equivalents of \$21 million compared with \$44.9 million in the corresponding period of 2018. Net cash provided by operations was \$966.1 million at the end of 2019 compared with \$705.1 million in the comparable period of 2018.

2019 Highlights

Earnings came in at \$9.74 per share, increasing 31.1% year over year. Total revenues of \$4,739.1 million also advanced 11.7% from the 2018 level.

2020 Guidance

Backed by solid underlying demand and third-party forecasts, Martin Marietta raised its full-year 2019 guidance. Total revenues for 2020 are expected in the band of \$4,875-\$5,075 million. The Zacks Consensus Estimate for 2020 revenues is currently pegged at \$4,740 million. Gross profit is projected in the range of \$1,295-\$1,390. The company expects adjusted EBITDA within \$1,347.5-\$1,452.5 million. It expects capital expenditure in the range of \$425-\$475 million. Aggregates Product line total revenues are projected in the range of \$3,185-\$3,295 million. Aggregates volume growth is expected in the range of 2-4%. Average selling price is likely to grow 4-6% from a year ago. Cement total revenues are estimated in the band of \$470-\$500 million. Ready Mixed Concrete and Asphalt and Paving's Products and Services revenues are anticipated within \$1,255-\$1,325 million. The company expects Magnesia Specialties Business' net sales between \$265 million and \$275 million.

Quarter Ending **12/2019**

Report Date	Feb 11, 2020
Sales Surprise	0.53%
EPS Surprise	-4.13%

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	D
Growth Score	A
Momentum Score	B
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
