### Summary

Xerox continues to grapple with decreased demand for paper-related systems and products. Presence of large number of substitutes raises competitive pressure. Global presence exposes the company to unfavorable foreign currency movements, which has been impacting its top-line growth. Moreover, the company does not have enough cash to meet its debt burden. Partly due to these negatives, the stock has declined significantly over the past year. However, Xerox's bottom line is benefiting from "Project Own It," an initiative aimed at increasing productivity and operational efficiency, reducing costs and realigning business to changing market conditions. Moreover, the company has an aggressive product development program in new high growth markets.

## Overview

Despite experiencing top-line decline over the years on decreased demand for paper-related systems and products, Norwalk, Connecticut-based Xerox remains a leader in the contractual print and document services market.

Post reorganization (that does not involve any change in operations, directors and executive officers) as a wholly-owned subsidiary of a new holding company in 2019, the company is trying to attain greater strategic, operational as well as financial flexibility.

Xerox deploys an aggressive product-development program to revive sales. It has developed one of the industry's strongest portfolios of managed print service (MPS) solutions and services.

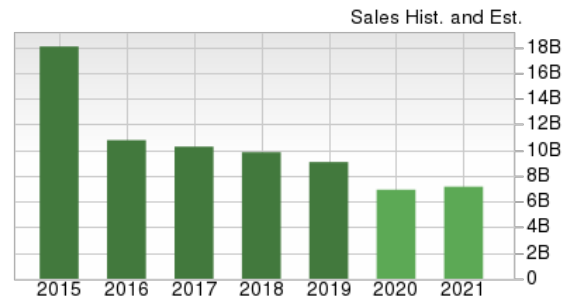

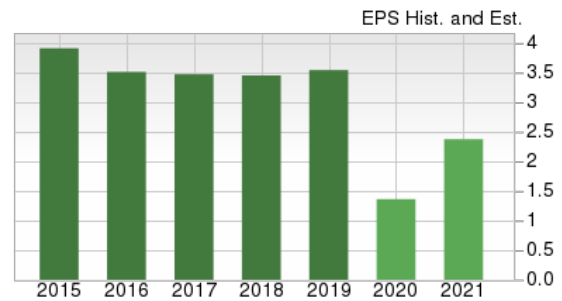

Xerox's strategy is to use data-centric technologies to better help customers in their digital transformation journey, taking advantage of the changing market conditions. The company is trying to offer end-to-end management of the entire office print infrastructure. It focuses on market trends, such as cloud, analytics, digital and security, with a view to effectively address customer needs.

The company is using security and digital transformation as key competitive differentiators. A global service delivery model, flexibility and scalability of MPS services and billing options, and close relationships with customers and partners are its key strengths. Programs like Virtual Print and FedRAMP authorization are helping the company broaden its market opportunities.

Xerox's bottom line is benefiting from "Project Own It," an initiative aimed at increasing productivity and operational efficiency, reducing costs and realigning business to changing market conditions. It produced \$640 million in cost savings through the project in 2019.

An aggressive business strategy of Xerox makes sense as it continues to operate in a highly competitive market. It competes based on technology, price, performance, quality, reliability, distribution, brand and customer service and support. The largest competitors include Hewlett-Packard, Canon, Konica Minolta and Ricoh.

The company believes its business strengths are brand recognition, reputation for document management expertise, innovative technology and service delivery excellence.

---

## Reasons To Sell:

- ▼ Advancements in IT have replaced the traditional means of sending and storing information by digital media. As a result, Xerox is **grappling with decreased demand** for paper-related systems and products while its attempts to leverage the business process outsourcing market failed to lend growth momentum.
- ▼ Xerox's cash and cash equivalent balance of \$2.27 billion at the end of the second quarter was well below the long-term debt level of \$3.97 billion underscoring that the company **doesn't have enough cash to meet this debt burden**. The cash level, however, can meet the short-term debt of \$1.79 billion.
- ▼ Another major threat involves the availability of a **large number of substitutes** because of strong peer presence, although there are lesser chances of new entry. Companies like Canon, Hewlett-Packard, Lexmark and Toshiba are capable of giving tough competition to Xerox. Moreover, those companies are also broadening their product lines and strengthening their global presence in almost the same way as Xerox. This has largely affected the profit margin of Xerox.
- ▼ Given its international presence, Xerox faces **unfavorable foreign currency movements**, impacting its top-line growth. For the year 2019, the company's year over year revenue decline of 6.2% included a 1.5% unfavorable impact from currency. This probably weighed on its share price which has decreased 33.2% over the past year.

Xerox is grappling with decreased demand for paper-related systems and products.

---

## Risks

- Xerox has **reorganized** as a wholly-owned subsidiary of a new holding company. The reorganization is aimed at attaining greater strategic, operational as well as financial flexibility and does not involve any change in operations, directors and executive officers. A holding company structure helps to protect patents, reduce tax bill and diversify businesses efficiently. So, the move seems appropriate as Xerox is executing a Strategic Transformation program to achieve productivity and cost reduction. Also, the company has an aggressive product development program in new high growth markets.
  - Xerox has a solid track of record strong margins which it has been attaining through cost and productivity initiatives. The company's bottom line is benefiting from "**Project Own It,**" an enterprise-wide transformation initiative aimed at increasing productivity and operational efficiency, reducing costs, as well as realigning business to changing market conditions. Xerox produced \$640 million in cost savings through the project in 2019 and expects to produce another \$450 million in 2020. The company's adjusted operating margin improved 180 basis points year over year to 13.1%.
  - Xerox has a **post-sale driven business model** that provides significant recurring revenue and cash generation. Around 77% of the company's total revenues in 2019 was associated with contracted services, equipment maintenance services, consumable supplies and financing. This business model supports strong cash flows that help the company to make strategic investments and penetrate in markets with high growth potential.
  - Xerox continues to expand its **Small and Mid-sized (SMB) coverage** through acquisitions of local area resellers and partners. In 2019, the company acquired Heritage Business Systems, a Delaware Valley dealer and Rabbit Office Automation, a San Francisco Bay area dealer. These acquisitions have expanded the company's distribution capabilities of office technology sales, services and supplies to SMB customers. Moreover, the company has significantly expanded internationally, with a footprint across approximately 160 countries. We believe expansion of SMB coverage will help Xerox improve its top line going forward.

## Last Earnings Report

### Xerox's Earnings Beat Estimates in Q2

Xerox reported mixed second-quarter 2020 results, with earnings beating the Zacks Consensus Estimate but revenues missing the same.

Adjusted earnings per share of 15 cents beat the consensus mark by 25% and declined year over year. Total revenues of \$1.47 billion missed the consensus mark by 5.2% but declined year over year. The coronavirus pandemic had a significant negative impact on the company's quarterly results.

Quarter Ending **06/2020**

Report Date	<b>Jul 28, 2020</b>
Sales Surprise	<b>-5.15%</b>
EPS Surprise	<b>25.00%</b>
Quarterly EPS	<b>0.15</b>
Annual EPS (TTM)	<b>2.77</b>

### Revenues in Detail

Sales revenues totaled \$460 million, down 42.5% year over year. Services, maintenance and rentals revenues totaled \$949 million, down 32.3% year over year. Financing revenues of \$56 million declined 8.2%.

### Operating Performance

Adjusted operating profit of \$62 million declined 77.9% year over year. Adjusted operating margin shrunk 820 basis points (bps) year over year to 4.2%.

Selling, administrative and general expenses, as a percentage of revenues, increased to 29.1% from the 22.8% reported in the year-ago quarter. Research, development and engineering expenses, as a percentage of revenues, came in at 5.2%, up from the year-ago quarter's 3.9%.

### Balance Sheet and Cash Flow

Xerox exited the second quarter with cash, cash equivalents and restricted cash balance of \$2.3 billion. Long-term debt was \$2.2 billion at the end of the quarter.

The company generated \$34 million of cash from continuous operations and free cash flow was \$15 million.

## Recent News

On **Jul 23, 2020**, Xerox announced that its board of directors declared a quarterly cash dividend of 25 cents per share, payable on Oct. 30, 2020 to shareholders of record on Sep 30, 2020.

On **Jul 15, 2020**, Xerox announced launch of Xerox AltaLinkC8100 and Xerox AltaLink B8100 Series multi-function printers (MFPs).

On **Jun 25, 2020**, Xerox announced that it has launched Team Availability App that offers quick-to-deploy, customizable, real-time solutions for management of flexible work environments amid the continued coronavirus pandemic.

On **May 22, 2020**, Xerox announced that its board of directors declared a quarterly cash dividend of 25 cents per share, payable on Jul 31, 2020 to shareholders of record on Jun 30, 2020. The board also declared a quarterly cash dividend of \$20 per share on the outstanding Xerox Holdings Corporation Series A Convertible Perpetual Preferred Stock. This dividend will be paid on Jul 1, 2020 to shareholders of record on Jun 15, 2020.

## Valuation

Xerox shares are down 49.1% in the year-to-date period and 33.2% over the trailing 12-month period. Stocks in the Zacks sub-industry and Zacks Industrial Products sector are down 27% and 2.3% in the year-to-date period respectively. Over the past year, the Zacks sub-industry is down 11.2% but the sector is up 15.3%.

The S&P 500 index is up 5.5% in the year-to-date period and 18.3% in the past year.

The stock is currently trading at 9.28X price to forward 12 months' earnings, which compares to 13X for the Zacks sub-industry, 21.91X for the Zacks sector and 22.85X for the S&P 500 index.

Over the past five years, the stock has traded as high as 11.49X and as low as 3.29X, with a 5-year median of 8.53X. Our Underperform recommendation indicates that the stock will perform worse than the market. Our \$20.00 price target reflects 9.89X forward 12 months' earnings.

## Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

### Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

### Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

---

### Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	<b>A</b>
Growth Score	<b>F</b>
Momentum Score	<b>D</b>
VGM Score	<b>C</b>

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.
