Summary

Walgreens Boots posted better-than-expected second-quarter fiscal 2020. The uptick in Retail Pharmacy USA came from comparable prescription sales growth and a strong retail prescription market. Rise in Pharmaceutical Wholesale sales buoy optimism too. Amid the coronavirus-led doldrums, these businesses recorded sales growth on rising customer demand. Progress made from new strategic partnerships was impressive. However, decline in adjusted earnings is concerning. Dullness in the Retail Pharmacy International was due to poor testing market conditions. Also, the company did not update its guidance, given the pandemic's rapidly changing variables. Tough market conditions, margin pressure and stiff competitive landscape are other headwinds for the company. Over the past six months, it has underperformed the industry it belongs to.

Overview

Founded in December 2014, Walgreens Boots Alliance (WBA) is the world's first pharmacy-led, health and wellbeing enterprise. The company has been formed through the combination of Walgreens Co. (WAG) and Alliance Boots. The merger brought together two leading companies with iconic brands, complementary geographic footprints, shared values, and trusted health care services through pharmaceutical wholesaling and community pharmacy care.

The company includes the largest global pharmaceutical wholesaler and distribution network with over 390 distribution centers delivering to more than 230,000 pharmacies, doctors, health centers and hospitals every year across 20 countries. In addition, Walgreens Boots Alliance is the world's largest purchaser of prescription drugs and several other health and wellbeing products. Its portfolio of retail and business brands includes Walgreens, Duane Reade, Boots and Alliance Healthcare, as well as global health and popular beauty product brands such as No7, Botanics, Liz Earle and Soap & Glory.

Segments in Detail

Historically, the legacy Walgreens used to report as one segment, which comprised the performance of Walgreens in the U.S.; its corporate costs and synergies from the Walgreens Boots Alliance Development joint venture, also known as WBAD; and equity earnings from Alliance Boots on a three-month lag. Following the combination of Alliance Boots and

the legacy Walgreens, Walgreens Boots eliminated the three-month reporting lag and recast prior period results with no lag.

As Walgreens Boots, management now reports results in three segments: **Retail Pharmacy USA** (176.43% of total revenues in fiscal 2019), **Retail Pharmacy International** (8.37%), and **Pharmaceutical Wholesale** (16.8%). In fiscal 2019, Retail Pharmacy USA segment registered 6.2% growth, Retail Pharmacy International segment registered 1.6% decline and Pharmaceutical Wholesale registered 8% growth from fiscal 2018.

Reasons To Buy:

▲ New Alliances Look Strategic: The intensifying competition in the U.S. retail drugstore market has compelled Walgreens Boots to diversify its product offerings. Under such circumstances, Walgreens' tie-up with Alphabet's life sciences and healthcare segment Verily on multiple projects on chronic ailment buoy optimism. The partnership aims at providing advanced healthcare outcomes to chronic conditions like diabetes at low cost of care.

Regarding Walgreens' newly-formed partnership with Kroger, the company updated that the grocery trials in the U.S. retail segment are progressing well. Walgreens is currently in the process of trying out various approaches in the 50 pilot stores, varying from a full Kroger Express offer with ambient and fresh produce to an ambient-only range. Further, Kroger is currently progressing with its trial of Walgreens health and beauty ranges in 17 of its stores in Knoxville.

Walgreens is also progressing well with its collaboration with LabCorp. The company is planning to open at least 600 LabCorp patient centers across the United States, thereby offering diagnostic lab testing services in the community. Per the plan, LabCorp is currently operating in 109 Walgreen sites across 12 states.

Also, the company recently entered into a multi-year Medicare agreement with UnitedHealthcare, which entails a new co-branded Medicare Advantage plan with Walgreens being the exclusive Retail Pharmacy company. Under this, the company has opened four of the 14 targeted resource centers.

Walgreens **Boots** revised Rite Aid deal expected benefit the company more over the long run. The company's strong cash balance position and progress in cost cutting initiatives further boost our confidence in the stock.

Further, Walgreens Boots' first-of-a-kind partnership with Wing to test on-demand drawing delivery, which utilizes Walgreens' previously-announced trial with FedEx for robot delivery, instills optimism.

During the second quarter of fiscal 2020, Boots UK partnered with LIVI, which will provide video general practitioner services and access to Boots pharmacy. In this line, Boots UK launched an innovative online pharmacy solution with LIVI and Boots.com.

Other notable progress made by the company includes the agreement with McKesson to create a German joint venture and an exclusive franchise deal in the U.K. with Mothercare, a British Retail online brand specializing in products for children.

▲ Express Script Deal Looks Promising: In a bid to ensure availability of specialty brand drugs Walgreens Boots has tied up with Express Scripts and announced plans to expand their existing group purchasing efforts. Since biosimilars have the potential to lower production costs, the move is considered to be a prudent and timely one. Specialty medication includes costly and complex drugs and is prescribed on a regular basis. The latest pact is expected to improve Express Scripts' supply chain and make these medicines, including biosimilars, affordable and accessible to patients.

Per a study by SNS Research, approved biosimilars will account for nearly \$22 billion revenues by the end of 2020. Regulatory efforts to reduce healthcare costs are likely to aid this growth. Given the potential that the market holds, we believe the latest move by these two medical behemoths is a strategic and timely one.

- ▲ Pharmaceutical Wholesale Division Registers Robust Growth: The company witnessed consistent solid performance from this segment. The Pharmaceutical Wholesale division's quarterly sales were \$6.1 billion, up 5.7% year over year. Comparable sales were up 8% at CER on growth in the emerging markets and the United Kingdom.
- ▲ Strong Balance Sheet: Walgreens Boots exited the fiscal second quarter with cash and cash equivalents of \$792 million compared with the \$811 million recorded at the end of the fiscal first quarter. Long-term debt was \$10.63 billion at the end of the reported quarter, unchanged from the last quarter's figure. Year to date, net cash provided by operating activities was \$2.4 billion, up from the year-ago period's \$1.2 billion.

Reasons To Sell:

- ▼ Share price fall: Over the past six months, the company has underperformed the industry it belongs to. The stock has lost 22.4% compared with the broader industry's fall of 10.9%. The year-over-year decline in adjusted earnings is concerning. Challenging market conditions, particularly in retail, have been inducing sluggishness in the Retail Pharmacy International division. Margin pressure is a major concern for the stock. Walgreens Boots' concerns about the coronavirus pandemic haves refrained it from updating its guidance. Tough market conditions, particularly in retail, and a tough competitive landscape are other headwinds trailing the company.
- ▼ Suspends Guidance on Unclear Spreading Impact of COVID 19: Although Walgreens recorded growing demand for Retail Pharmacy & Pharmaceutical Wholesale products at the quarter-end, the coronavirus-led doldrums impacted its guidance. In spite of the impact being immaterial to the company's fiscal second-quarter results, it is highly concerned about the overall impact on its yearly performance and has accordingly not updated the guidance as of now. Walgreens noted that although the situation is temporary, given so many rapidly-changing variables related to the pandemic, it is currently difficult to gauge the potential positive and negative impacts of the pandemic.
- ▼ Retail Pharmacy International Business Soft: Over the recent quarters, Walgreens Boots Retail Pharmacy International division remained soft. Revenues at the Retail Pharmacy International division declined 0.8% on a year-over-year basis to \$3.1 billion in the fiscal second quarter. Sales were down 1.7% at CER due to lower Boots U.K. sales and soft sales in Chile and Thailand. Boots UK's comparable pharmacy sales were up 1.8% at CER, while comparable retail sales slid 4.6% at CER in the reported quarter.
- Ongoing generic drug inflation, reimbursement pressure and competitive market offer tough challenges for Walgreens Boots. Also, the fluctuating weak U.S. macroeconomic environment still prevailing might hamper the company's margin.
- ▼ Pressure on Margin Continues: In the last few years, slowdown in generic introduction has been affecting Walgreens Boots' margins. In addition, of late, increased reimbursement pressure and generic drug cost inflation have been hampering Walgreens' margin on a significant level. Gross profit in the reported quarter fell 3.1% year over year to \$7.51 billion. Gross margin contracted 149 basis points (bps) to 20.9%. Selling, general and administrative (SG&A) expenses were down 0.2% year over year to \$6.3 billion. Operating income deteriorated 16% to \$1.2 billion. Overall, operating margin shrunk 79 bps to 3.4%.
- ▼ Competitive Landscape: Walgreens Boots faces headwinds in the form of increased competition and tough industry conditions. Even though the company continues to grab market share from other traditional drug store retailers, major mass merchants such as Target and Wal-Mart are expanding their pharmacy businesses and enjoying a fair market share. Notably, the retail wing of CVS Caremark witnessed a record market share gain following the termination of the Walgreens-Express Scripts contract. While Walgreens Boots' dull performance is showing signs of improvement with the return of customers, CVS management's commentary of retaining a majority of the client wins raises our concern. There are also risks from other channels, such as supermarkets and mail order operations. In addition, industry conditions remain challenging, as insurers reduce reimbursement rates and increase prescription co-payments.
- ▼ Additional Challenges: Under the present weak macroeconomic environment, external factors on which the company has no control whatsoever, might affect consumer confidence as increasing costs coupled with unemployment makes customers more value-driven. Consequently, spending on discretionary items gets affected. We believe this situation will impact same store sales growth. Moreover, the UK referendum and the consequent exit of Britain from the EU have paved the way for volatility in this market, which in turn might hamper Walgreens Boots' business in the region.
- ▼ Shift in Pharmacy Mix Might Hamper Operational Results: A shift in the mix of pharmacy prescription volume toward programs offering lower reimbursement rates might adversely affect Walgreens Boots' results of operations. The company's 90-day at retail offering for patients with chronic prescription needs typically is at a lower margin than comparable 30-day prescriptions. Additionally, management has accepted lower reimbursement rates in order to secure preferred relationships with Medicare Part D plans serving senior patients with significant pharmacy needs. If Walgreens Boots fails to generate additional prescription volume and other business from patients participating in these programs that is sufficient to offset the impact of lower reimbursement, it might adversely affect the company's results of operations.

Last Earnings Report

Walgreens Boots' Q2 Earnings Top Estimates, Margins Down

Walgreens Boots reported adjusted earnings per share of \$1.52 for second-quarter fiscal 2020, down 7.3% year over year (same at constant exchange rate or CER). Also, the reported figure surpassed the Zacks Consensus Estimate by 4.8%.

Reported earnings per share of \$1.07 declined 13.7% on a year-over-year basis.

Sluggishness in Retail Pharmacy International and margin contraction strained the bottom line. The company noted that the impact of the coronavirus pandemic started to reflect at the end of the fiscal second quarter. Hence, its impact was immaterial to the overall results.

Total Sales

Walgreens Boots recorded total sales of \$35.82 billion in the fiscal second quarter, up 3.7% year over year, and 4.1% at constant exchange rate or CER. The top-line figure surpassed the Zacks Consensus by 1.5%. Year-over-year growth was led by improvement within the Retail Pharmacy USA and Pharmaceutical Wholesale divisions, partially offset by a dull performance by Retail Pharmacy International.

Segments in Detail

Walgreens Boots reports through three segments — Retail Pharmacy USA, Retail Pharmacy International and Pharmaceutical Wholesale.

Retail Pharmacy USA: The segment's sales totaled \$27.2 billion in the fiscal second quarter, highlighting an improvement of 3.8% year over year. Pharmacy sales were up 5.3% from the year-ago quarter on higher brand inflation, prescription volume and growth in central specialty. Pharmacy sales at comparable stores improved 3.7% year over year, while prescriptions filled in comparable stores (adjusted to 30-day equivalents) rose 4.9% in the quarter. Retail sales edged down 0.3%, while comparable retail sales inched up 0.6% year over year. Excluding tobacco and e-cigarettes, comparable retail sales increased 1.9%.

Retail Pharmacy International: Revenues at the Retail Pharmacy International division declined 0.8% on a year-over-year basis to \$3.1 billion in the fiscal second quarter. Sales were down 1.7% at CER due to lower Boots U.K. sales and soft sales in Chile and Thailand.

Boots UK's comparable pharmacy sales were up 1.8% at CER, while comparable retail sales slid 4.6% at CER in the reported quarter.

Pharmaceutical Wholesale: The Pharmaceutical Wholesale division's quarterly sales were \$6.1 billion, up 5.7% year over year (up 8% at CER on growth in emerging markets and the U.K.).

Margins

Gross profit in the reported quarter fell 3.1% year over year to \$7.51 billion. Gross margin contracted 149 basis points (bps) to 20.9%.

Selling, general and administrative (SG&A) expenses were down 0.2% year over year to \$6.3 billion. Operating income deteriorated 16% to \$1.2 billion. Overall, operating margin shrunk 79 bps to 3.4%.

Financial Condition

Walgreens Boots exited the fiscal second quarter with cash and cash equivalents of \$792 million compared with the \$811 million recorded at the end of the fiscal first quarter. Long-term debt was \$10.63 billion at the end of the reported quarter, unchanged from the last reported quarter's figure. Year to date, net cash provided by operating activities was \$2.4 billion, up from the year-ago period's \$1.2 billion.

Fiscal 2020 Guidance Update

Walgreens Boots noted that prior to the COVID-19 outbreak, the company was on track to maintain its fiscal 2020 guidance (roughly flat growth in fiscal 2020 adjusted earnings per share, on a constant currency basis, with a range of plus or minus 3%). As it is unclear about the future impact of the pandemic, the company will update the yearly guidance during its next earnings conference call.

Meanwhile, the Zacks Consensus Estimate for fiscal 2020 adjusted earnings per share is currently pegged at \$5.85.

Recent News

On Mar 9, 2020, Walgreens and Postmates expanded their on-demand delivery service collaboration to 13 new cities.

On Feb 3, 2020, Walgreens Boots announced the expansion of its partnership with Tata Consultancy Services with the aim of advancing Walgreens Boots' transformation of its global IT function.

Valuation

Walgreens shares are down 26.3% in the year-to-date period and down 21.2% in the trailing 12-month periods. Stocks in the Zacks sub-industry are down 19.2% while the Zacks Medical sector is down 1.6% in the year-to-date period. Over the past year, the Zacks sub-industry is up 0.8% while sector is up 4.1%.

The S&P 500 index is down 11.8% in the year-to-date period and declined 2.4% in the past year.

The stock is currently trading at 7.3X Forward 12-months earnings, which compares to 8.1X for the Zacks sub-industry, 26.9X for the Zacks sector and 18.9X for the S&P 500 index.

Over the past five years, the stock has traded as high as 23.3X and as low as 6.9X, with a 5-year median 13.7X. Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$46 price target reflects 7.8X forward 12-months earnings.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	Α
Growth Score	C
Momentum Score	D
VGM Score	Α

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
