This strategic initiative aims at improving the company's operating efficiency and effectiveness, while focusing on consumer insights, and growth-enabling functions including technology, marketing, and research and development. The plan is on track to generate more than \$100 million in the next 15-18 months. Notably, majority of these savings are expected to be reinvested into the growth initiatives and consumer insights, R&D and marketing across each of the businesses. This plan will also enable the company to deliver value creation and sustainable growth in the long term.

Spectrum Brands Global Productivity Improvement Plan is likely to generate more than \$100 million of run-rate savings. These savings will be reinvested in its core businesses to drive growth.

▲ **Strong Fiscal 2020 View:** Spectrum Brands provided reaffirmed its robust view for fiscal 2020. Looking ahead, the company expects to resume sales growth in the fiscal second quarter. Additionally, it anticipates savings from the Global Productivity Improvement Plan to offset the ongoing tariff headwinds. For fiscal 2020, the company foresees net sales, adjusted EBITDA and free cash flow growth. It anticipates net sales growth of low-single digits, with adjusted EBITDA of \$570-\$590 million. Further, adjusted free cash flow is expected to be \$240-\$260 million.

▲ **Global Pet Care Business Reflects Strength:** Spectrum Brands' nearly flat organic sales in first-quarter fiscal 2020 were due to sales growth in Global Pet Care and Home & Personal Care segments. Notably, sales for the Global Pet Care business improved 0.5%, with organic sales growth of 1.1% on robust growth in U.S. companion animal revenues as well as higher sales in Europe aquatics and companion animal. This marked the fifth consecutive quarter of top line growth for the segment. The segment's sales also benefited from continued growth in dog chews and treats category. Further, continued innovation and market share gains were drivers.

In sync with its Global Productivity Improvement Plan, the pet business is on track with exiting non-core assets and activities to focus on core brands. This is demonstrated by the segment exiting the rawhide manufacturing facilities in Latin America in first-quarter fiscal 2020 and recent agreement to divest the dog and cat food manufacturing operations in Coevorden, The Netherlands, for \$33 million. Further, the pet segment is poised for growth backed by its pipeline of robust innovations and growth strategy.

▲ **Home & Personal Care Segment:** Sales at the Home & Personal Care segment rose 1.5% in the fiscal first-quarter, while organic sales increased 3.2%. The segment reported adjusted EBITDA loss of \$3.3 million against \$3.1 million gain reported in the prior-year quarter.

It reported operating loss of \$45.9 million against operating income of \$25.2 million in the year-ago period. Additionally, adjusted EBITDA declined 11.4%, with adjusted EBITDA margin contracting 140 bps. Sluggishness in adjusted EBITDA was due to additional tariffs, along with rise in manufacturing and stranded costs.

Foreign currency headwinds hurt the company's net sales by \$6.3 million in first-quarter fiscal 2020. On the existing rates, currency translations are expected to marginally hurt sales in fiscal 2020.
