Summary

Skyworks is banking on portfolio strength to capitalize on the broad-based utilization of 5G infrastructure solutions across automotive, industrial IoT and advanced medical applications, among others. Further, Skyworks continues to win content at mobile and OEMs like Samsung, OPPO, VIVO and Xiaomi, which is a tailwind. The emergence of connected homes, autonomous vehicles, AI, AR, wearables and network infrastructure hold promise. Strong demand for Wi-Fi, Zigbee and LTE solutions are other catalysts. Notably, shares of Skyworks have outperformed the industry in the past year. However, Huawei headwinds remain a concern. Overall macroeconomic uncertainty and high tariffs owing to the U.S.-China trade war remains a woe. Additionally, the company trimmed second-quarter guidance due to the COVID-19 outbreak.

Overview

Headquartered in Woburn, MA, Skyworks Solutions Inc. designs, manufactures, and markets a broad range of high performance analog and mixed signal semiconductors that enable wireless connectivity.

The company's products include power amplifiers (PAs), front-end modules (FEMs), radio frequency (RF) sub-systems, and cellular systems. Leveraging its core analog technologies, the company also offers a diverse portfolio of linear integrated circuits (ICs) that support automotive, broadband, cellular infrastructure, industrial and medical applications.

Skyworks Solutions reported revenues of \$3.38 billion in fiscal 2019.

The company has designed its product portfolio around two markets — cellular handsets and analog semiconductors. The handset portfolio includes highly customized power amplifiers and front-end solutions that are used in a variety of cellular devices from entry level to multimedia platforms and smartphones.

Moreover, the company's product portfolio is reinforced by approximately 3,000 global patents and other intellectual property. The company with industry-leading technology helps to offer highest levels of product performance and integration.

The company is engaged with key original equipment manufacturers ("OEMs"), smartphone providers and baseband reference design partners. It's chief customers includes Amazon, Apple, Arris, Bose, Cisco, DJI, Ericsson, Foxconn, Garmin, Gemalto, General Electric, Google, Honeywell, HTC, Huawei, Itron, Lenovo, LG Electronics, Microsoft, Motorola, to name few.

The company has a diversified business in three areas: addressed markets, customer base and product offerings.

The company has more than 2,500 customers and over 2,500 analog components in markets like automotive, home and factory automation, infrastructure, medical, smart energy and wireless networking.

Skyworks faces stiff competition from Analog Devices, Broadcom, Maxim Integrated Products, QUALCOMM and Qorvo.

Reasons To Buy:

▲ Skyworks continues to capitalize on three business segments -- mobile Internet, vertical markets and analog components. As demand for mobile Internet applications is exploding with the broad proliferation of smartphones, net books, note books, caplets and other forms of embedded wireless devices, Skyworks continue to gain traction. Perfect quality, environment-friendly products and sustainable business practices have been the key differentiators for the company in this competitive environment. The company is aggressively expanding into new vertical markets. It is investing heavily to increase its footprint in traditional analog segments like automotive, medical, aerospace, defense and industrial. These are highly attractive markets with longer product life cycles, fewer competitors and higher margins. Skyworks participates in these markets by leveraging core analog and mixed-signal design capabilities and a broad-based product catalog.

Skyworks expects continuous strength in the near future as the products continue to gain momentum. Sustainable business practices is a key differentiator for the company.

▲ The market for smartphones is reportedly growing at four times the growth rate of the traditional cellular handset. The rising RF dollar content and increasing complexity associated with the proliferation of smartphones and an array of other mobile Internet devices are fueling the total available market (TAM) growth, providing a unique opportunity for Skyworks to expand. The company is engaged in media gateway design for a leading network operator which provides the functionality of a traditional set top box with enhanced capabilities to support home networking and streaming on-demand video. The company has mitigated operating risks through diversification of business verticals. Skyworks has multiple connectivity technologies in a growing array of non-mobile applications. Additionally Skyworks is well-positioned to capitalize on the Internet of Things (IoT) with a rising demand for high-performance analog solutions in new markets. Skyworks expects to gain more businesses going forward, with continued investments in research and development to increase its IoT portfolio. As per market estimates, the growth within the IoT market is likely to exceed that of other connected devices over the next eight years with predictions of as many as 75 billion connected devices by the year 2025. Consequently, we expect Skyworks to have solid operating results in the imminent future.

▲ Based on order visibility, Skyworks expects continuous strength in the near future as the products continue to gain momentum. Expanding customer base that now include the likes of Foxconn, and Samsung is a key growth driver.

▲ Skyworks has a strong balance sheet and generates significant cash flow. In fiscal 2019, the company returned \$931.5 million to shareholders. The company repurchased 8.9 million shares worth \$657.6 million and paid out \$273.9 million as dividends. As of Dec 27, 2019, cash & cash equivalents were \$1.23 billion, up from \$1.08 billion reported in the previous quarter. Due to strong and relatively stable cash flow, we believe that the dividend payout appears sustainable and makes the stock quite attractive.

Reasons To Sell:

- ▼ Skyworks operates in a fiercely competitive market. The wireless handset market is intensely competitive and exposed to pricing pressures. The competitors in the mobile platforms market include Broadcom and Qorvo, while the competitors in the linear products market include Analog Devices, and Maxim Integrated Products. As other handset players such as Qorvo gear up to capitalize on the increasing demand for smartphones, we expect pricing pressure to intensify in the market leading to a decline in margins.
- ▼ We are concerned about concentration risks as a significant portion of Skyworks' revenue comes from a handful of customers. Huawei's addition to entity list, which was the company's "second largest customer," is negatively impacting financials. During fiscal 2019, the company had to incur \$70.4 million in inventory-related charges, majorly comprising inventory write-downs related to Huawei. Moreover, the company has to continually introduce new products to fend off competition and remain updated on technological advancements. We remain concerned about profitability as heavy investments in R&D escalate operating expenses, often without any significant contribution to its top line.
- ▼ Skyworks currently has a trailing 12-month Price/Book (P/B) ratio of 3.48. This level compares unfavorably with what the industry witnessed in the last year. Consequently, the valuation looks slightly stretched from P/B perspective.

Skyworks has to continually introduce new products to fend off competition and remain updated on technological advancements.

Last Earnings Report

Skyworks Beats on Earnings & Revenues in Q1

Skyworks Solutions reported first-quarter fiscal 2020 non-GAAP earnings of \$1.68 per share, beating the Zacks Consensus Estimate by 1.82%. The bottom line compares favorably with management's guidance of \$1.65 per share. However, the figure declined 8.2% from the year-ago quarter.

Revenues of \$896.1 million outpaced the Zacks Consensus Estimate of \$880 million. The figure outpaced the higher-end of the management's guided range of \$870 million to \$890 million. However, the top line declined 7.8% from the year-ago quarter.

Management attributes better-than-expected performance to rapid roll out of 5G phones and growing clout of Sky5 product portfolio.

Per management, Mobile contributed 73% to revenues, while the balance came from broad markets.

Deal Wins Remain Noteworthy

During the reported quarter, Skyworks' Sky5 product portfolio facilitated several 5G launches. The company's offerings were selected by VIVO, Xiaomi and OPPO for 5G mobile platforms.

In the fiscal first quarter, the company initiated volume production of Wi-Fi 6 connectivity offerings for Belkin/Linksys and ZTE.

Moreover, Skyworks' LTE-based IoT engines have been deployed by Sierra Wireless across transportation platforms and industrial gateways. The company's offerings have been implemented by Sonos for indoor/outdoor portable smart speakers.

Skyworks also rolled out Bluetooth Low Energy modules to power Proctor & Gamble's infant monitoring solution.

The company is benefiting from strong demand of its wireless communications engines. Its expanding product portfolio, growing influence in the IoT solutions and 5G markets are key catalysts.

Skyworks is also enabling notable infrastructure customers to enhance 5G small cell architecture.

Operating Details

Non-GAAP gross margin contracted 90 bps on a year-over-year basis to 50.1%.

Huawei's addition to entity list is likely to have negatively impacted gross margin. During the reported quarter, the company had to incur \$5.6 million in non-recurring charge (GAAP), primarily comprising inventory write-downs related to Huawei.

Research & development expenses as percentage of revenues expanded 80 bps on a year-over-year basis to 12%. Moreover, selling, general & administrative expenses expanded 130 bps from the year-ago quarter to 6.2%.

Consequently, non-GAAP operating margin contracted 150 bps on a year-over-year basis to 35.2% in the reported quarter.

Balance Sheet & Cash Flow

As of Dec 27, 2019, cash & cash equivalents were \$1.23 billion, up from \$1.08 billion reported in the previous quarter.

Cash generated by operating activities was \$398.4 million, compared with \$417 million in the prior quarter. The company reported free cash flow \$287 million, and free cash flow margin of 32%. Capital expenditure was \$111.2 million in the reported quarter.

Skyworks repurchased 742,000 shares for a total of \$74.2 million and paid out \$75.1 million as dividends.

The company declared a quarterly dividend of 44 cents per share payable on Mar 3, 2020, to shareholders as on Feb 11, 2020.

Guidance

On Mar 4, 2020, Skyworks updated second-quarter fiscal 2020 guidance. The company now anticipates second-quarter fiscal 2020 revenues to be \$760-770 million (mid-point of \$765 million), down from its prior range of \$800-\$820 million (mid-point of \$810 million) citing reduced customer demand owing to coronavirus outbreak and its impact on smartphone supply chain. The revised revenue outlook reflects a decline of 6.5% considering mid-point level. Non-GAAP earnings are anticipated to be approximately \$1.34 per share compared with prior guidance of \$1.46.

Quarter Ending 12/2019

Report Date	Jan 23, 2020
Sales Surprise	1.80%
EPS Surprise	1.82%
Quarterly EPS	1.68

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	C
Growth Score	D
Momentum Score	D
VGM Score	D

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
