Summary

State Street's shares have outperformed the industry over the past six months. Also, it has an impressive earnings surprise history, having surpassed the Zacks Consensus Estimate in each of the trailing four quarters. Its fourth-quarter 2019 results reflect successful cost savings efforts. New business servicing wins, opportunistic buyouts and strong balance sheet position are likely to continue aiding growth. Also, the company's efficient capital deployment activities reflect a strong liquidity position and are expected to enhance shareholder value. Though the Federal Reserve's accommodative policy stance, mounting expenses and overall tough operating environment are likely to hurt its financials in the quarters ahead, the company's efforts to technologically upgrade business will go a long way in supporting profitability.

Overview

Incorporated in 1832 and headquartered in Boston, MA, State Street Corporation is a financial holding company. It provides a range of products and services for institutional investors worldwide through its subsidiaries.

The company primarily performs its business through its principal banking subsidiary, State Street Bank. Its customers include providers of mutual funds, managers of collective investment funds and other investment pools, providers of corporate and public retirement plans, insurance companies, foundations, endowments and investment managers.

State Street operates through the following two divisions:

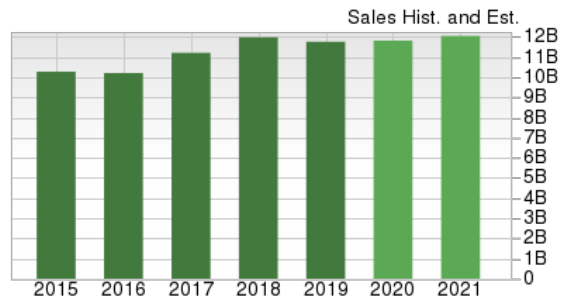

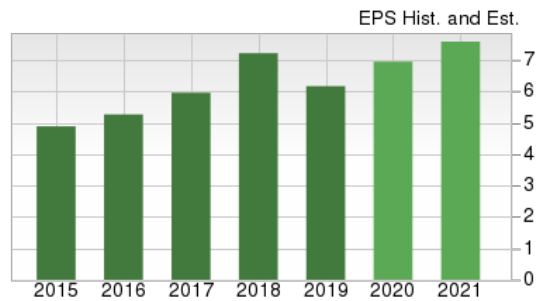

The *Investment Servicing* division (constituting 84% of total revenues in 2018) offers a range of services, including custody, product-and participant-level accounting, daily pricing and administration; master trust and master custody; recordkeeping; shareholder accounting; foreign exchange, brokerage and other trading; securities finance; deposit and short-term investment facilities; loans and lease financing; outsourcing of investment manager and hedge fund manager operations, as well as performance, risk and compliance analytics.

The *Investment Management* division (16%) provides a range of services for managing financial assets such as investment research services and investment management, including both passive and active U.S. and non-U.S. equity as well as fixed-income strategies, in addition to other related services such as securities finance.

In 2016, State Street acquired GE Asset Management. In 2018, the company acquired Charles River Development (CRD).

As of Dec 31, 2019, State Street had assets under custody and administration of \$34.4 trillion, and AUM of \$3.1 trillion.

Note: Certain information will be updated once the company files the latest 10-K.

Reasons To Buy:

- ▲ Organic growth remains a key positive for State Street. Though the company's total fee revenues declined in 2019 owing to challenging industry conditions and FX volatility, the same witnessed a four-year CAGR of 3.7% (2016-2019). Continuous investment in new products, new servicing business wins and inorganic growth strategy are expected to support fee income. The company remains well positioned with respect to its fundamental business activities, given its significant global exposure and a broad array of innovative products and services.
- ▲ We remain encouraged by State Street's capital deployment activities. The company's 2019 capital plan (approved by the Federal Reserve) included a 10.6% dividend hike and \$2 billion share repurchase authorization. As of Dec 31, 2019, nearly \$1 billion worth of shares were left to be repurchased. Given its solid liquidity position, earnings strength and lower debt-to-equity ratio compared with the industry, the company will likely be able to sustain improved capital deployments and continue to enhance shareholder value.
- ▲ Shares of State Street have outperformed the industry over the past three months. Also, the company's 2020 earnings estimates have been revised 6.8% upward over the past 30 days. Further, the stock seems undervalued compared with the broader industry. Its current PEG and price-to-earnings (F1) ratios are below the respective industry averages. Moreover, the stock has a Value Score of B. Therefore, given the strength in fundamentals and positive estimate revisions, the stock has upside potential.

State Street is well poised for growth backed by new business wins and a strong balance sheet position. Synergies from strategic buyouts and global footprint are also expected to support profitability.

Risks

- Elevated operating expenses are a major concern for State Street. Operating expenses witnessed a five-year (2014-2018) CAGR of 2.5%. Higher Information systems and communications expenses, as well as acquisition and restructuring costs are the primary reasons for the rise. While the company has been successful in achieving expense savings targets in 2019 and 2018 through high cost location workforce reduction and restructuring initiatives, overall costs are likely to remain elevated in the quarters ahead.
 - Relatively lower interest rates amid the Fed's accommodative monetary policy are expected to hurt State Street's net interest income (NII) and net interest margin (NIM). Further, both have been witnessing a declining trend over the past several quarters, the third quarter of 2019 being the exception. Notably, the company anticipates NII to decline in 2020 despite no expectations of further rate cuts.
 - Moreover, State Street's trailing 12-month return on equity (ROE) undercuts its growth potential. The company's ROE of 11.79% compares unfavorably with 17.38% for the S&P 500, highlighting that it is less efficient in using shareholder funds.
-

Last Earnings Report

State Street Q4 Earnings Top Estimates on Cost Savings

State Street's fourth-quarter 2019 adjusted earnings of \$1.98 per share outpaced the Zacks Consensus Estimate of \$1.70. Also, the figure was 18.6% above the prior-year quarter level.

Results reflect new investment servicing wins of \$294 billion, rise in assets balance, modest improvement in fee income and successful implementation of the company's expense saving initiatives. However, lower net interest income mainly due to lower rates was a headwind.

After considering several non-recurring items, net income available to common shareholders was \$632 million, surging 59.6% from the year-ago quarter.

For 2019, adjusted earnings of \$6.17 per share was down 14.2% but beat the consensus estimate of \$5.88. After considering several non-recurring items, net income available to common shareholders was \$2.15 billion, down 10.6%.

Revenues Up, Expenses Down

Total revenues for the quarter were \$3.05 billion, increasing 5% year over year. Also, the top line beat the Zacks Consensus Estimate of \$2.92 billion.

For 2019, total revenues fell 3% to \$11.76 billion. However, the figure beat the Zacks Consensus Estimate of \$11.64 billion.

Net interest revenues declined 1.2% from the year-ago quarter to \$636 million. The fall was due to the absence of episodic market-related benefits and lower market rates.

Also, net interest margin decreased 19 basis points year over year to 1.36%.

Fee revenues grew 1.8% to \$2.37 billion. This rise was mainly driven by higher servicing and management revenues.

Non-interest expenses were \$2.27 billion, down 8.8%. Decline was attributable to the impact of lower repositioning charges and the company's cost savings efforts. Excluding notable items, adjusted expenses decreased 2.1% to \$2.13 billion.

As of Dec 31, 2019, total assets under custody and administration were \$34.4 trillion, up 8.7% year over year. Also, assets under management was \$3.1 trillion, up 24.1%.

Strong Capital and Profitability Ratios

Under Basel III (Standardized approach), estimated Tier 1 common ratio was 11.9% as of Dec 31, 2019, compared with 11.7% as of Dec 31, 2018.

Return on common equity came in at 11.6% compared with 7.2% in the year-ago quarter.

Share Repurchase Update

During the reported quarter, State Street repurchased \$500 million worth of shares. This was part of its 2019 capital plan.

Outlook

First-Quarter 2020

Management expects fee revenues to be down 2-3% sequentially, given headwinds such as the expected asset mix shift by a single client in asset management and seasonally lower CRD revenues.

NII is anticipated to be down almost 5% from the prior quarter, given the full quarter impact of the October's Fed rate cut, lower day count and the fourth-quarter long-term debt issuance.

Expenses are likely to be down nearly 1% year over year and will include seasonal expenses usually occurring in the first quarter.

Effective tax rates are expected to be at high end of the 17-19% range.

2020

The company has based its outlook on certain assumptions that include slow global growth, modest support from equity markets and continued low market volatility.

Management expects NII to be down 5-7% year over year, driven by the carryover impact of lower market rates and continued rotation in the deposit book. Also, NII is likely to largely stabilize in the second half of 2020, if there is no significant change in the interest rate environment.

Fee revenues are expected to increase 1-3%. This includes expectation of servicing fees growing at the low to middle end of this range, and management fees growing at the high end of the band. Further, CRD revenues are projected to grow at low double-digits.

Management targets to achieve roughly 4-5% in cost savings, driven by continued focus on resource discipline and process engineering as well as technology optimization plan. This will include a reduction in headcount of an additional 750 roles in high-cost locations and IT expenditure to

Quarter Ending **12/2019**

Report Date	Jan 17, 2020
Sales Surprise	4.25%
EPS Surprise	16.47%
Quarterly EPS	1.98
Annual EPS (TTM)	6.18

be flat to down 2%.

These expense savings will be partly offset by nearly 3-4% increase in expenses related to the ongoing business building investment scenarios like CRD, tech infrastructure, and the variable cost of new business growth. Thus, operating expenses (non-GAAP basis) are expected to be down roughly 1%.

Effective tax rate is expected to be in the 17-19% range.

Medium-Term Targets

Including the impact of the Charles River Development buyout, the company expects revenues to increase 4-5%. Pre-tax margin is expected to improve 2%. Management expects earnings per share growth of 10-15% and ROE of 12-15%. Total payout ratio is expected to be greater than or equal to 80%.

Recent News

Dividend Update

On Dec 19, 2019, State Street declared a cash dividend of 52 cents per share. The dividend was paid out on Jan 16, 2020 to shareholders of record as of Jan 2.

Valuation

State Street's shares are up 9.4% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Finance sector are up 15.3% and 8.6%, respectively over the past year.

The S&P 500 index is up 20.4% in the past year.

The stock is currently trading at 11.11X forward 12 months earnings, which compares to 11.20X for the Zacks sub-industry, 14.74X for the Zacks sector and 18.83X for the S&P 500 index.

Over the past five years, the stock has traded as high as 16.12X and as low as 7.86X, with a 5-year median of 12.63X. Our Outperform recommendation indicates that the stock will perform better than the market. Our \$90 price target reflects 12.88X forward earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	C
Momentum Score	A
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
