Summary

Wheaton's fourth-quarter 2019 earnings came in line with the Zacks Consensus Estimate, while sales missed the same. Both top and bottom lines improved year over year. It expects to produce 390,000 to 410,000 ounces of gold in 2020. Gold production is expected to be strong, primarily aided by the Salobo and San Dimas mines. Wheaton expects higher production of silver grade at Penasquito mine as Newmont initiates improvement program to boost productivity and grade. Wheaton's strong cash position, strong operating cash flows combined with available credit capacity provide scope for continued investments. They also provide flexibility to acquire additional accretive precious metals. However, Wheaton's results are likely to be affected by lower commodity prices and miners' suspension of operations due to the coronavirus outbreak.

Overview

Wheaton Precious Metals is one of the largest precious metal streaming companies in the world that generates its revenues primarily from the sale of gold, silver and palladium.

Wheaton currently has streaming agreements that cover 19 operating mines and 9 development stage projects. The company's production profile is driven by a high-quality portfolio of low-cost, long-life assets that include a gold stream on Vale's Salobo mine, silver streams on Glencore's Antamina mine and Goldcorp's Peñasquito mine.

The company offers investors leverage to increasing precious metals prices, a sustainable dividend payout as well as organic and acquisition growth opportunities.

Wheaton's operating costs are contractually set at the time the stream is entered into, which enables investors to benefit from cost predictability and strong margin growth amid rising metal prices.

Wheaton was very active on the corporate development front in 2018. It has added two new low-cost, long-life assets to high-quality portfolio — the Voisey's Bay mine and the Stillwater mines.

The company has entered into 23 long-term purchase agreements with 17 different mining companies for the purchase of precious metals and cobalt (precious metal purchase agreements or "PMPA"). Following the PMPAs, Wheaton acquires metal production from the counterparties for an initial upfront payment plus an additional cash payment for each ounce or pound delivered that is fixed by contract, generally at or below the prevailing market price.

The primary drivers of the company's financial results are the volume of metal production at the various mines to which the PMPAs relate and the price realized by Wheaton upon the sale of the metals received.

Reasons To Buy:

- ▲ Wheaton strives to generate revenues from a diverse production profile of precious metals that includes gold, silver and palladium. For the current year, Wheaton expects to produce 390,000 to 410,000 ounces of gold, silver production between 22 million ounces and 23.5 million ounces and palladium production in the band of 23,000-24,500 ounces. The company has reiterated its current-year and long-term production guidance announced in February. Gold production is expected to be solid, primarily aided by the Salobo and San Dimas mines. Silver production in the ongoing year is expected to be stable as growth from Penasquito is expected to be partially offset by slight declines at Antamina and Constancia due to mine planning. The company estimates annual gold equivalent production to average 750,000 ounces per year, primarily on continued growth at the Penasquito, Constancia, Stillwater and Salobo mines. For the five-year period ending in 2024, the company estimates that average annual gold equivalent production will amount to 750,000 ounces.
- ▲ Wheaton receives benefit from mine exploration and expansion activities. The company expects higher production of silver grade at Penasquito mine in 2020 as Newmont initiates improvement program to drive productivity and grade. At Constancia, Hudbay has secured the surface rights for the Pampacancha deposit and expects to begin mining the satellite deposit in late 2020. At the Stillwater mine, palladium and gold production is expected to increase with the continued ramp-up of the mill projects. These projects are expected to be growth drivers in the coming years. In October, Vale invested in the Salobo III mine expansion, wherein 40% expansion has been completed. Vale anticipates that the Salobo expansion is scheduled to commence in the first half of 2022. This will enhance the mine's throughput capacity to 36 million ton per annum (Mtpa) from current level of 24 Mtpa.
- ▲ Wheaton has diversified portfolio of high-quality, long-life assets. The company is focused on adding additional production capacity from high-quality accretive metals. Moreover, its business model focuses on reducing risk while leveraging higher commodity prices. Wheaton has also been active on the corporate development front. In 2018, the company added two new low-cost, long-life assets to its high-quality portfolio, the Voisey's Bay mine and the Stillwater mines.
- ▲ Wheaton's cash position, strong operating cash flows combined with available credit capacity under the revolving facility of \$2 billion enable the company to invest as well as sustain dividend policy. They also provide flexibility to acquire additional accretive precious metals. The company uses excess cash to pay revolving credit facility. During fourth-quarter 2019, the company repaid \$139 million under the revolving facility and made dividend payments of \$34 million. For 2020, Wheaton's board of directors hiked the quarterly dividend by 11% year over year to 10 cents per share. Additionally, the company is taking precautionary measures for health and safety of its employees on account of the coronavirus outbreak and implementing measures to minimize any possible impact on the business.
- ▲ Gold prices have been up 9% so far this year fueled by the slowdown in manufacturing activity, rate cuts, geopolitical tensions, and apprehensions regarding the coronavirus outbreak. Going forward, the combination of lower mined gold supply and higher demand, and geopolitical tensions are likely to drive prices north. This bodes well for Wheaton.

Wheaton is poised to gain from diversified portfolio of high-quality and long-life assets, mine expansions and acquisitions. Further, strong cash position will drive growth.

Reasons To Sell:

- ▼ Metal producers worldwide are suspending production, slowing project construction as governments are imposing restrictions to contain the spread of coronavirus. These companies are also cutting non-essential travel of office employees to protect them against getting infected. Vale announced that it is placing its Voisey's Bay mining operation in Canada on care and maintenance for a period of four weeks. Hence, suspension of mining operations is likely to hurt Wheaton's business in the near term.
- ▼ Wheaton's financials will likely be affected by changes in the market price of commodities underlying the royalties, streams, working interests and investments. Silver prices have slumped 19% so far this year, primarily be attributed to the coronavirus pandemic, which has disrupted global economic activity consequently weakening consumption of industrial raw materials. The situation has only been aggravated by the fact that silver is already in oversupply. Palladium prices have also dipped on worries of a further supply shortage in 2020 amid rapidly rising demand from automakers. The company's revenues are particularly sensitive to changes in the prices of precious metals and cobalt, as it derives all of its revenues from precious metals and cobalt streams. Thus, decline in the commodity prices is likely to affect the company's revenues. Sustained low prices are also expected to have a material adverse impact on the company's financial position and ability to raise capital.
- ▼ Wheaton is engaged in exploration, development and mining opportunities in the resource industry and acquisitions. Thus, the company will likely incur higher debt related to acquisitions. The company is also exposed to liquidity risks in meeting operating expenditures.

Wheaton's results likely be hurt by changes in the prices of precious metals and cobalt. Also, higher debt related to acquisitions remains a concerning factor.

Last Earnings Report

Wheaton's Q4 Earnings in Line, Sales Miss Estimates

Wheaton reported adjusted earnings of 17 cents per share in fourth-quarter 2019, which were in line with the Zacks Consensus Estimate. The bottom line surged 112.5% year over year.

The company generated revenues of \$223.2 million in the reported quarter, up 13.5% on a year-over-year basis. The top line, however, missed the Zacks Consensus Estimate of \$234 million. The upside was driven by increased average realized prices of gold, silver and palladium and a higher number of silver ounces sold, partly offset by a decrease in the number of gold ounces sold.

Wheaton's attributable gold production was 107,225 ounces compared to 107,160 ounces in the prior-year quarter. Attributable silver production increased 8.4% year over year to 5,962 ounces, while palladium production grew 3.2% year over year to 6,057 ounces.

The company sold 152,389 Gold Equivalent Ounces (GEOs) in the quarter, down from 162,205 GEOs in the prior-year quarter.

Prices

In fourth-quarter 2019, average gold price was \$1,483 per ounce, 20.7% higher than the year-ago quarter's figure. Silver prices averaged \$17.36 per ounce in the quarter, up 18.4% year over year. Palladium prices jumped 58.7% year over year to \$1,804 per ounce.

Financial Position

The company had \$104 million of cash in hand in 2019, up from \$76 million at the end of 2018. It recorded operating cash flow of \$502 million in 2019 compared with \$477 million in 2018. The company had outstanding liability of \$875 million under the company's \$2 billion revolving credit facility. During the fourth quarter, Wheaton repaid \$139 million under the revolving facility.

For the current year, Wheaton's board of directors hiked the quarterly dividend by 11% year over year to 10 cents per share. The dividend will be paid on Apr 9 to shareholders of record as of the close of business on Mar 26, 2020.

2019 Results

Wheaton reported adjusted earnings per share of 56 cents in 2019, up 16.7% from the prior year's 48 cents. The reported figure came in line with the Zacks Consensus Estimate.

Sales increased 8.5% year over year to \$861.3 million in 2019. However, the top-line figure lagged the Zacks Consensus Estimate of \$878.8 million. In 2019, the company produced a record 406,675 ounces of gold.

Outlook

Wheaton has updated production guidance for the current year. Estimated attributable production is forecasted between 685,000 GEOs and 725,000 GEOs. Gold production is expected at 390,000-410,000 ounces, silver production between 22 million ounces and 23.5 million ounces and palladium production in a band of 23,000-24,500 ounces. For the five-year period ending 2024, the company anticipates average annual gold equivalent production to be 750,000 ounces.

Quarter Ending **12/2019**

Wheaton Hikes Quarterly Dividend - Mar 11, 2020

Wheaton's board of directors hiked the quarterly dividend by 11% year over year to 10 cents per share. The dividend will be paid on Apr 9 to shareholders of record as of the close of business on Mar 26, 2020.

Valuation

Wheaton's shares are up 18.4% over the trailing 12-month period. Stocks in the Zacks Mining - Miscellaneous industry and the Zacks Basics Materials sector were down 31.7% and 35.4% over the past year, respectively.

The S&P 500 index is down 11.8% in the past year.

The stock is currently trading at 31.30X forward 12-month earnings, which compares to 7.68X for the Zacks sub-industry, 9.93X for the Zacks sector and 15.48X for the S&P 500 index.

Over the past five years, the stock has traded as high as 52.35X and as low as 16.53X, with a 5-year median of 30.10X.

Our Neutral recommendation indicates that the stock will perform in-line with the market. Our \$30 price target reflects 33.37X forward 12-month earnings.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	F
Growth Score	C
Momentum Score	F
VGM Score	F

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
