## Summary

PNM Resources' continues to invest in its utility assets to provide reliable services to customers. It plans to invest \$3.8 billion through 2020 to 2024. The company is focused on developing cost-effective power generation units to provide reliable and affordable power, while transitioning to a coal-free generating portfolio by 2040. Recently, it received NMPRC's nod on San Juan retirement. It is also focused on meeting New Mexico's increasing renewable energy needs through reliable and clean power. The BB2 transmission line approval will help in delivering low-cost wind energy to its customers. Shares of the company have outperformed its industry in the past 12 months. However, risk of operating in nuclear plants and stringent environmental policies and regulations related to climate change remain headwinds.

## Overview

Albuquerque, NM-based PNM Resources was founded in 1917. The company through its subsidiaries is engaged in the distribution of energy and energy-related businesses in the United States. It operates through two segments — **Public Service Company of New Mexico (PNM)** and **Texas-New Mexico Power Company (TNMP)**.

The PNM segment includes the retail electric utility operations of the company. PNM provides integrated electricity services that include the generation, transmission and distribution of electricity for retail electric customers in New Mexico. The segment is also engaged in generation and sale of electricity into the wholesale market as well as providing transmission services to third parties. It generates electricity using coal, natural gas and oil, nuclear fuel, solar, wind as well as geothermal energy sources.

As of Dec 31, 2019, PNM owned or jointly owned 3,206 miles of electric transmission lines, 6,071 miles of distribution overhead lines, 5,934 miles of underground distribution lines (excluding street lighting) and 255 substations. Total net generation capacity of facilities owned or leased by PNM was 2,152 MW.

TNMP is a regulated utility operating segment, which provides transmission and distribution services in Texas. It also owns and leases vehicles, service facilities as well as office locations throughout its service territory. As of Dec 31, 2019, TNMP owned 981 miles of overhead electric transmission lines, 7,236 miles of overhead distribution lines, 1,324 miles of underground distribution lines and 125 substations.

In 2019, the PNM and TNMP segment contributed 75% and 25% to total revenues, respectively.

The **Corporate and Other** segment includes PNMR holding company activities, primarily related to corporate level debt and PNMR Services Company.

---

## Reasons To Buy:

- ▲ PNM Resources continues to invest substantially in its utility assets to provide reliable services to its customers. It plans to invest \$3.8 billion through 2020 to 2024. It intends to spend \$811.7 million, \$992.4 million, \$694.6 million, \$771 million and 546.4 million in 2020, 2021, 2022, 2023 and 2024, respectively. In the past 12 months, PNM Resources' shares have lost 3% compared with the industry's decline of 7.6%.

From 2017 to 2019, PNM and TNMP collectively invested \$1.5 billion in a utility plant that includes substations, power plants, nuclear fuel as well as transmission and distribution systems.

TNMP is allowed to recover its Transmission Cost of Service (TCOS) through a network transmission rate that is approved by the Public Utility Commission of Texas. TNMP made a TCOS filing in Jan 24, 2020, whose rates are expected to be implemented in March 2020.

- ▲ In New Mexico, the company received approvals from both FERC and the New Mexico Public Regulation Commission to acquire the Western Spirit Transmission Line in 2021. The transmission line will bring 800 megawatt (MW) new wind power to the existing grid in the US desert southwest state. The company recently received approval for the abandonment and securitization of the San Juan Generating Station from New Mexico Public Regulation Commission (NMPRC).

The company also received approval for the BB2 transmission line, which will help in delivering 140 MW of low-cost wind energy to customers. It plans to add 3,630 MW under the cumulative capacity addition plans through solar, wind and battery storage from 2023 to 2038 based on recommended San Juan replacement scenario.

- ▲ Along with power generation of its own, the company purchases power under long-term power purchase agreements (PPAs). To serve New Mexico retail customers, including a data center located in service territory, PNM has agreements to purchase renewable energy and Renewable Energy Certificates. As of Dec 31, 2019, under these agreements 356 MW, 80 MW, and 15 MW renewable energies are produced from wind, solar-PV, and geothermal facilities, respectively, with expiration dates beginning in December 2034 through December 2046.
- ▲ PNM Resources has a long-standing expertise in fulfilling environmental regulations. The company is focused to develop cost effective power generation units to provide reliable and affordable power. It plans to exit all coal-fired generation by 2031 and to have an emissions-free generating portfolio by 2040. The company is preparing its system to meet New Mexico's increasing renewable energy requirements cost effectively.

Notably, utility bills for PNM customers are below the national and regional averages. Reliability of its services and lower utility bills compared with peers will definitely provide financially distressed customers some support amid the coronavirus crisis.

---

Long-term investment plans, phased exit from coal based generation assets, initiatives to provide reliable and affordable clean power will boost the company's performance.

---

## Reasons To Sell:

- ▼ After retiring coal-fired plants, the company is investing significantly to replace generating capacities. Higher expenditures are exerting pressure on rates. Meanwhile, energy-efficiency initiatives and modernization are denting customer usage. These factors are likely to make a negative impact on the company's operations and cash flows.
- ▼ The company has a 10.2% undivided interest in Palo Verde Nuclear Generating Station (PVNGS). PVNGS represents 14.6% of PNM's generating capacity as of Dec 31, 2019 and is subject to environmental, health and financial risks. The United States Nuclear Regulatory Commission ("NRC") has broad authority under federal law to impose licensing and safety-related requirements for the operation of nuclear generation facilities.

Incidents at nuclear facilities of other operators, which have an impact on the industry, may lead the NRC to impose additional requirements and regulations on all facilities, including PVNGS. A major accident at a nuclear facility anywhere in the world can compel NRC to limit or prohibit the operation or licensing of any domestic nuclear unit and to promulgate new regulations that require significant capital expenditures and/or lead to higher operating costs.

- ▼ The company's utilities are subject to numerous federal, state and local environmental laws as well as regulations, including those related to climate change. These regulatory bodies may impose significant compliance costs as well as significantly limit or affect their operations and financial results. Environmental policies and regulations are persistent concerns for PNM Resources.
- 

Risk of operating in nuclear plants and stringent environmental policies and regulations related to climate change remain headwinds for the company.

## Recent News

### PNM Resource Receives NMPRC's Nod on San Juan Retirement- Apr 1, 2020

PNM Resource announced that its unit, PNM, received approval for the abandonment and securitization of the San Juan Generating Station from New Mexico Public Regulation Commission (NMPRC).

Under the Energy Transition Act (ETA), the company filed the application on Jul 1, 2019. The company will close the coal plant after the expiration of the participation and coal supply agreements in June 2022. PNM Resource is focused on exiting from its coal-fired generation by 2031 and bring cleaner energy sources to its production portfolio. In sync with the same, the company will target an early exit from the Four Corners Power Plant.

### PNM Resources to Issue 5.4M Equity to Repay Debts - Jan 7,2020

PNM Resources has priced its public offering of 5.375 million shares of common stock at \$47.21 per share, subject to certain adjustments, upon physical settlement of the forward sale agreements. The gross proceeds from the issue are expected to be \$260.7 million. The offering was upsized from the previously announced offering of 4.9-million shares of common stock. Closing of the offering is expected on or about Jan 10, 2020, subject to customary closing conditions.

## Valuation

PNM Resources shares are down 12.6% in the year to date period, and 3% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Utility sector was down 16.5% and 18.3% in the year to date period, respectively. Over the past year, the Zacks sub-industry is down 7.6% and sector is down 22.3%, respectively.

The S&P 500 index is down 17.3% in the year to date period and 8% in the past year.

The stock is currently trading at 20.11X of forward 12 months earnings, which compares to 12.22X for the Zacks sub-industry, 11.56X for the Zacks sector and 16.99X for the S&P 500 index.

Over the past five years, the stock has traded as high as 25.96X and as low as 13.92X, with a 5-year median of 19.67X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$47 price target reflects 21.36X of forward 12 months earnings.

## Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	<b>D</b>
Growth Score	<b>C</b>
Momentum Score	<b>B</b>
VGM Score	<b>C</b>

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
