Summary

Shares of United Airlines have tanked more than 70% since the beginning of February due to nosediving air-travel demand in the wake of the coronavirus. With demand plummeting and large-scale travel restrictions imposed, the carrier reported a loss in first-quarter 2020. Passenger revenues also declined 19% due to weakness in air-travel demand. Additionally, passenger unit revenues dropped 12.8%. Consolidated load factor deteriorated 10 percentage points to 70.9% as traffic decline was more than capacity contraction. The company anticipates daily cash burn (on average) in the \$40-\$45 million range during the second quarter of 2020. Moreover, the carrier reduced its adjusted capex guidance for 2020 by \$2.5 billion. However, low fuel costs (down 7.3% in the first quarter) are a positive. The deal With Bank of China Aviation is an added boon.

Overview

United Airlines Holdings is based in Chicago. The carrier changed its name from United Continental Holdings to United Airlines Holdings in June 2019. It is the holding company for both United Airlines and Continental Airlines.

United Airlines, whose fiscal year coincides with the calendar year, transports people and cargo not only throughout North America but also destinations in Asia, Europe, the Middle East and Latin America. The company operates more than 4,800 flights (mainline+regional) a day to 353 airports across multiple destinations. The regional carriers operate under the United Express brand.

The carrier's hubs are at Newark Liberty International Airport, Chicago O'Hare International Airport, Denver International Airport, George Bush Intercontinental Airport, Los Angeles International Airport, A.B. Won Pat International Airport, San Francisco International Airport and Washington Dulles International Airport.

As of Dec 31, 2019, the carrier's total fleet size stood at 1,358, out of which 777 and 581 were mainline and regional aircraft respectively. United Airlines is a member of Star Alliance, the largest and most comprehensive airline alliance in the world.

As of January 1, 2020, Star Alliance carriers served more than 1,300 airports in 195 countries across the globe. United Airlines is part of four passenger joint business arrangements ("JBAs"). Moreover, the company's MileagePlus loyalty program is aimed at promoting customer loyalty by offering awards, benefits and services to its members.

Participants in the program are eligible to earn miles for flights on United Airlines, United Express, Star Alliance members and certain other airlines. MileagePlus flight awards represented 7.2% of the company's total revenue passenger miles in 2019. In August 2019, the carrier removed expiration dates on its frequent flyer miles.

Passenger revenues account for the bulk of its top line. In 2019, 91.6% of the top line came from passenger revenues. **Cargo revenues** accounted for approximately 2.7% and the remaining came from "others."

Domestic revenues (United States and Canada) accounted for 62.3% of the total revenues in 2019. Atlantic, Pacific and Latin American regions accounted for 17.1%, 11.9% and 8.7% respectively in 2019.

Reasons To Buy:

▲ Amid declining air travel demand due to the rapidly-spreading coronavirus, significant reduction in fuel prices since the beginning of this year should partly offset the adversity. In fact, low fuel prices (down 7.1% in 2019 and 7.3% in first-quarter 2020) are aiding the carrier's bottom line. The company's strong 2019 performance despite headwinds, such as the prolonged MAX groundings, government shutdown and poor weather conditions, can be gauged from the fact that it achieved its 2020 adjusted earnings per share target of \$11-\$13 in 2019 itself.

Low fuel prices should help the company partly offset the decline in demand due to coronavirus.

▲ To counteract the enormous slump in demand due to coronavirus, the company took several cost-controlling measures like freezing hiring (except for crucial roles), delaying salary increases as well as giving employees the option to apply for unpaid leave of absence voluntarily. The carrier is also trying to preserve cash by cutting down on capital expenditures and operating expenses. While releasing its first-quarter results, the carrier reduced its adjusted capex guidance for 2020 by \$2.5 billion in view of the coronavirus crisis. The current-year metric is now expected below \$4.5 billion.

▲ Efforts to modernize its fleet also buoy optimism on the stock. To this end, the carrier is replacing the outdated planes with new ones to its fleet. The recent deal with Bank of China Aviation to sell 22 planes is a positive in this respect. The pact covers a fleet of six Boeing 787-9 and 16 Boeing 737-9 MAX planes. However, the planes can be leased back to the carrier under long-term agreements.

Reasons To Sell:

- ▼ The coronavirus outbreak is taking a significant toll on United Airlines. With air-travel demand declining at an unprecedented level, the airline announced a 90% reduction in international services for April. The carrier also cut back its domestic capacity significantly. Evidently, it expects to trim its May capacity by 90% (similar cuts are expected in June). Due to the rapidly dwindling air-travel demand, the carrier incurred a loss in first-quarter 2020 with passenger revenues declining 19%.

Tumbling demand due to coronavirus is hurting the company.
 - ▼ The company exited the first quarter of 2020 with cash and cash equivalents of \$3,442 million, less than the current maturities of long-term debt, which stands at \$4,055 million as of Mar 31, 2020. Notably, the company's debt-to-capitalization ratio at the end of the first quarter was 0.66 compared with 0.64 at the end of fourth-quarter 2019. The increasing debt-to-capitalization ratio indicates that the proportion of debt to finance the company's assets is on the rise. The ratio indicates that the company is at higher risk of insolvency. Also, United Airlines expects to get approximately \$5 billion via the payroll support program under the CARES Act. While a \$3.5-billion amount of the above will be through grants (it doesn't have to pay back), \$1.5 billion will be via 10-year loans. This is likely to worsen its debt profile. Moreover, in March, international credit rating agency Fitch lowered its outlook for the carrier to a negative due to the plunge in air-travel demand amid the coronavirus pandemic.
 - ▼ The government funding will protect jobs only through Sep 30, 2020. However, air-travel demand is likely to remain suppressed for a much longer time. In fact, United Airlines has warned that up to 30% of its managerial staff may be laid off after Sep 30. Moreover, United Airlines is taking a hit from the Boeing 737 MAX groundings. In February 2020, the carrier extended the grounding period of its MAX jets, which have remained non-operational since March 2019.
-

Last Earnings Report

Narrower-Than-Expected Loss in Q1

The company incurred a loss (excluding \$4.29 from non-recurring items) of \$2.57 per share, comparing favorably with the Zacks Consensus Estimate of a loss of \$3.25. Results were hurt by the coronavirus-induced weakness in air-travel demand.

Even though operating revenues of \$7,979 million decreased 16.8% year over year, the same marginally beat the Zacks Consensus Estimate of \$7,976 million. The year-over-year plunge was due to the 19% decrease in passenger revenues, which accounted for bulk (88.5%) of the top line. Moreover, cargo revenues representing 3.3% of the top line declined 7.7%. Revenues from other sources contributed to the remainder.

Quarter Ending **03/2020**

Report Date	Apr 30, 2020
Sales Surprise	0.04%
EPS Surprise	20.92%
Quarterly EPS	-2.57
Annual EPS (TTM)	8.38

Operating Results

Consolidated passenger revenue per available seat mile (PRASM: a key measure of unit revenues) decreased 12.8% year over year to 11.59 cents. Total revenue per available seat mile declined 10.4% year over year to 13.09 cents. On a consolidated basis, average yield per revenue passenger mile dipped 0.5% from the year-ago quarter.

During the quarter under review, consolidated airline traffic, measured in revenue passenger miles, decreased 18.7% year over year. Capacity (or available seat miles) contracted 7.2%. Consolidated load factor (percentage of seat occupancy) deteriorated 10 percentage points to 70.9% as traffic decline was more than capacity contraction. Meanwhile, average fuel price per gallon (on a consolidated basis) decreased 7.3% year over year to \$1.90.

Total adjusted operating expenses inched up 1.8% year over year to \$7,118 million in the reported quarter. Consolidated unit cost or cost per available seat mile (CASM) excluding fuel, third-party business expenses, profit sharing and special charges was up 9.7% year over year. Moreover, total unit costs increased 6.1% year over year.

United Airlines exited the first quarter with cash and cash equivalents of \$3,442 million compared with \$2,762 million at 2019 end. Long-term debt at the end of the reported quarter was \$13,198 million compared with \$13,145 million at 2019 end.

Other Details

The company anticipates daily cash burn (on average) in the \$40-\$45 million range during the second quarter of 2020. Moreover, the carrier had \$9.6 billion in liquidity as of Apr 29, 2020. The figure is inclusive of \$2 billion under its undrawn revolving credit facility.

Moreover, the carrier reduced its adjusted capex guidance for 2020 by \$2.5 billion in view of the coronavirus crisis. The current-year metric is now expected below \$4.5 billion.

Recent News

Deal With Bank of China Aviation – Apr 20, 2020

United Airlines has agreed to sell 22 planes to Bank of China Aviation. The pact covers a fleet of six Boeing 787-9 and 16 Boeing 737-9 MAX planes. However, the planes can be leased back to the carrier under long-term agreements. The deal is expected to close later this year.

Valuation

United Airlines shares have been down 74% and 73.3% year to date and over the past year, respectively. Stocks in the Zacks sub-industry have shed 58.1% and 56.2% of value so far this year and in a year's time each. Stocks in the Zacks Transportation sector have declined 26% and 24.3% year to date and in the past year, respectively. The S&P 500 index is down 10.9% in the year-to-date period and 0.8% in the past year.

The stock is currently trading at 2.73X trailing 12-month price to earnings, which compares to 4.3X for the Zacks sub-industry, 11.69X for the Zacks sector and 18.03X for the S&P 500 index.

Over the past five years, the stock has traded as high as 12.29X and as low as 1.76X, with a 5-year median of 8X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$25 price target reflects 2.97X trailing 12-month earnings

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	B
Growth Score	F
Momentum Score	B
VGM Score	C

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
