Summary

Paychex looks strong on the back of solid top-line growth and dominant position in the outsourcing market. Acquisitions have expanded the company's customer base and generated cost and revenue synergies. Paychex strives to capitalize on the rising opportunities in the professional employer organization industry. The company has been consistently rewarding its shareholders through dividend payout and share repurchases, which boost investors' confidence and positively impact earnings per share. On the flip side, Paychex continues to witness rising expenses due to investment in sales, marketing and product development. PEO insurance costs and acquisitions have also added to the company's costs. Its top-line growth is affected by seasonality. Partly due to these headwinds, the stock has declined significantly over the past year.

Overview

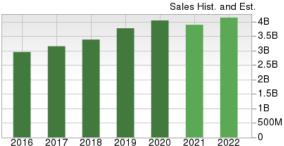

Paychex, Inc. is one of the leading providers of integrated human capital management ("HCM") solutions for payroll, human resource ("HR"), retirement, and insurance services for small- to medium-sized businesses. The company was incorporated in Delaware in 1979.

The company's payroll processing services include payroll processing, payroll tax administration services, employee payment servicesand regulatory compliance services. The company supports small-business companies through its core payroll, software-as-a-service ("SaaS") Paychex Flex platform, and its SurePayroll ® SaaS-based products. The company's SaaS solution through Paychex Flex Enterprise integrates payroll processing with HR management, employee benefits administration, time and labor management, applicant tracking, and onboarding solutions.

The company offers a suite of complementary Human Resource Services ("HRS") products which include comprehensive HR outsourcing through Paychex HR Services; retirement services administration; insurance services; HR administration services, including time and attendance, benefit enrollment, recruiting, and onboarding; and other HR services and products.

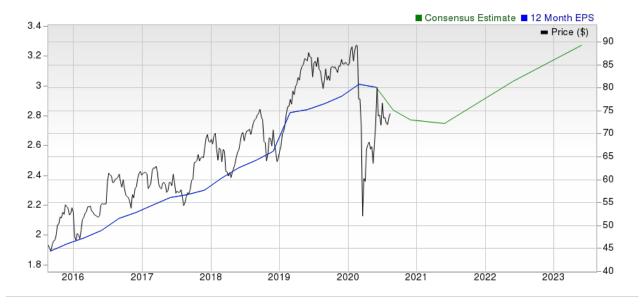

Paychex's wholly owned subsidiary, Paychex Advance LLC ("Paychex Advance"), offers a portfolio of services to the temporary staffing industry. This includes the purchasing of accounts receivable as a means of providing payroll funding to these clients.

As of May 31, 2020, Paychex served more than 670,000 payroll clients (inclusive of the Lessor acquisition). The company maintains its corporate headquarters in Rochester, New York, and serves clients throughout the United States and Europe. The company has one business segment. Its fiscal year ends on May 31.

Paychex operates under two broad categories — Total Service Revenue, and Interest on Funds Held for Clients. In fiscal 2019, Total Service Revenue made up 98% of total revenues and comprised two sub-segments: Management solutions (78% of Total Service Revenue) and professional employer organization (PEO) and insurance services (22% of Total Service Revenue). Interest on Funds Held for Clients accounted for the remaining 2% of fiscal 2019 total revenues.

Reasons To Buy:

Revenue growth is an important metric for any company as it is a vital part of growth projections and instrumental in strategic decision-making. Also, revenue growth is essential to justify the fixed and variable expenses incurred to operate a business. Paychex has grown meaningfully over the years by providing industry-leading service and technology solutions to its clients and their employees. Its solid business model, diversified products and services, and strategic acquisitions have boosted top-line growth. Notably, revenues grew at 5-year (2014-2019) CAGR of 6.6%. Higher revenues will expand margins and increase profitability in the long run.

Strength across human resource outsourcing and the PEO industry boosts Paychex.

- ▲ Paychex's initiatives to boost revenue growth through **acquisitions** are encouraging. During fiscal 2018, Paychex acquired Oasis Outsourcing and Lessor Group. Oasis has strengthened the company's PEO growth strategy, expanded its PEO sales organization and boosted client base. It has expanded Paychex's HR outsourcing and technology-enabled services and is helping it to deliver solid human resources and payroll solutions to clients and employees. Lessor Group is contributing to the company's payroll services. Apart from boosting revenue accretion, acquisitions have historically benefited its operating margin while also resulting in tax synergies.
- ▲ Paychex appears to be striving to capitalize on the rising opportunities in **the PEO** industry. A PEO is a firm or company to which organizations can outsource their HR functions, including payroll and benefits. Therefore, in our opinion, the 2017 acquisition of HR Outsourcing is a strategic fit for Paychex as more and more companies are willing to use PEO services rather than creating their in-house HR. The buyout is expanding the company's services, thereby helping it to add to its customer base.
- ▲ Paychex 's cash and cash equivalent balance of \$913 million at the end of the third quarter fiscal 2020 was above the long-term debt level \$902 million, underscoring that the company has enough cash to meet this debt burden.
- A Paychex puts consistent efforts to reward its shareholders in the form of **dividend and share repurchases**. During fiscal 2020, Paychex repurchased shares worth \$171.9 million and paid dividend of \$889.4 million. In fiscal 2019, Paychex repurchased shares worth \$56.9 million and paid dividend of \$826.8 million. In fiscal 2018, Paychex repurchased shares worth \$143.1 million and paid dividend of \$739.7 million. In fiscal 2017, the company repurchased shares worth \$166.2 million and paid dividends worth \$662.3 million. In fiscal 2016, Paychex bought shares worth \$107.9 million and paid \$606.5 million dividends. These initiatives not only instill investors' confidence but also positively impact earnings per share.

Reasons To Sell:

▼ The outsourcing industry is labor intensive and heavily dependent on foreign talent. Rising talent costs due to competition coupled with Trump's stringent policies on immigration could curb the industry's growth. Paychex, being one of the companies in the industry, is likely to get affected.

Rising expenses and seasonality are headwinds for Paychex.

- ▼ Paychex is seeing increase in expenses as it continues to invest in sales, marketing and product development. PEO insurance costs, which include workers' compensation and minimum premium health insurance benefit plans, also adds to the company's expenses. The company's strategic acquisitions, though help in adding revenues and expanding businesses, is another major contributor. Total expenses of \$2.58 billion increased 7% year over year in fiscal 2020. Previously, the company's total expenses increased 15% year over year in fiscal 2019, 10% in fiscal 2018 and 6% in fiscal 2017. Hence, the company's bottom line is likely to remain under pressure going forward. This may weigh on the company's share price, which has declined 9.1% over the past year.
- ▼ Paychex's top line growth/businessesare affected by **seasonality**. During third fiscal quarter (which ends in February), the company witnesses increasing number of new payroll clients, new retirement services clients and new Paychex HR Services worksite employees, compared with the remaining part of the fiscal year. This is because many new clients tend to use company's services at the beginning of a calendar year. Additionally, calendar year-end transaction processing and client funds activity are traditionally higher during the third fiscal quarter due to clients paying year-end bonuses and requesting additional year-end services. Seasonality causes considerable fluctuations in revenues and profits and makes forecasting difficult.

Last Earnings Report

Paychex Q4 Earnings Meet Estimates, Revenues Beat

Paychex's fourth-quarter fiscal 2020 adjusted earnings of 61 cents per share came in line with the Zacks Consensus Estimate but decreased 3.2% on a year-over-year basis. Total revenues of \$915.1 billion beat the consensus mark by 0.4% but decreased 7% year over year.

Quarterly results were weighed down by coronavirus-led lockdowns, which prompted businesses to suspend operations.

Quarter Ending	05/2020
Report Date	Jul 07, 2020
Sales Surprise	0.38%
EPS Surprise	0.00%
Quarterly EPS	0.61
Annual EPS (TTM)	2.99

Revenues in Detail

Revenues from Management Solutions decreased 6% year over year to \$661.8 million. The downfall was due to a decline in check volumes, partially offset by increased penetration of retirement services and time and attendance services. The decrease in check volumes was owing to a reduction in the number of clients processing payrolls and the number of employees paid due to the shutdown.

Professional employer organization ("PEO") and insurance services revenues were \$228 million, down 11% from the year-ago quarter. The downfall was due to a decline in the number of worksite employees serviced by existing clients. Insurance Solutions revenues were impacted by a decline in the number of health and benefit applicants and loss in workers' compensation premiums.

Interest on funds held for clients increased 14% year over year to \$25.3 million on higher realized gains, which were partially offset by lower average investment balances and average interest rates. The realized gains came from the strategic repositioning of client fund portfolio to enhance liquidity in response to coronavirus-related uncertainties. Funds held for clients' average investment balances were impacted by lower client fund collections due to coronavirus and changes in client-base mix, partially offset by wage inflation and timing of collections and remittances.

Operating Performance

Operating income decreased 5% year over year to \$299.6 million. Operating margin rose to 32.7% from 32.1% in the year-ago quarter.

EBITDA of \$351 million decreased 5% year over year. EBITDA margin came in at 38.4% compared with 37.9% in the year-ago quarter.

Balance Sheet & Cash Flow

Paychex exited fourth-quarter fiscal 2020 with cash and cash equivalents of \$905.2 million compared with \$780 million at the end of the prior quarter. Long-term debt was \$796.8 million compared with \$796.7 million in the prior quarter. Cash provided by operating activities was \$388.2 million in the reported quarter.

During the reported quarter, the company paid out \$222.6 million in dividends.

Fiscal 2021 View

For fiscal 2021, total revenues are expected to decline 2-5%. Adjusted earnings per share are anticipated to fall 6-10%. Adjusted operating margin is expected in the band of 34-35%. Adjusted EBITDA margin is expected to be between 39 and 40%. Effective income tax rate is projected in the range of 24.5-25%.

Paychex expects PEO and insurance services revenues to decline 2-7%. Management solutions revenues are anticipated to decline 1-4%. Interest on funds held for clients is expected to be between \$55 and \$65 million.

Recent News

On Jul 10, 2020, Paychex announced that it has been named to the Selling Power 50 Best Companies to Sell in 2020 list for the eighth consecutive year.

On Jul 9, 2020, Paychex's board of directors declared a quarterly cash dividend of 62 cents per share payable on Aug 27, 2020 to shareholders of record as of Aug 3, 2020.

On **Jun 12, 2020**, Paychex introduced Paycheck Protection Program (PPP) in order to simplify the application process for customers and provide them with accurate information required to satisfy the new loan forgiveness requirements.

On May 18, 2020, Paychex announced that it has released a real time payments solution that enables employers to instantly pay their employees for time worked.

Valuation

Paychex shares are down 12.5% in the year-to-date period and 9.1% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Business Services sector declined 13.1% but increased 2.3% in the year-to-date period, respectively. Over the past year, the Zacks sub-industry and sector declined 12.2% increased 4%, respectively.

The S&P 500 index is up 4.8% in the year-to-date period and 16.7% in the past year.

The stock is currently trading at 26.52X forward 12-month price-to-earnings, which compares to 21.83X for the Zacks sub-industry, 29.98X for the Zacks sector and 22.86X for the S&P 500 index.

Over the past five years, the stock has traded as high as 30.43X and as low as 15.73X, with a 5-year median of 25.03X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$79.00 price target reflects 28.21X price-to-earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

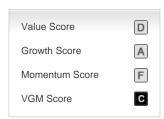

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
